

## OFFICE OF THE ECONOMIC ADVISER TO THE GOVERNMENT OF INDIA

(MINISTRY OF COMMERCE)

REPORT ON AN ENQUIRY INTO THE FAMILY BUDGETS OF MIDDLE CLASS EMPLOYEES OF THE CENTRAL GOVERNMENT.

PRINTED IN INDIA FOR THE MANAGER, GOVERNMENT OF INDIA PUBLICATIONS BRANCH, DELHI, BY THE MANAGER, GOVERNMENT OF INDIA PRESS SIMLA, 1919.

Price: Rs. 5-0-0 or 8 Sh.

Reference II- This booksis not meant for home-issue. It should not therefore be removed from the office premises.

#### INTRODUCTION.

Enquiries into the ways of siving of industrial workers in India have been made from time to time by private investigators but with the setting up of an International Labour Organization in the early twentics of this century, the State also began to evince great interest in the subject of working class cost of living. Working class family budget enquiries were thus undertaken during the last several years by various. Provinces and lately by the Labour Department (now Ministry) of the Government of India. No attempt was, however, made by the Central or Provincial Covernments to undertake similar enquiries into the family budgets of other income groups. This might have been due to the reason, as suggested by the Indian Economic Enquiry Committee of 1925, that the middle and upper class, sin India, as in most countries, resented enquiries regarding their income and expenditure and hesitated to disclose the true state of affairs. Unofficial enquiries were undertaken during the war in regard to such income groups but as these were of limited scope, the need for a comprehensive survey remained unfulfilled and with a view to collecting the necessary material for filling the gap, the Office of the Economic Adviser to the Government of India was authorised in 1945 to undertake the necessary preliminary enquiry into the income and expenditure of families of middle class Central Government employees. The extension of the enquiry to the employees of the Provincial Governments and Local Bodies was also attempted and, in fact, a circular I tter was addressed to all Provincial Governments asking for their co-operation in the matter. On consideration, however, of the Provincial Governments' replies and in the interest of speedy and satisfactory conclusion of the enquiry it was found necessary to go ahead with the Central enquiry in the first instance.

- 2. From the administrative point of view there was one great advantage in the middle class enquiry as compared with working class investigations. In the case of the working classes an almost wholly illiterate section of the community had to be tackled and from them no information could be obtained save through a large staff of investigators who had to go round and attempt, after surmounting great initial obstacles, the collection of the required information by personal enquiry on the spot. In the middle class enquiry, on the other hand, an educated section of the population was dealt with and it was, therefore, possible to make a direct approach to the individual concerned by means of a printed schedule. A precise definition of the term middle class by specifying upper and lower income limits, was, however, rendered difficult by the existence of a large body of clerical workers with a rather low basic salary (as low as Rs. 30 per month in some cases) who, nevertheless, demanded inclusion in this class. The fixation of an upper income limit presented similar difficulties and it was decided to go up to the level of Rs. 500 per month.
- 3. The total number of salaried employees falling within the above limits was known to be of the order of several hundred thousands and it was considered impracticable to contact every one of these employees. It was, however, unnecessary to do this. The purpose could be served equally well by the careful selection of a sample. But in order that such a sample could be selected it was essential that a detailed list of the names and addresses of all persons concerned should first be prepared. Accordingly a Statistical Officer from the Economic Adviser's Office visited all the Departments and Offices in Delhi and Simla and personally prepared the necessary lists. Attached and Subordinate Offices located outside Delhi and Simla co-operated in the enquiry by having similar lists prepared and forwarded to the Officer-in-Charge of the Enquiry. So far as the list at the headquarters of Government was concerned, the preparation was completed by the end of July, 1945 but lists from outside took some considerable time. Some further delay was caused as the list had to be re-drawn on the conclusion of hostilities so as to exclude temporary employees, who, it was feared, might not continue in service for the period of the enquiry. The selection of the sample which was expected to be completed by the end of August, 1945 was thus delayed by at least two months.
- 4. As soon as the lists were drawn up the problem of choosing an unbiassed random sample in which each family had an equal chance of inclusion had to be tackled. The precise manner of making the selection was examined by a panel of statistical experts and although it was initially proposed to have three salary strata before the actual choice of the sample, it was later decided at the suggestion of the panel to make a completely random selection. The 'lottery' method was employed in the actual selection. The question of substituting possible "refusals" or inaccessible cases was also considered by the experts and, in accordance with their advice, no attempt was made to provide any 'substitution'.
- 5. The original intention of collecting four quarterly budgets beginning with September, 1945 was upset for reasons mentioned in a previous paragraph and instead, four quarterly budgets for November '45, February '46, May '46 and August '46 were asked for. The first schedule was sent by post to the selected persons with the request that it should be returned duly filled with information for the month of November '45 in reply-envelopes which were also provided. An express assurance was also given that the information would be treated as strictly confidential. It may also be stated that the schedule was prepared with great care in consultation with the Imperial (now Central) Secretariat Association at headquarters. Persons who were invited to supply budgets were informed that the Government of India were willing to make a contribution of Rs. 5 towards certain incidental expenses which the former might incur in connection with the naintenance of the necessary accounts.
- 6. Some of the selected persons needed clarification on various points before they could fill in the schedule and for this purpose it was decided to make personal contacts with such individuals at their places of residence. About 2,000 persons were thus personally assisted in various places over the entire country and a the light of the experience gathered, it was thought advisable to enclose with the schedule a printed form ontaining hints to enable the individuals to fill in the forms with ease. About 5,000 individuals all over additionally decided to supply family budgets. Of these some retired from service and some died

during the period of the Enquiry and about 200 persons intimated their unwillingness to participate in the Enquiry. Moreover, nearly 120 budgets were found unsuitable for tabulation as they were supplied by persons, who, on account of transfer in the interim, submitted budgets from different places or, whose income category underwent changes owing to promotion. The budgets were generally filled carefully and accurately although on the quantities side information was in some cases inadequate. All the budgets were subjected to close scrutiny and only those which were considered wholly reliable were accepted for detailed investigation. As regards income, details of pay and other emoluments of the individuals as intimated by the respective offices were checked against the entries in the budget schedules although there was no means of checking other income entries such as, interest and dividends. In regard to expenditure, entries were checked against prevailing retail prices. Available consumption figures in respect of cereals and other items were also utilised for the testing of reliability. In doubtful cases, difficulties were resolved by correspondence with the persons concerned.

- 7. The total number of finally eligible budgets was 6,198 and with a view to obtaining an indication, however rough, of the sufficiency of the sample obtained, the latter was divided at random into two equal parts and the means and variances of the two portions worked out separately. The relevant statistics including quartile values of average means and expenditure for the whole sample have been brought together in Tables I—V on pp. 13—15 of the Report. The initial proposal was to restrict the analysis to the regional blocks but in response to a later demand, the budgets belonging to the cities of Bombay, Madras, Calcutta and Delhi were also taken up for separate analysis. Annexure at page 13 of the Report shows the distribution of the effective budgets classified into eleven regional groups comprising four principal cities and seven other territorial blocks. Each of the eleven blocks has a whole section devoted to it in the pages that follow but the broad picture which emerges from the detailed analysis is condensed in Part I of the Report.
  - 8. The main results of the analysis are below:—
- (a) Total income per family varied, on an average, from Rs. 159-6 per month in Madras Province to Rs. 286-1 in Delhi, the earning of the head of the family accounting for 82 to 92 per cent. of the total income.
- (b) Expenditure was nowhere in reasonable correspondence with family income. The deficit, however, was relatively small in the case of Madras Province and Delhi. In other regions the gap between income and expenditure was rather large. In the Provinces of Bombay and Madras one in five was a surplus budget while in Delhi surplus budgets accounted for two in every five. In U.P., Punjab, B. and O. and C.P., and Madras city deficit budgets formed more than 80 per cent. of the total number. The other regions came in between.
- (c) The average monthly expenditure on food varied from Rs. 75-1 per family in Madras to Rs. 117-9 in the Punjab: Milk and fats accounted for the highest proportion of total feed expenditure and they were followed closely by cereals and fruits and vegetables, the three sub-groups together constituting about 70 per cent. of the total expenditure on food. In terms of consumption units monthly expenditure on cereals was between Rs. 4 and Rs. 5 per unit in Calcutta city, Bengal and Assam, Bombay city and Delhi, and between Rs. 3 and Rs. 4 in the remaining places.
- (d) In the matter of house-rent, Bombay city was leading at Rs. 23-8 per month while U. P. returned the lowest figure viz., Rs. 8-7 per month. The average number of rooms per family was 3 in Bombay province, Madras city, Calcutta, Central Provinces and Central India and between 2 and 3 in other regions, the average number of persons per room varying from 1.9 in Bombay province to 2.8 in Calcutta.
- (e) A very large proportion of the families were involved in debt. The percentage varied from \$7 in Punjab to more than 75 in Calcutta. Causes of indebtedness were generally marriages or sick ess in the family. Loans were taken mostly from General Provident Fund and Cooperative Credit Societies. The average amount spent towards payment of interest and repayment of loans varied from 2.0 per cent of the monthly income in Delhi to 7.4 per cent. in C. P. & C. I.
- 9. All the budget returns have been closely preserved and these will be available for further analysis, as and when required, subject to the paramount consideration of secrecy of individual returns.
- 10. Almost the entire work of analysing the budgets collected was carried out by Mr. N. C. Chaudhuri, Statistical Research Officer, in charge of the Enquiry, in co-operation with Mr. K. P. Biswas, Statistical Superintendent.

### A comparative study of family income and expenditure in the different regions.

#### COMPOSITION OF FAMILY.

House-holds selected for study comprise natural as well as joint families. A natural family is a self-contained unit consisting of husband, (head of the family), wife and minor children as well as unmarried grown-up sons and daughters. A joint family on the other hand denotes a group of relatives living together as one house-hold. It is found that in all regions except Bengal and Assam, natural families form a higher proportion of the total number than joint house-holds, the proportion being the highest at about 80 per cent. in the case of Delhi.

The size of the average family is smallest in Bombay city with 5·3 persons, and this is closely followed by Bombay Province with 5·7 persons. Bihar and Orissa show the largest average size at 7·4 persons (Vide Table VII on page 16 infra). If, on the other hand, the modul size of the family be considered, it is found that Bengal and Assam, and the Punjab take the lead while Bombay city brings up the rear (Vide Table IX, page 17.)

It should also be remembered that in every case there are a number of dependents who live away from the family but to whom remittances are made every month. Their number ranges from 0.3 in Madras city to 1.4 in U.P. on an average.

#### EARNERS IN THE FAMILY.

The average number of earners in the family ranges from 1·1 in C. P. (including Central India) to 1·4 in the Punjab region. The average number of dependents per family earner varies from 4·5 in Bombay city to 6·7 in Bihar and Orissa. Bengal and Assum come next to Bihar and Orissa, every earner in the former regions having to support 6·1 persons in addition to himself. These arithmetical numbers do not, however, take into account the age and sex of the dependents and cannot, therefore, measure the true extent of the economic positions of the families in the various income categories. In order that families of different size and sex composition might be brought into correct comparison with one another as regards their standards of living it is necessary that the data should be measured in terms of a common unit. The sizes are usually reduced to consumption units in terms of equivalent male adults according to a standard scale. Three different scales have been employed in similar studies in India, namely, the Lusk scale, the League of Nations scale and the one utilised by Dr. Aykroyd in his South Indian Studies. Although two of the latter go into considerable detail, close scrutiny would reveal that all the three scales yield more or less identical results. In the present analysis the following ratios have been assumed:—

Adult male (15 years or over)	• •	• •	• •	• •	• •	• •	1.0
Adult female (15 years or over)	• •	• •	• •	• •	• •	• •	0.8
Children below 15 years ••	• •	• •	• •	• •	• •	• •	0.6

These coefficients have been constructed on the basis of calory requirements and their application should, strictly speaking, be limited to the food group. For purposes of comparison however rough it may be, similar calculations have also been made with regard to other groups of items and tabulated at p. 20 of the Report.

### MONTHLY INCOME.

The average monthly income of the family consists of the salary and allowances of the head of the family and other members, and, in addition, income from other sources such as land, investments, contributions from relatives and so on. Receipts from borrowings have not always been shown in the budgets although it has been stated in the relevant context that the deficits have been met from loans or other sources. Subject to this reservation, the average income per family varies from Rs. 159-6 in the Province of Madras to Rs. 286-1 in Delhi. The greatest single source of income is generally the earning of the head of the family, including pay and allowances, which accounts for 82 per cent. of the family income in the case of Bengal and Assam and the Punjab, and between 86 and 92 per cent. in other territories. The contribution from other earners of the family varies from 1.7 per cent. in Bombay Province to 6 per cent. in the case of the Punjab Block. Income from other sources varies from Rs. 7-11 or 3 per cent. in Bombay city to Rs. 31-0 or 16 per cent. in Bengal and Assam closely followed by Rs. 26-12 per month or 11 per cent. in the case of the Punjab (Vide Table X at page 17).

#### EXPENDITURE.

The schedule (Vide Annexure I at page 33) includes a variety of items which can be broadly classified into two categories namely, (1) periodic and (2) non-periodic expenditure. Periodic expenditure is that part of the total which is attributable to current living and represents the normal monthly expenditure of the family including expenditure on clothing reduced to a monthly basis. The non-periodic expenditure comprises items like marriage, serious illness, litigation, investment on land or building. It is true that the latter items constitute a normal feature of the social life and are incurred by every family some time or other but it is also true that they are of an exceptional character and involve heavy amounts which are quite out of proportion with day to day expenditure. They have thus been shown separately particularly with a view to preserving a correct picture of normal life.

Even so, reference to Table XI at page 18 would reveal that deficit budgets are generally in excess of surplus budgets. In Bombay and Madras Provinces the number of surplus budgets is only a quarter of those showing a deficit while the ratio of deficit to surplus budgets is more than 5 to 1 in Madras city. U.P., the C.P., the Punjab, Bihar and Orissa are even worse showing the ratio between deficit and surplus budgets at nearly 6 or 7 to 1. The position of Delhi seems somewhat better with surplus budgets accounting for 2 in 5 of the total number.

### GAP BETWEEN INCOME AND EXPENDITURE.

Two points deserve examination in this context. Those are (1) income and expenditure per consumption unit, (2) income and expenditure per family earner and the relevant figures are brought together in table below:—

	Income per o.u. (1)	Expenditure per c.u. (2)	Ratio of (2) to (1)	Income per family carner	Expenditur- per family earner.	of c.u's*
Bombay city	Rs. As. 61 12	Rs. As. 71-11	l·16	Rs. As. 208-14	R (, A ), 239 8	3· <b>3</b>
Bombay Province	41 12	47 11	1 · 14	164 2	187 5	4.0
Madras city	33 6	39 12	1 · 19	146 0	177 6	4.4
Madras Province	34 10	40 2	1.16	136 3	157 14	4.0
Calcutta	41 1	49 5	1.20	186 14	224 10	4.6
Bengal Province & Assam	37 7	45 2	1.21	180 4	217 8	4.8
Bihar and Orissa	33 1	41 2	1.21	170 0	209 13	5.0
United Provinces	36 0	44 8	1.23	147 4	181 13	4-1
Punjab Block	47 14	58 5	1 · 22	168 12	205 11	3.5
Central Provinces	38 1	45 14	1 · 21	174 10	210 7	4.6
Delhi	60-10	64 2	1.05	244 8	257 11	4.0

\*c.u. means consumption unit.

It would appear from the above figures that income and expenditure are in disequilibrium every where whether these be averaged over consumption units or earners, particularly in areas at the very bottom of the scale viz. Bihar and Orissa and Madras, city and Province. The deficit varies from Rs. 15-7 per family or Rs. 3-8 per consumption unit in the case of Delhi to Rs. 51-5 per family or Rs. 10-7 per consumption unit in the Punjab block and Rs. 10-2 per consumption unit in Bombay city (Vide Tables—XII and XIII on page 18-19 of the Report). It should be added in this connection that in all cases, expenditure includes insurance premia and contributions to provident funds which should, strictly speaking, be recorded as savings. Deficits have been met in many instances from previous savings made during the good times before the War or from temporary loans from relatives and friends.

Proportions of monthly expenditure per family in the various regions by principal groups of items are shown in Table XIV at page 19 while absolute magnitudes are brought together in Tables XV—XVII at page 20-21. It will be seen from the former that percentage expenditure on food varies from 38.0 in the case of Delhi to 41.6 in Bengal and Assam, while the miscellaneous group ranges from 31.8 in Madras city to 40.5 in Bihar and Orissa. Percentage expenditure on fuel and lighting varies from 3.8 in Calcutta and Bihar and Orissa to 5.9 in Bombay Province. Clothing accounts for 7.6 per cent. in Bengal and Assam to 11.1 per cent. in Madras city, other territories falling between the two limits. Expenditure on furniture and house-hold requisites is the lowest at 1.5 per cent. in Bombay city and highest at 2.6 per cent. in Delhi. The United Provinces show the lowest percentage figure of 6.2 on house rent while in Calcutta the latter accounts for as much as 10.3 per cent. of total expenditure.

#### FOOD EXPENDITURE.

The food group has been divided into seven sub-groups viz. (1) Cereals, (2) Pulses; (3) Milk and fats; (4) Fruits and vegetables; (5) Animal food; (6) Condiments and spices and (7) Miscellaneous (tea, coffee, sugar, sweetmeats etc.). Expenditure on all items of food are regular in nature. Individuals were requested to give both cost and quantity figures with grades of the items of consumption. Quantity figures were not available in the cases of certain items but they have been shown wherever available.

Government of India have provided for the relief of their employees by granting war or dearness allowances in the form of each and concessions in certain articles of food. These concessions not only vary from place to place but vary amongst the Government servants in the same place, the Reilway employees enjoying greater measure of concessions not only in price but also in kind. The same Railway Company has provided for different concessions in different places. These concessions apply to Railway employees whose pay is upto Rs. 400/- per month and other Government employees whose pay is upto Rs. 300/- per month.

To evaluate the margin of concessions is a complicated task. Nevertheless an attempt has been made to estimate the value of concession received by the Central Government employees. A detailed account of this will be found in the relevant places of the Report.

The average monthly expenditure on food varies from Rs. 75-1 per family in Madras Province to Rs. 117-9 per family in Punjab. The expenditure on food in Madras city, U. P., Bombay Province and C. P. varies within the range Rs. 80-85 and in Delhi, Bombay city and Punjab the expenditure ranges within the limit Rs. 114 to 117 while an average Calcutta family spends about Rs. 108 per month on food. Eliminating the effect of the varying size and composition of the family we notice that the highest expenditure on food is Rs. 28-1 per consumption unit in Bombay city and the lowest expenditure is Rs. 15-15 per consumption unit in Bilar & Orissa, Panjab block, Delhi and Bombay cities fall in the range Rs. 24—28 while the expenditure per consumption unit in the remaining places varies from Rs. 16 in Madras city to Rs. 19 in Calcutta, (Table – XV –XVI, page 20).

The total expenditure on food is influenced greatly by the expenditure on milk and fats, and cereals and fruits and vegetables. As we go to the higher income levels, the expenditure mainly on milk and fat shows an upward trend and the average is greatly influenced by this fact. The lewest expenditure in Madras province on food is due to the existence of a smaller number of families in the higher income groups. It will be seen from the table that the proportions of expenditure on milk and fats are the highest and these are followed by cereals, and fruits and vegetables. These three groups account for about 70 per cent. of the total food expenditure in all regions, (Table XXI, page 23).

Cereals including bread.—The proportion of the total food expenditure accounted for by this group of food stuffs ranges from 15.6 in Bombay city to 23.7 per cent. in Bengal and Assam (excluding Calcutta). Bombay city, Punjab etc., Delhi, Bombay Province (excluding Bombay city) and Madras Province fall in the range between 16 and 20 per cent. while Madras city, B. & O., C.P. & C.I., U.P., Calcutta and Bengal & Assam fall in the range between 22 and 24 per cent. Rice, wheat and wheat flour represent the bulk of the expenditure in this group (Table—XXI, page 23).

Monthly expenditure on cereals varies from Rs. 14-0 per family or Rs. 3-3 per consumption unit in Madras Province (excluding city) to Rs. 25-0 per family or Rs. 4-7 per consumption unit in Calcutta. The monthly expenditure per consumption unit is more than Rs. 4 but less than Rs. 5 in Calcutta, Bengal and Assam, Bombay city and Delhi and more than Rs. 3 but less than Rs. 4 in the remaining places under review (Table—XIX, & XX, page 23). It is thus seen that the expenditure on cereals does not vary widely from place to place.

Pulses.—The proportion of total food expenditure given on this item varies from 3.7 per cent. in Bengal and Assam to 7 per cent. in U.P. and C.P. and C.I. while in B. & O. it is a little less than 7 per cent. Bengal and Assam, Bombay city, Punjab, Delhi, Calcutta and Madras Province fall in the range between 4 and 5 per cent. while other places vary between 6 and 7 per cent. (Table XXI page 23).

The monthly expenditure on pulses varies from Rs. 3-11 per family or Rs. 0-11 per consumption unit in Bengal and Assam to Rs. 6-4 per family or Rs. 1-1 per consumption unit in B. & O. The monthly expenditure per consumption unit is the highest being Rs. 1-3 in the case of U.P., Bombay city and C.P. (Tables—XIX & XX page 23). The monthly expenditure per consumption unit varies between -/11/- and -/15/- in Bengal and Assam, Calcutta, Madras city, Madras Province and between Re. 1 and Rs. 1-3 in Punjab, Delhi, Bombay Province, B. & O., Bombay city, U.P and C.P. The variation of expenditure from place to place is not significant in this case as well.

Milk and fats.—The proportion expended on milk and fats ranges from 23.9 of the total food expenditure in Calcutta to 42.0 per cent. in Punjab, Sind and N.-W.F.P. United Provinces, C.P. and Bombay city fall in the range between 35 and 37 per cent. while Bombay Province, Delhi, Madras city, Madras Province (excluding city) and Punjab fall in the range between 40 and 42 per cent. In Calcutta, Bengal and B. & O., the proportions are fairly low—about 24 per cent. in Calcutta, 28 per cent. in Bengal and 30 per cent. in B. & O. (Table—XXI—page 23).

The monthly expenditure on milk and fats varies from Rs. 25-13 per family or Rs. 4-10 per consumption unit in Calcutta to Rs. 49-6 per family or Rs. 10-1 per consumption unit in Punjab (Tables XIX and XX—page 23). The highest monthly expenditure on milk and fats per consumption unit is claimed by Bombay city (Rs. 10-8) followed successively by Punjab (Rs. 10-1), Delhi (Rs. 9-13), Bombay Province (Rs. 7-8) and Madras Province (Rs. 6-13), and the rest lie in the range between Rs. 5 and Rs. 6.

A wide range of variation in expenditure is noticeable here. Though proportionate expenditure and cost of consumption indicate roughly the importance each area attaches to this protective food, yet they are not a full test of the value of the diets. The actual quantities consumed in relation to the number of c.u's have also to be examined in detail; such an appraisal is attempted on the following pages (pp. 6 & 7 infra).

Fruits and vegetables.—A second group of protective foods is made up of vegetables and fruits. Here again proportions vary considerably, though within a smaller range than in the case of the group of milk and fats. It is interesting to note that Calcutta and Bengal with the lowest percentages spent on milk and fats have the highest percentage in the vegetables and fruits groups while Madras Province and Madras city with very high percentages in milk and fats have the lowest percentages in vegetables and fruits.

The proportion spent on fruits and vegetables ranges from 11.8 per cent. of the food expenditure in Madras Province (excluding city) to 18.9 per cent. in Calcutta. Madras Province, Madras city, Bombay Province and C.P. fall in the range between 12 and 14 per cent. and the remaining places under review between 15 and 18 per cent. Of the 19 per cent. of the total food expenditure spent on this group in Calcutta, only 2.4 per cent. is spent on fruits. High proportions spent on fruits are 4.8 per cent. each in Bombay city and Delhi and 5.2 in the Punjab, Sind and N.-W.F.P. block (Table—XXI—page 23).

The monthly expenditure on fruits and vegetables varies from Rs. 8-8 per family or Rs. 1-13 per consumption unit in Madras Province to Rs. 20-7 per family or Rs. 3-11 per consumption unit in Calcutta. The monthly expenditure per consumption unit is Rs. 1-15 in Madras city and is the highest in the case of Bombay city (Rs. 4-8) closely followed by Delhi (Rs. 4-4) (Tables —XIX & XX —page 23).

Condiments and spices.—This is a comparatively minor item. The proportion spent on this item is small and varies from 2.6 per cent. in Punjab and Delhi to 6.6 per cent. in Madras Province followed by Madras city (5.7 per cent.) and C.P. and C.I. (5.5 per cent.). B. & O., U.P., Calcutta, Bengal, Bombay city and Bombay Province (excluding city) fall in the range between 3 and 5 per cent. (Table—XXI—page 23).

The monthly expenditure varies from Rs. 2-12 per family or Re. 0-9 per consumption unit in U.P. to Rs. 4-15 per family or Rs. 1-3 per consumption unit in Bombay city. The monthly expenditure per consumption unit is the lowest in B. & O. (Re. 0-8) (Tables -XIX & XX—page 23).

Animal food.—This group includes meat, fish, eggs etc. The percentage expenditure for this group varies from 4.0 in Madras Province (excluding city) to 15.3 in Bengal and Assam excluding Calcutta. Madras Province, C.P. and C.I., Bombay Province, and Madras city fall in the range between 4 and 5 per cent. Delhi, U.P., Punjab and Bombay city fall in the range between 6 and 8½ per cent. Areas with high proportions include B. & O. (11.3 per cent.), Calcutta (14.9 per cent.) and Bengal and Assam (excluding Calcutta) (15.3 per cent.) (Table—XXI—page 23).

The monthly expenditure varies from Rs. 3-0 per family or 10 As. per consumption unit in Madras Province (excluding city) to Rs. 15-15 per family or Rs. 2-14 per consumption unit in Calcutta and Bengal & Assam. Other places with high cost of consumption per consumption unit are Bombay city (Rs. 2-6), Punjab (Rs. 2-1) and B. & O. (Rs. 1-13) (Tables—XIX and XX page 23).

Miscellaneous food.—This group includes tea, coffee, sugar, gur, biscuits etc. and also food consumed away from home. The percentage expended varies from 9.7 in Madras city and Bengal & Assam to 14.0 in Bombay city (Table -XXI—page 23).

The monthly expenditure varies from Rs. 7-14 per family or Rs. 1-9 per consumption unit in Madras city to Rs. 15-12 per family or Rs. 3 14 per consumption unit in Bombay city. It is interesting to note that the monthly expenditure per family varies within very narrow limits viz. Rs. 9-10 to Rs. 9-14 in C.P. & C.I., B. & O., Bengal & Assam, U.P., and Madras Province (Tables—XIX & XX—page 23). Considering the monthly expenditure per consumption unit, it is seen that Madras city, B. & O., Bengal & Assam and C.P. lie within a very narrow limit viz. Rs. 1-9 and Rs. 1-15. Similarly U.P., Madras Province, Calcutta, Bombay Province and Punjab fall in the narrow range of Rs. 2-1 to Rs. 2-12. Next to Bombay city, Delhi has the highest cost of consumption for miscellaneous articles viz. Rs. 3-2 per consumption unit.

### VARIATION IN CONSUMPTION.

of even greater interest than proportionate expenditures are data showing the actual quantities consumed. Comparison of the quantities of different food-stuffs consumed in different places must be made in terms of the same standard. The use of the family as a unit has the obvious disadvantage that the size and composition of families vary and the comparison of quantities consumed per family does not show the true relative position in all cases. Only if the families in the budget enquiries were limited to a particular size and composition—for example, families of husband, wife and three children under 15 years of age, would it be possible to make useful comparisons of quantities consumed per family. However, enquiries are in general not limited to a single family type, and few studies have a large enough volume of data relating to families of a particular size or composition to permit valuable comparisons of average family consumption. A second possible basis is per head. This avoids differences in the number of persons in the family but ignores difference in sex and age composition. An adult male in other words is counted as equal to the baby in arms in relation to food consumption. In these circumstances recourse is usually had to the device of the consumption unit as explained before. Quantities are then expressed in terms of the same basic unit of consumption.

Units.—The quantities of consumption have been expressed in terms of seers §generally and lbs. in the case of a few items of consumption for the purpose of comparison. (Table—XXIII—page 25) shows

quantities consumed per family. Quantities consumed per equivalent adult male have been shown in (table XXII—page 24). As has been mentioned elsewhere quantity figures for some items particularly fruits and vegetables (except potatoes and onions) are not available. Even for items mentioned in the table, in some cases quantity figures though insignificant, have not been stated. All available information regarding consumption figures has however been incorporated in the tables.

#### Cereals.-

Rice.—Madras and Bengal are the chief consumers of rice. Highest consumption is 12.95 seers per consumption unit per month in Madras Province (excluding city) followed by Madras city with 11.53 seers per consumption unit. Bengal consumption is about 10½ seers per consumption unit. The lowest consumption is in the Punjab, Sind and N.-W. F. P. block and is 3 seers per consumption unit. Other important consumers of rice are Bombay city (7.22 seers), B. & O. (6.36 seers) and Bombay Province (5.06 seers).

Wheat flour, and other wheat products.—The consumption of wheat is the greatest in Punjab (10·29 seers per consumption unit) followed by Delhi (9·37 seers per consumption unit). Other important consumers are C.P. (7·94 seers per c.u.) and U.P. (7·81 seers per c.u.). Wheat is eaten very sparingly in Madras and Bengal—Madras Province (1·31 seers), Madras city (1·36 seers), Bengal Province (2·53 seers) and Calcutta (3·34 seers).

Wheat and rice are shared almost equally in Bombay and B. & O. It is interesting to note that rice appears to be more popular than wheat in all provinces and this may be, to a great extent, due to the presence of 'Madrasi' and 'Bengali 'Central Government employees in all places. Consumption figures of bread which are negligible in all places are not specified except in Calcutta (·15 lb.) and Bengal & Assam (·32 lbs).

Other cereals.—These are barley, jowar, bajra, maize etc. Consumption figures for them are negligible. They are popular, to some extent, in U. P. (1.52 seers per c.u. per month) and B. & O. (1.12 seers per c.u. per month).

Total cereals.—The total monthly consumption of cereals varies from 12.05 seers per consumption unit in Bombay Province to 14.26 seers per c.u. in Madras Province, which is closely followed by Delhi, U. P. and Bengal & Assam (14.02 seers per c.u.). Consumption is at about 12 seers in Bombay Province, about 13 seers in Bombay city Madras city, Punjab and C.P. and about 14 seers in Madras Province, Calcutta, Bengal, B. & O., U. P. and Delhi.

Pulses.—The consumption of pulses, varies from 1.72 seers per consumption unit in Bengal & Assam to 4.10 seers per c.u. in U. P. Other places with high consumption of pulses are Bombay province (3.44 seers per c.u.) and C. P. and C. I. (3.30 seers per c.u.) Bengal & Assam show a low consumption of pulses, followed by Calcutta city with 1.85 seers.

Milk and fats.—This group is of special importance from the point of view of dietic value in asmuch as milk and milk products contain the principal protective foods.

Milk.—The highest monthly consumption of milk is 10·24 seers per consumption unit in Bombay city. This is perhaps due to the availability of milk at concessional rates there. Other places with high consumption figures are Delhi (9·86 seers per c.u.) Bombay Province (8·68 seers per c.u.), Punjab (8·50 seers per c.u.) Madras Province (7·31 seers per c.u.) and C. P. (7·28 seers per c.u.). The consumption of milk is the poorest in Calcutta (4·67 seers per consumption unit).

Curd.—The consumption of curd is the highest in Madras—Madras city (1.70 seers per c.u.) and Madras Province (1.96 seers per c.u.) and lowest in Calcutta (0.14 seer per c.u.)

Butter.—The monthly consumption of butter is the poorest in B. & O. (·04 lb. per c. u.) and the position of Bengal is no better. Here again Bombay city leads with ·60 lb. per c. u.

Ghee.—Bengal's position in the consumption of ghee also is low, Calcutta (•22 seers per c.u.) and Bengal & Assam (•26 seer per c.u.) Bombay city which is the leading consumer of milk and butter has about the lowest consumption of ghee (•26 seer per c. u.)

Vanaspati.— The monthly consumption of vanaspati varies from 0.04 seer per c.u. in Madras city to .40 seer per c.u. in Bombay city. Other places next to Bombay city are Punjab (.39 seer per c.u.) and Delhi (.30 seer per c.u.).

Oils.—Most common edible oils are gingelly and mustard. The former is taken generally in Bombay Madras and C. P. and the latter in Bengal, U. P. and B. & O. The Punjab block takes little of oils but its preference appears to be for mustard oil (·31 seer per c.u.). Cocoanut oil is also taken to some extent in Madras. The monthly consumption of oils varies from 0·31 seers per c.u. in the Punjab, Sind, and N.-W. F. P. block to 1·58 seers per c.u. in Madras Province.

Fruits and vegetables.—Consumption figures are not available for fruits and vegetables, except potatoes and onions. As regards potatoes, their monthly consumption varies from 0.61 seers per c.u. in Madras to 2.46 seers per c.u. in Calcutta. Other places where per-unit consumption is between 2 and 2½ seers are Bengal & Assam (excluding Calcutta), B. & O., U. P. and Delhi. The monthly consumption of onions ranges from 0.41 seer per c.u. in Calcutta to 1.30 seers per c.u. in Bombay Province (excluding Bombay city).

Condiments and spices.—In this group the consumption figures for salt only are available. The monthly consumption of salt varies from 0.49 seers per c.u. in Punjab, Sind and N.-W. F. P. to 0.93 seers per c.u. in Madras Province (excluding Madras city).

Meat, fish and eggs.—Information in respect of consumption is not available in the case of Bombay city, Bombay Province, Madras city and Madras Province. Bengal occupies, undoubtedly, the most important position in the consumption of these items. In the consumption of meat Panjab, Sind and N.W.F.P. rank first with 0.91 seer per c.u. The lowest consumption is in C.P. & C. I. (.16 seer per c.u.) Fish consumption is the highest in Calcutta (1.40 seers per c.u.) followed by Bengal & Assam excluding Calcutta (1.26 seers per c.u.) and is the lowest in Panjab, Sind and N.-W.F.P. (.24 seer per c.u.) Consumption figures for eggs, another principal protective food included in this group are available for only four regions viz. Calcutta Bengal & Assam, Panjab and Delhi. In the former three places the monthly consumption is between 2 to 3 eggs per c.u. and in Delhi only one and a quarter egg per c.u. From the value figures also it is seen that in no place does the monthly consumption exceed 3 eggs per c.u.

Miscellaneous food group.—Consumption figures for tea, coffee, sugar refined, raw sugar and gur are available.

Tea.—The monthly consumption of tea varies from •13 lb. per c.u. in Madras city to •45 lb. in Bombay Province. Bombay city consumes •41 lb. per c.u. Other important consumers are Bengal & Assam (•30 lb. per c.u.) and Calcutta (•27 lb. per c.u.) and Punjab (•23 lb. per c.u.)

Coffee.—The consumption of coffee is the highest in Madras Province (.50 lb. per c.u.) and Madras city (.44 lb.). The consumption of coffee is shown to be nil in Calcutta, Bengal, B. & O., U. P. and Punjab. In fact from the value figure it will be apparent that the consumption of coffee is insignificant in other areas.

Sugar, gur etc.— The consumption of sugar, gur etc. may be considered to be equally distributed among adults and children. Quantity figures here have, therefore, been shown as per capita. The monthly consumption of sugar per capita varies from ·60 seer in Madras city to 1·12 seers in Delhi. Places with high consumption figures are U. P. (1·07 seers per capita), Bombay (0·93 seer per capita) and Punjab (·94 seer per capita). Other low consumers are Bengal (·72 seer per capita). B. & O. (·72 seer per capita) and Calcutta (·73 seer per capita). Sugar has been supplemented by gur and raw sugar in all places under review. The consumption of raw sugar and gur is the highest in C. P. (·73 seer) and the lowest in Bombay city (·35 seer.)

#### ESTIMATE OF THE MONEY VALUE OF CONCESSIONS.

An attempt has been made to estimate the money-value of concessions received by the employees. Government employees (other than Railway and P. & T. employees) drawing pay up to Rs. 300 per month are allowed to buy certain food articles at a reduced rate, such as, rice, wheat etc. For Railway employees, the limit of pay is raised up to Rs. 400 per month. Moreover, Railway employees get quite a number of items at a much reduced rate. Items cover, in addition to rice and wheat—mustard oil, ghee, pulses, potatoes, onion, tea, sugar, salt, chillies, washing soap etc. Postal and Telegraph employees occupy a position intermediate between the above two categories.

The average amount of concessions per family of a particular income group in a particular locality has been arrived at by deducting the actual value of food articles consumed by the family from the value that would otherwise have been payable if the quantity consumed was bought in the open market i.e. what others not receiving such concessions would have to pay in that particular locality. Consideration of items such as, salt and chillies in the food group and washing soap in the miscellaneous group could not be taken up as the consumption figures could not even be estimated for want of reliable data.

The estimate made here cannot be said to present a complete picture, for, in many cases the quantity of food articles purchased at concessional rates has not been mentioned nor their quality indicated. In cases like these, quantity has been estimated on the basis of consumption by members of the family concerned. As to quality, the medium quality of the item concerned has been taken.

It may be noted that milk has been included in the statement relating to concessions. Though milk is not generally an item of concession, yet citizens of Bombay and employees of the Indian Agricultural Research Institute in Delhi get milk at concessional rates. In Bombay city, concessional rate of six annas a seer is allowed to those families who have children below a particular age. Research Institute employees get milk at four annas a seer from the Institute's Dairy.

The amount of concession enjoyed shows the extent to which the expenditure on food and consequently the total expenditure should actually rise. This amount should be taken as 'other income 'and the monthly income should be regarded as the total of monthly income already shown plus this amount of concession received. This aspect will be considered separately for each area in the appropriate context.

A table showing the money value of concessions by cities and other areas is given below :-

77	^ 1			r ·1
- Kstimate o	t maneu nalue a	f concession received	l ner month	ner tamilii.
AZ GOVIII COLOC ()	I HOUTEG DEVICE	our contract of the contract	por monom	por jamorij.

Itoms.	Madra oity	8	Mada Providex clud Mada cit	nce ling ras	Bom oit		Bomb Provide Somb	nce ling a <b>y</b>	Calcu	tta	Benga & Ass exclud Calout	sam .ing	Biha Oriss		Uni Provi		О, Р С, 1	. & I.	$\mathbf{D}_{\mathbf{e}}$	lbi		njab tc.

eto. (including vanaspati).	2	6	1	11	1	1	0	8	1	3	2	2	0	11	0	12	0	15			0	11
Potatoes	0	1			0	1	ļ		1	7	2	1	0	7			0	4			0	3
Onion	••		o	1 2	0	4	o	4	0	1	0	3	0	2			0	11				
Tea etc	0	1	o	7	0	8			0	4	0	4	••				0	6	•		0	7
Sugar	0	3			o	6			0	2	0	2	0	2	0	6			0	1	•	•
Total	10	4	10	8	22	6	6	13	10	0	15	8	12	3	14	3	10	2	7	15	8	1

It will be seen from the table that Central Government employees in the city of Bombay were in receipt of the maximum benefit i.e. Rs. 22-6 per month. Second best is Bengal & Assam excluding Calcutta—which got Rs. 15-8 per month. The minimum concession per month fell to the lot of Bombay Province other than Bombay city and amounted to Rs. 6-13 only. It may be noticed that the major portion of Bombay city's monthly concession per family was derived from concession on milk, which was a special feature of Bombay city only. Concession on milk covered about 54 per cent. of the total concession received in Bombay city. Generally speaking, concession on cereals varies from 25 per cent. to 62 per cent. of the total concession received. Next item of importance is ghee followed by pulses and vegetable oils.

#### FUEL AND LIGHTING.

Important items of fuel are firewood, charcoal and soft coke and those of lighting are kerosene and electricity.

Firewood.—The proportion of fuel expenditure made on firewood is 10.6 per cent. in Calcutta, 18.0 per cent. in Bombay city, and 17.8 per cent. in Delhi. In other regions it varies between 30.8 per cent. (B. & O.) and 57.9 per cent. (U.P.) Firewood is supplemented largely by charcoal in Bombay Province (31.8 per cent.), Punjab (17.9 per cent.) and C.P. (21.0 per cent.), Madras city (35.3 per cent.) and Madras Province (20.1 per cent.) while it is supplemented by soft coke in Bengal and Assam, (18.8 per cent.) and in B. & O. (23.2 per cent).

Soft coke.—Expenditure is the largest in Calcutta (42.9 per cent.) while it is negligible in Madras city and Province.

Charcoal.—Charcoal is the chief item of expenditure in the fuel group in Bombay city (56.7 per cent.) supplemented largely by firewood, and in Delhi (38.2 per cent.) supplemented equally by firewood and soft coke.

Kerosene and electricity.—The proportion of expenditure on kerosene is the highest in B. & O. (16.5 per cent.) and the lowest in Delhi (1.8 per cent). Other high proportions are 14.9 per cent. in Bengal & Assam and 11.7 per cent. in U. P. One other region where the proportion is low is the Punjab (2.9 per cent). High proportions of expenditure spent on kerosene are generally attended with low proportions of expenditure on electricity and vice versa. The reason is where electricity is not readily available or is expensive keronsene is generally used largely for lighting purposes. Similarly where electricity is cheap and readily available kerosene is replaced by electricity as in Calcutta, Bombay city, Delhi etc.

Matches.—The proportion spent on matches varies from 2.3 per cent. in Bombay city and U. P. to 4.1 per cent. in Calcutta (Table—XXIV—page 25).

Expenditures on men's, women's, and children's, clothing have been separately shown. Expenditure on clothing occurs at irregular intervals. Current monthly expenditure on it will not, therefore, represent average monthly expenditure. The latter is usually estimated by taking into account the number of articles in actual use, the cost of each article when bought and the estimated number of months that each article is expected to last from the date of purchase. The average monthly expenditure on clothing is thus arrived at by dividing the total expenditure on each item by its estimated durability. Actual expenditure incurred by the families in the months for which budgets have been supplied has also been shown in the Table- (XXV--page 26) for the sake of comparison. The estimated average monthly expenditure on clothing varies from Rs. 18-3 per family in Bengal & Assam to Rs. 27-5 in Delhi. The Punjab, Sind and N.-W. F. P. block follows Delhi with Rs. 26-11 per family.

The monthly per capita expenditure on clothing is more for men than for women in all places except Punjab, Sind and N. W. F. P. Bengul and Calcutta where the reverse is the case. Per capita expenditure on men's clothing varies from Rs. 3-10 in Bengal & Assam to Rs. 6-14 in Delhi. Other high expenditures are Rs. 6-8 in Bombay, Rs. 5-15 in Punjab, Sind and N.-W. F. P. The per capita expenditure in Calcutta (Rs. 3-13) is slightly higher than in Bengal & Assam (excluding Calcutta). The per capita expenditure on women's clothing ranges from Rs. 3-4 in B. & O. to Rs. 6-2 in Punjab, Sind and N.-W. F. P. and that on children's clothing from Rs. 1-4 in Bengal & Assam to Rs. 2-7 in Bombay city. Other places with high per capita expenditure on women's clothing are Delhi (Rs. 5-10) and Bombay city (Rs. 5-8) and in the case of children's clothing, Bombay city (Rs. 2-7), Bombay Province (Rs. 2-5), Delhi (Rs. 2-3) and the Punjab block (Rs. 2-2). It is interesting to note that per capita expenditures for men, women, children in Bombay city is almost identical with those in Delhi city and is the highest. In regard to overall per capita expenditure the Punjab, Sind and N.-W.F.P. block (Rs. 4-2) closely follows Bombay city (Rs. 4-7) and Delhi (Rs. 4-6) while Calcutta, Madras City, Madras Province, and U. P. fall within the range Rs. 3-0 to Rs. 3-13. Per capita expenditure is relatively low in Bengal & Assam (Rs. 2-10) and B. & O. (Rs. 2-13) (Table—XXVI—page 26).

#### FURNITURE AND HOUSEHOLD REQUISITES.

Expenditure on furniture and house-hold requisites, like that on clothing occurs at irregular intervals and is, therefore, estimated as in the case of clothing. Besides furniture and rent of furniture, this group also includes renewals of bedding, crockery, cutlery, cooking utensils and other articles of necessity.

The monthly expenditure per family varies from Rs. 3-11 in Madras city to Rs. 7-14 in Delhi. The Punjab, Sind and N.-W. F. P. block comes next with an expenditure of Rs. 6-6 per month per family (Table – XXVII –page 26).

#### Housing.

Housing includes, rent, repairs, house-tax, ground tax and water supply. Expenditure on rent is represented by the sums paid for occupancy (or in the cases of families owning their own home or those occupying rent-free houses, the estimated rental value of the house inhabited by the family).

In the absence of the information regarding the rental value of the premises owned by or occupied rentfree by families, ten *per cent*. of their total income has been assumed to be the rental value of the premises. Monthly expenditure on housing as thus adjusted varies from Rs. 13-0 in the United Provinces to Rs. 28-10 in Calcutta. Other places with high expenditure on housing, after Calcutta, are Bombay city (Rs. 25-12) and Delhi (Rs. 22-8). The remaining regions vary between Rs. 13-9 and Rs. 18-14 (Table—XXIX—page 29).

The average monthly expenditure on housing per family paying rents varies from Rs. 10-10 in B. & O. to Rs. 27-10 in Calcutta, and is shown below for all places—Bombay city (Rs. 25-5), Bombay Province (Rs. 14-10), Madras city (Rs. 17-11), Madras Province (Rs. 11-12), Calcutta (Rs. 27-4), Bengal & Assam (Rs. 14-11), B. & O. (Rs. 10-10), U. P. (Rs. 14-14), Punjab, Sind and N.W.F.P. (Rs. 12-7) and Delhi (Rs. 22-2).

The average monthly expenditure on rents for all families is shown below:—

				Rs.	As.				Rs.	As.

Dalhi				19	9						

Table (XXVIII—page 27) will show the extent of over-crowding in the various places. It will be seen that the average number of rooms per family is 3 in Bombay Province, Madras city, Calcutta and C. P. & C. I. and between 2·3 to 2·9 in the rest of the places. The average number of persons per room varies from 1·9 in Bombay Province to 2·8 in Calcutta. Families in Madras city, U. P. and C.P. & C.I. have, on an average 2 persons to a room and those in Bombay city and B. & O. have 2·5 persons to a room.

This distribution however disregards the different requirements of young and old and of differently related persons. The former factor may be taken account of by expressing the number of persons in the family in terms of equivalent male adults. Though this conversion is open to objection, this will probably provide a better index of overcrowding. The average number of equivalent adult males to a room varies from 1.5 in U.P. and Bombay Province to 2.0 in Bengal & Assam and B. & O. It is apparent that the extent of overcrowding is the least in Bombay Province and U.P. followed by C.P. and Madras city and is the greatest in Bengal & Assam and Bihar & Orissa followed by Calcutta and Punjab.

#### MISCELLANOUS.

This comprises a mixed variety of items such as services, children's education, religious ceremonies, toilets, newspaper, entertainments, club subscription, postage, medical attendance holiday expenses, travelling to and from place of work, provident fund, life insurance, taxes, tobacco, pansupari etc. (Tables XXIX—XXX—pages 30-31).

Services.—This item includes wages of domestic servants and sweepers, barber and washerman's charges and charges for the up-keep of gardens but of these wages of servants and washerman's charges are the most important. The proportion of the total miscellaneous expenditure spent on servants varies from 3.5 per cent. in the Punjab, Sind and N.-W.F.P. block to 6.6 per cent. in Bombay Province. Bombay Province is closely followed by B. & O. (6.4 per cent.) U.P. (6.4 per cent.), Bengal & Assam (6.2 per cent.) and Bombay city (6.1 per cent). The proportion spent on 'washerman' varies from 2.8 per cent. in B. & O. to 5.5 per cent. in Punjab, Sind and N.-W.F.P. closely followed by Madras city (5.3 per cent). The amount spent on 'services' taken together ranges from Rs. 8-4 in Madras Province excluding Madras city to Rs. 13-15 in Bombay city.

Children's education.— Children's education is one of the most important items of expenditure in the miscellaneous group. The proportion spent on this varies from 8·3 per cent. in Bombay city to 14·2 per cent. in B. & O. Delhi, Punjab, Bengal & Assam, U.P., and C.P. fall in the range 13 to 14 per cent. Madras city, Madras Province and Calcutta spent a little over 11 per cent. of the total miscellaneous expenditure. The proportion spent in Bombay city (8·3 percent) and Bombay province (10 per cent.) is comparatively low.

Religious ceremonies.—The proportion spent on this item varies from 1.9 in Calcutta to 4.2 per cent. in Punjab. Bombay city, Bengal & Assam, U.P. and Delhi spent about 3.2 per cent. while all other places spent from 2.3 to 2.9 per cent.

Newspaper.—The proportion spent on this item varies from 1 to 2 per cent. being the highest in Bombay city and the lowest in C.P. & C.I.

Toilet and the other requisites.—This includes toilet soap, hair oil, mirror, comb, tooth powder or paste, tooth brush, washing soap and shaving requisites. Toilet requisites claim about 1.3 to 3.1 per cent. of the total expenditure on miscellaneous group. Bengal & Assam and Calcutta spent the highest proportion (3.1 per cent).

The proportion spent on washing soap is the highest in the Punjab, Sind and N.-W.F.P. block (2.8 per cent.) closely followed by Bombay Province (2.3 per cent.) and is the lowest in B. & O. In other places the proportion is more than 1 but less than 2 per cent. The proportion spent on other necessaries such as tooth powder or paste, tooth brush, shaving requisites etc. varies from .4 per cent. in B. & O. to 1.1 per cent. in Bombay Province.

Entertainments.—The percentage expenditure on this item is the highest in Bombay Province (2.4 per cent). In other places the proportion ranges between 1 per cent and 2 per cent.

Glub subscription.—The percentage expended on club subscription ranges from 0.4 per cent. in B. & O. and Calcutta to 1.2 per cent. in Bombay city.

Postage.—Postage claims the lowest proportion in B. & O. (0·3 per cent.) and the highest in Madras Province (1·4 per cent.). Other high proportions are 1·3 per cent. in the Punjab, 1·2 per cent. in Bombay Province and 1·0 in Delhi.

Medical attendance and medicines.—This includes average expenses incurred per month on medical fees and medicines for usual ailments and is an important item of expenditure. The average monthly expenditure per family varies from Rs. 4-14 in Madras city to Rs. 10-5 in Bombay city. The proportionate expenditure varies from 6-1 in Delhi to 9-2 per cent. in Bombay city.

Holiday expenses.—The proportion expended on this item is the highest in Delhi (5·1 per cent.). Other high proportions are 3·3 in Bombay city and 3·1 per cent. in Punjab. In other places it ranges from 1 to 2 per cent.

Travelling to and from place of work.—The proportion expended on this item is the highest in Madras city (5 per cent). Other places with high porportions are Bombay city (3.7 per cent) and Calcutta (3.0 per cent.). In the remaining regions the proportion varies from 1.1 in Bengal & Assam to 2.3 per cent. in U. P. and Delhi.

Maintenance of own conveyance.—The highest proportion spent on this item is 2.9 per cent. in C. P. followed by Punjab (2.5 per cent.) Delhi and U. P. spent 1.4 per cent. and 1.1 per cent. respectively of the total miscellaneous expenditure. In other places the proportion is less than 1 per cent.

Taxes.—This item consists mostly of income-tax. It will be found from the provincial tables that in the two lower income groups, there is no income-tax. Even in the income groups Rs. 150-200, the tax is very small. In the other income groups also the income tax deductions are apparently less than what they should be. This is due to the fact that the income of the family is composed of the basic salaries (with other emoluments) of the head of the family and other members of the family together with the income from other sources. While total family income appears to be liable to income tax assessment, individual salaries and emoluments and other incomes may not be liable to income-tax. The payment of taxes (income-tax etc.) ranges from 1.8 per cent. in Bengal & Assam to 5.1 per cent. in Delhi. Areas with high proportions include Calcutta (4.4 per cent.), Bombay city (4.3 per cent.), Punjab (4.3 per cent.) and Bombay Province (3.5 per cent.). Other places fall in the range between 2 and 3 per cent.

Provident fund.—Contribution to Provident fund which may be regarded as savings rather than expenditure claims generally the highest proportion of expenditure on miscellaneous group. Percentages vary from 10.4 in U.P. to 16.7 in Delhi, the latter being followed by Bombay Province (15.2).

Life insurance.—Payment of life insurance premium may also be regarded as savings. It claims about 6 to 9 per cent. of the total expenditure on 'miscellaneous'. Madras city spends the lowest proportion while B. & O. spends the highest.

Remittances to dependants.—In the case of middle class families of Government employees, the expenditure on this item is an important one. The proportion is the highest in B. & O. (9.8 per cent.) closely followed by Bengal & Assam (9.7 per cent.). It varies, so far as the other places are concerned, from 3.3 per cent. in Madras city to 5.7 per cent. in Bombay city, C. P. and Calcutta.

Pansupari.—All regions with the solitary exception of C. P. have shown expenditure under this item. U.P. has the highest expenditure under this head both in absolute amount and in relation to total expenditure on 'miscellaneous' viz. Rs. 2-9 per month or 3.2 per cent. while the lowest expenditure is incurred in Punjab viz. 0-8 as or 0.6 per cent. In the remaining places, the average monthly expenditure falls in the narrow range between Rs. 1-3 and Rs.1-13.

### All India

Cigarettes and tobacco.—Expenditure on this item varies from Rs. 1-1 per month in Madras Province to Rs 2-10 in C. P. In Madras city expenditure is fairly low, being only 9 annas per month. Places with high monthly expenditure are Bengal (Rs. 2-9) and Delhi (Rs. 2-6) and Calcutta Rs. 2. In other places the expenditure ranges between Re. 1 and Rs. 2 per month. In relation to total expenditure on 'miscellaneous', the proportion is the highest in C. P. (2.9 per cent.) and the lowest in Madras city (0.9 per cent.). Other high proportions are 2.7 per cent. in Bengal & Assam and 2 per cent. in U. P.

Debt disbursement.—From table (XXXI—page 31) it appears that the percentage of families involved in debt varies from 40 in Delhi to 76 per cent, in Calcutta. The proportion spent towards payment of it terest and repayment of loans varies from 2·0 of the average monthly income in Delhi to 7·4 per cent. in C. P. Considering only the indebted families the variation ranges from 5·1 in Delhi to 11·8 per cent. of the average monthly income in the United Provinces. Causes of indebtedness also are generally marriages, sickness in the family, ordinary wants etc. Loans are mostly taken from G. P. fund and Co-operative Credit Societies.

# ANNEXURE I. OFFICE OF THE ECONOMIC ADVISER TO THE GOVERNMENT OF INDIA

New Delhi, the

September 1945.

#### DEAR SIR,

You are perhaps already aware that the Government of India have, with a view to the construction of middle class cost of living index numbers, undertaken an enquiry into the income and expenditure of the families of their salaried employees. Howevermuch Government may like to contact everyone of their employees in this connection, they would be unable to do so owing to the magnitude of the numbers involved It was, therefore, decided that a sample of about five thousand names should be selected at random for the purpose. The selection has now been made and your name has been included in it. I should be greatly obliged, therefore, if you would kindly co-operate in the enquiry by furnishing the information required from you. I may add that this information will be kept absolutely confidential.

- 2. A printed schedule is enclosed. You are required to fill in the various columns of the schedule with the relevant figures for the month of November, 1945. The schedule is being sent to you a fortnight in advance so that you may have the time to make arrangements for maintaining a proper account of you income and expenditure during the month. Please keep the schedule carefully with you and at the end of November fill it up, if necessary, in consultation with your family. When the form is completed, kindly enclose it in the envelope sent herewith, put your full signature at the left hand corner of the envelope, and post it at the nearest post office. No postage stamps need be affixed.
- 3. In order to obtain a satisfactory picture of your annual budget, however, it is essential to have a similar statement once each quarter for a whole year. For this purpose an identical form will be sent to you in January, 1946, April, 1946, and July, 1946, which you may kindly fill up with details relating to the month of February, 1946, May 1946, and August 1946, respectively.
- 4. I do realise that all this means a lot of additional work for you but you will agree that this little effor on our part is really worthwhile for its own sake in view of the important information on living condition that the enquiry will provide. I would emphasise in addition that this enquiry has been undertaken primarily with a view to enabling Government to help their employees by providing adequate relief to them as an when necessary. The whole position has been explained to the representatives of the Imperial Secretaria Association and this letter and schedule issue with their approval.
- 5. The Government of India are aware that you may have to incur certain incidental expenses in connection with this work and they would, therefore, be willing to make a contribution of Rs. 5 towards thes expenses, if you so desire, on receipt of a complete set of 4 quarterly returns.

I hope you will find it possible to co-operate.

Yours sincerely,
T. E. GREGORY,

Economic Adviser

varded to the Officer-in-Charge, Middle Class Family Budget Enquiry, Office of the Economic Adviser to the Government of India, Secretariat, New Delhi.

Signature (Head of the Family)

Rs.

#### HINTS FOR COMPILATION OF FAMILY BUDGETS

It is found that there is a tendency to overstate expenditure. It is requested that the actual expenditure should be shown as overstated expenditure will be of no help to the Enquiry.

#### SCHEDULE

#### Description of family

- (1) Dependants living away from family should include only persons to whom remittances are made.
- (2) Boarders and lodgers mean paying guests etc. Contribution from paying guests should be shown under the head 'other income 'in the income statement at page 2 of the Schedule.

#### Head of the family

Whenever the individual is not the head of the joint family, he should fill in the schedule as far as possible with his individual income and expenditure in case an account for the joint family is not readily available In case of individual staying away from his family, he should supply his single man's budget.

#### II. INCOME

Salary should show the actual salary drawn without deducting G. P. F. contribution and Income-tax Income other than pay and allowances, such as from land, shares etc., should be shown in the last but on column.

#### Concessions

- (1) The items of concessions should simply be enumerated, viz., wheat, dal etc., and the price margin in concessions.
  - (2) Entries should be made as follows:--
    - (i) Staying in Government quarters at 10 per cent rent, or
    - (ii) Amount of house-rent allowance and conveyance allowances drawn, or
    - (iii) Staying in self-owned house.

#### III. Food

All payments made in respect of consumption and utilities during the month of February 1946 should be included even if some of such payments such as on consumption of milk, pay of servants and children's education etc., are made during the first week of March. The local unit should clearly be given against quantity consumed. But the cost column is the most important one.

Rationed areas.—All purchases made from the 1st to 30th of the month irrespective of the fact whether it is consumed in the same month or not.

Grade and quantity. Only whenever possible. However, there are no statistics in India regarding nutritive values of the middle class diets and hence quantity figures will be very useful.

Pickles. -- Only those purchased from outside and not those prepared at home be specified.

Tea, coffee and cocoa. -- Only the leaf or powder is meant and not the liquid.

#### Questions at page 6 of the schedule

Question No. 2.— Each occasion on which some substantial solid taken in should be included. Average composition of each meal is also essential.

Question No. 3.—Examples.—Reduction of milk and ghee consumption by adults in fairness to children, substitution of Ragi Malt in place of Glaxo.

#### IV. FUEL AND LIGHTING

Soft and hardwood should both be included. These are known as 'Kacha' and 'Pucca' lakri. Lamps and Chimneys.—Only new purchases during month are to be shown.

#### V. CLOTHING

Important.—There are no data at present available regarding the clothing habits of the people of India. Hence the columns of the statement should be filled in as far as possible, separately for cotton, woollen and silken cloths.

The actual expenditure on new purchases during the month of the budget should only be shown in the last column.

#### VI. FURNITURE

All the columns should be filled in, as far as possible. Any new purchases during the month of the budget should only be shown in the last column.

#### VII. MISCELLANEOUS

Cycles, Rudios etc.

Purchases made, hire charges and radio repair charges are to be shown.

TEDDIT	PART II.
(CALCUTTA, BO	ORIAL BLOCKS—CITIES.  OMBAY, MADRAS, AND DELHI)

#### CALCUTTA

Bengal & Assam constitute about 26 per cent. of the total sample selected, to which Calcutta's contribution is about 19 per cent. Altogether 943 persons were asked to submit budgets from Calcutta and in all 1054 effective budgets were received, comprising all-four and non-four budgets. A summary table showing a comparative study of all-four and non-four budgets taken separately for November 45, February 46, May 46 and August 46, is annexed to the Report (vide table 19, pp. 67-70). The table contains a detailed comparative analysis in respect of family composition, income, rent and items of expenditure under all groups, viz, food, fuel and lighting, clothing, furniture, housing and miscellaneous items. It is of interest to note that the result obtained from the analysis of 'non-fours' closely follows that obtained from the similar analysis of all-four budgets. The Report has, however, been based on the analysis of all-four budgets which number 664 in respect of Calcutta.

In order to test the adequacy of the sample studied the dispersion in the expenditure data has been worked out and is given below :—

			hen the wh		When the sample is divided at random into two equal parts.

#### DISTRIBUTION OF BUDGETS BY EXPENDITURE AND INCOME CLASSES.

The percentage of families by expenditure classes is given below:—

Expenditure classes	Below Re.	Rs. 100 to 125	Ra. 125 to 150	Rs. 150 to 175	Rs. 175 to 200	Rs. 200 to 225	Rs. 225 to 250	Rs. 250 to 275		Rs. 300 & above
Percentages	1.2	6.0	9.0	12.2	9.6	5.4	8-4	7.8	10.9	29.5

About 16 per cent. of the families spend less than Rs. 150 per month, about 22 per cent. between Rs. 150 and Rs. 200, 14 per cent. between Rs. 200 and Rs. 250, 19 per cent. between Rs. 250 and Rs. 300 and about 29 per cent. of them spend Rs. 300 or more. The quartile values of the expenditure in rapees are given below:—

 First quartile
 ...
 ...
 ...
 Rs. 168.0

 Median
 ...
 ...
 ...
 Rs. 244.6

 Third quartile
 ...
 ...
 Rs. 322.1

This means that 50 per cent. of the families spend in 10und number Rs. 245 or less, the upper 25 per cent. of the families have a monthly expenditure of about Rs. 322 or more and the lower 25 per cent. an expenditure of Rs. 168 · 0 or less; the central 50 per cent. incur an expenditure between Rs. 168 and Rs. 322.

The quartile values of the income in rupees are :-

 First quartile
 ...
 ...
 Rs. 134·3

 Median
 ...
 ...
 Rs. 206·3

 Third quartile
 ...
 ...
 Rs. 278·7

The percentage distribution of families by income groups is shown below :-

Income groups	Below Rs.	Rs. 100 to 125	Rs. 125 to 150	Rs. 150 to 175	Rs. 175 to 200	Rs. 200 to 225	Rs. 225 to 250	Rs. 250 to 275	Rs. 275 to 300	Ra. 300 & above.
Percentages	6.6	13.9	12.0	9-1	6.0	9-1	7.8	9-6	5.4	20-4

About 32 per cent. of the families earn less than Rs. 150, fifteen per cent. between Rs. 150-200, seventee per cent. between Rs. 200-250, fifteen per cent. between Rs. 250-300 and about 21 per cent. Rs. 300 or more

It is found that 34.4 per cent. of the families lie in the same expenditure and income classes, 57.8 per cent. in the expenditure classes above and 7.8 per cent. in expenditure classes below the corresponding income classes (vide Table 1—page 58).

#### Composition of the family.

It will be seen from (Table 2—page 58) that out of 166 families, 100 families i.e., 60·2 per cent. are natural families and 39·8 per cent. joint families. There is a tendency for families in the lower income groups to live as joint households. As we go higher up the scale, this tendency weakens and there is a gradual increase in the percentage of natural families. The explanation of this fact can lie in this that in a city-like Calcutta, persons in the lower income groups are not capable of running self-contained households and there is a tendency for 2 or more relatives to live tegether for economic reasons. In the higher income groups persons are economically better-off and can therefore afford to live as self-contained households.

The average number of persons living in the family is 7.24; 2.18 being males 2.05 females, 1.63 boys and 1.38 girls. The average number of persons living away from family is 0.59; .22 being males and .37 females who receive regular monthly remittances from the head of family. The size of the family inclusive of dependants living away from family is 7.83 (Table 3- page 58).

It will be seen from the table that the number of persons per family increases almost continuously from 4.40 persons in the lowest income group to 9.24 in the highest. This tendency of increasing number is more pronounced in the case of adults than in the case of children. Persons in the higher age groups in general draw more salary and also have more children. Widowed sisters, nephews etc. also depend on such persons who manage to give them shelter while it is beyond the means of those who draw less pay. The continuous increase in the number of adults is explained by the gradual addition from children who grow older and claim inclusion in the adult category. Other helpless relatives mentioned above also add to their number. Though there is likelihood of an increased number of children as the age of the head of the family advances, the transfer of children to the adult category reduces the number in children's category, resulting in the maintenance of almost constant number of children from the group Rs. 100-150 upwards.

Average number of earners per family, including the head of the family is 1.23 and non-earners including those living away from the family is 6.60 i.e., about 16 per cent. of the family members are earners, and 84 per cent. non earners of whom about 39 per cent. are boys and girls below fifteen years of age, about 30 and 15 per cent. are adult females and males respectively (Table 4--page 59). Among the adult non-earners are included school and college-going boys and girls. The number of earners varies from 1.0 in the lowest income group to 1.6 in the highest. There is however slight increase in the number of earners in the intermediate income groups. There are no female carners except in the income groups Rs. 200-250 and Rs. 250-300 in which their number is only 0.07 and 0.08 per family respectively.

Some idea of the pressure of dependants on earning members can be had from (Table 5—page 59)\*. The number of dependants per earner increases from 4.4 persons in the lowest income group to 6.7 persons in the income group Rs. 250-300. The highest income group Rs. 300 and above has 5.9 persons per earner.

#### MODAL SIZE OF FAMILY.

About 21 per cent. of the families consist of 4 to 5 consumption units. They constitute the modal group, the modal value being 4.49 c.u's. It is followed by the median value of 5.26 c.u's. (Table 7—page 59).

#### MONTHLY INCOME AND EXPENDITURE.

The average income of the head of the family from pay and allowances is Rs. 205-2 per month and from other sources such as land, investments etc. is Rs. 20-10 per month. The average earnings of other members of the family work out to Rs 4-2 per month. The total income of the family therefore averages Rs. 229-14 per month. The greatest single source of income is the earning of the head of the family accounting for 90 per cent. The contribution of the other members of the family towards earnings is very small being only about 2 per cent. Income from other sources such as land, investments etc. is also very small being little over 8 per cent. of which the income from lard alone accounts for about 2 per cent.

In all income groups pay and allowances of the head of the family vary from \$1 to 91 per cent.

The monthly income per family varies from Rs. 82-11 to Rs. 427-12 while the monthly expenditure per family shows a variation from Rs. 115-4 to Rs. 479-8. The monthly income per capita in the various income groups ranges from Rs. 18-12 to Rs. 46-5 while the monthly expenditure per capita varies from Rs. 26-1 to Rs. 51-14. The average monthly income per c.u. is Rs. 41-1 and the average monthly expenditure per c.u. is Rs. 49-5, deficit per c.u. being Rs. 8-4 per month. Among the income groups the deficits vary from Rs. 32-9 per family in the lowest group to Rs. 57-1 in the income group Rs. 250-300. Deficit per family in the highest income group is Rs. 51-12. (Tables 8 and 9-page 60).

<sup>\*</sup> It will be seen from the same table that the earner of an average family has to maintain 5.9 persons or 4.6 equivalent adults. Dependants per earner in the average family vary from 3.5 consumption units to 5.5 c.u's. The earner in the highest income group has to maintain the same number of equivalent adult males as that in the income group Rs. 100-150 viz., 4.4 consumption units.

The proportionate excess of expenditure over income of the family declines as one goes up the income groups while the number of earners increases somewhat (Table 10—page 60).

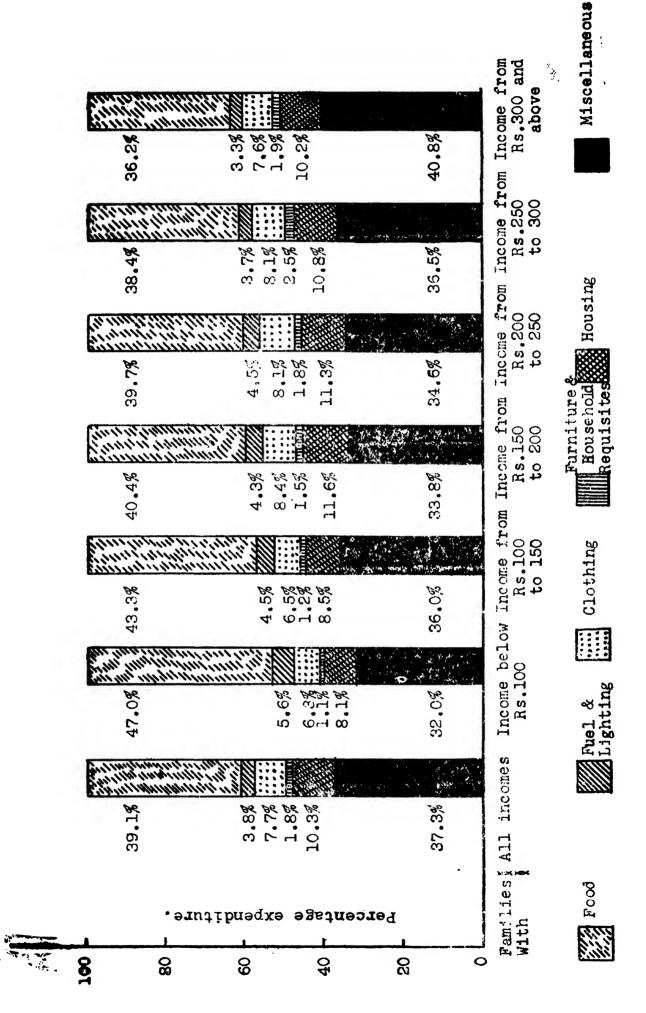

CHART. Expenditure by groups.

Calcutta

(Figures in brackets show percentages).

	Groups							Rs. 100 to 150	Rs. 150 to 200	Rs. 200 to 250	Rs. 250 to 300	Ra. 300 & above	All
Food	••	••	••	••	• •	••	Rs. As. 54 3 (47·0)	Rs. As. 71 7 (43·3)	Rs. As. 88-15 (40·4)	Rs. As. 105 5 (39·7)	Rs. As. 125 8 (38·4)	Rs. As. 173-13 (36·2)	Rs. As. 107 13 (39·1)

Housing	••	• •	• •	• •	••	••	9 4 (8.0)	14 12 (8·5)	25 1 (11·6)	30 2 (11·3)	35 8 (10·8)	48 11 (10·2)	28 10 (10·3)
Miscollaneous		••	••	••	••	••	36 14 (32·0)	60 2 (36·0)	74 14 (33·8)	91 12 (34·6)	119 6 (36·5)	195 10 (40·8)	102 13 (37·3)
					Total	••	115 4 (100)	166 12 (100)	220 5 (100)	265 1 (100)	327 1 (100)	479 8 (100)	276 <b>3</b> (100)

As between the groups average expenditure on food is the lighest being 39·1 per cent, of the total family expenditure and next comes miscellaneous irems with 37·3 per cent. The expenditure on food talls from 47·0 per cent, in the lowest income group to 36·2 per cent, in the highest and that on fuel and lighting from 5·6, to 3·3 per cent. Expenditure on elething first rises up to the third income group and then becomes almost steady over the following higher income groups. Expenditure on housing also rises from 8·0 to 11·6 per cent, with the increasing income and then talls to 10·2 per cent, in the highest income group. On the other hand, percentage expenditure on miscellaneous items, increases with income. Furniture and household requisites also show a steady rise from 1·1 to 2·5 per cent, with the increasing income except for a small set-back in the highest income group. The expenditure of the Calcutta middle class families thus fairly obeys. Engel's law which si ites that "as income increases the expenditures on different items of the budget have changing proportions and that the proportions devoted to the more urgent needs (such as food) decrease while those devoted to luxuries and semi-luxuries increase".

## Surplus and deficit budgets.

Budgets have been classified into surplus and deficit ones and their ratio to the total number of budgets has been shown in the following table. It will be seen that 77 per cent. of the total budgets show deficits and only about 23 per cent. show surplus, as will be seen from the table below:—

			In	come gro	սիս.				Total budgets	Surplus budgets	Deficit budgets	Percentage of (2) to (1)	Percent- tage of (3) to (1)
Below R .		• •	• •		• •	••	••		44	••	44		100

							Total	••	664	148	516	23	<del></del> 77

#### Non-regular expenditure

Three cases of marriage, two in the income group Rs. 150 to Rs. 200 involving an expenditure of Rs. 2,000 and 3,000 and one in the highest income group involving an expenditure of Rs. 5,200, have been reported. Under the head 'marriage' were also shown expenses of Rs. 70 and 100 in the income group Rs. 250-300 and of Rs. 200 in the highest income group. A case of Sradh involving an expenditure of Rs. 800 occurred in the highest but one income group. There are a number of cases of serious and prolonged illness in the reporting families, the expenses on which were not included under regular expenditure. Four cases of illness occurred in the income group Rs. 100--150; two involving an expenditure of Rs. 50 each and the other two Rs. 78 and 196 respectively. In the income group Rs. 150-200, expenses on two cases of illness had been Rs. 90 and 120 respectively. In the next higher income group three cases were reported and the expenditure was Rs. 72 in one case and Rs. 150 in each of the other two. In the income group Rs. 250-300, a case involving an expenditure of Rs. 649 was reported whereas in the highest income group a sum of Rs. 44 and 91 was spent on two cases of illness in one or the other of the months under report. Under non-regular expenses, two cases, one for the purchase of a radio for Rs. 400 and the other for a cycle for Rs. 160 have also been included.

#### EXPENDITURE ON FOOD.

#### Expenditure on food articles—percentages

							Below Rs. 100	Rs. 100 to 150	Rs. 150 to 200	Rs. 200 to 250	Rs. 250 to 300	Rs. 300 & above	All
<u></u>		Fo	OOD						20.4	07.0	22 =		
Cercals	••	••	• •	••	••	••	26.4	27 · 1	26 · 4	25-6	22.7	21.5	23 - 2

Fruits and vege	tables	••	••	••	••	••	19-3	17-4	19.3	16.2	18-4	18.4	18-9
Condiments			••		• •		3.9	4.0	$2 \cdot 8$	3.6	3.7	3.1	3.6
Animal food	••	••			••		13.8	13.4	13.0	16-1	11.7	15.8	11.9
Miscellaneous	••		••		••	••	10.8	11.0	12.9	10.8	10.8	12.5	11.0
					Total		100.0	100.0	100.0	100.0	100.0	100.0	100 · (

From the above table it is seen that the proportion of expenditure given to coreals is about 23 per cent of the total food expenditure. Rice alone accounts for the bulk riz. 17 per cent. Milk and fats account for about 24 per cent, of the food expenditure. Milk is the most important item in the 'milk and fats' sub group. Percentage expenditures on other items are 18.9 per cent, for 'fruits and vegetables', 14.6 per cent for 'animal tood,' 11.9 per cent, for miscellaneous food articles, 3.9 per cent, for 'pulses', and 3.6 per cent for 'condiments and spices'. As between the lowest and the highest groups, the expenditure of cereals declines from 26.4 to 21.5 per cent, that on pulses from 4.6 to 3.7 per cent, and that on condiments and spices has also a declining tendency. The expenditure on milk and fats, on the othe hand, increases from 21 per cent, in the lowest to 25 per cent, in the highest group, expenditure on fruit and vegetables shows ciratic fluctuations, though the margin of fluctuations is not very conspicuous. The percentage expenditure on animal food in the various income groups varies from 13 to 16.4 per cent

> Expenditure on food articles.

							Below Rs. 100	Rs. 100 to 150	Rs. 150 to 200	Rs. 200 to 250	Rs. 250 to 300	Rs. 300 & above	All
Consumption u	nit	Foor					3:50 Rs. As. 14 5	4·76 Rs. As. 19 5	4·94 Rs. As. 23 8	5.76 Rs. As. 26 15	6:61 Rs. As. 28 C	6·94 Rs As. 37 5	5:66 Rs. A 25 (
Pulses F-4 Milk and fats	••		••		••	••	9 0	3 4 16 3	3 7	4 7	4 14	6 6 43 7	4 4 25 13

Condiments  Animal food		••	••	••	••		2 2 7 7	2 14 9 8	2 8 11 9	3 13 17 5	4 10 18 8	5 6 27 9	3 14 15 1
Miscellaneous	••	••	••	••	••	•-	5 14	7 14	11 8	11 6	13 10	21 11	12
					Total	]	54 3	71 7	88 15	105 5	125 8	173 13	107 13

The above table shows that the average expenditure per samily on food is Rs. 107-13 or Rs. 19-4 per consumption unit.

Monthly expenditure on food articles per c. u.

	Below Rs. 100	Rs. 100 to 150	Rs. 150 to 200	Rs. 200 to 250	Rs. 250 to 300	Rs. 300 & above	All
Food expenditure (excluding outside meals) per family (Rs. As.)	53 0	70 10	87 4	104 3	124 0	170 14	106 2
Food expenditure per consumption unit (Rs. As.)	15 8	15 0	18 0	18 5	19 0	25 3	19 4

The above table shows food expenditure per c. u. It must be remembered in considering the increased expenditure by higher income group families that these households contain more persons. Food expenditure per consumption unit increases a good deal less steeply than does food expenditure per family.

Three things may be noted (1) that the food expenditure per c.u. shows only very small variation between the first and the 2nd income groups, and that the figures for the third, fourth and the fifth income groups are also very similar and (2) the figure for the 6th income group shows an appreciable increase over the figure in the lower income levels, and (3) that the average expenditure per c. u. hovers between Rs. 15-( to Rs. 25-3.

The notable increase in the cost of diet per consumption unit in the top income group may be explained by the fact that the families of the highest income group consumed more of costlier diets than those in the lower income levels.

#### Comparison of food expenditure in income groups 1 and 6.

								Average for income group 6 divided by average for income group 1.
Cereals	••		••		••			2-61
Pulses			••	••	• •			2.55
Milk and fats	••				••			<b>3·7</b> 8
Fruits and vegeta	ables		••	••				3.07
Continents and a	pices							2.53
Animal food	••		••		••	••		3.71
Miscellaneous (te	a, sugar	, sweet	s etc.)					3.69
Total food	••				••	••		3.21
Number in famili	es	••	.,		••	••		2 · 10

That the top income group families spent more on costlier diets is apparent from the table given above.

#### DIETARY HABITS.

As regards dietary habits, rice is the staple article of food. During the last three years the dietary habits have under-gone a change due to the introduction of rationing and the consumption of rice has been supplemented by other cereals including wheat which was consumed to a fair-extent.

The percentage expenditure on rice from the lowest to the highest income groups is 19.9, 21.0, 20.0, 18.7, 16.7 and 14.3 respectively of the total food expenditure while those on wheat, wheat flour and other wheat products together are practically constant at 6 per cent. in all income groups except in the first and the last in which it is about 6.5 per cent each. The average consumption of rice is 58.2 seers per family of 7.24 persons or 5.60 per adult male equivalents and that of wheat and wheat products is 18.7 seers per family.

In the 'milk and fats' group, milk is the most important item of consumption followed next by ghee. Out of 23.9 per cent. spent on "milk and fats", milk and ghee together account for 17.0 per cent. of the total food expenditure. The percentage expenditure on milk varies between 11 and 13 while that on ghee varies between 4 and 5. The average consumption of milk and ghee is 26.2 and 1.26 seers respectively per family.

In the "fruits and vegetables" group, vegetables play a very important part in consumption. Fruits' a very important protective food is found to be neglected. The percentage expenditure on traits varies between 0.7 and 2, between the lowest and the last but the highest groups. Fair improvement in the consumption of fruits is noticeable in the highest income group with about 4 per cent. expenditure. The average expenditure on fruits is 2.4 per cent. as against 16.5 per cent. in the case of vegetables.

The average consumption of potato and onion per family is 13.77 and 2.31 seers respectively. In the 'animal food' group, fish is the major item of expenditure as well as consumption. Out of about 5 per cent. spent on animal food, more than 10 per cent. is accounted for by fish alone. The average consumption of fish is 7.83 seers per family. Miscellaneous food group includes tea, sugar, biscuits etc. Food bought and consumed away from home is also included in this sub-group. Percentage expenditure on tea, sugar and gur and raw sugar are given below:—

						Below Rs. 100	Rs. 100 to 150	Rs. 150 to 200	Rs. 200 to 250	Rs. 250 to 300	Rs. 300 & above	All
Тов		••	••	••		 2.2	1.7	2.0	2.2	2.3	1.6	2.0
Sugar, refined		••	• •	••	••	 2.1	2.5	2.7	2.2	2.3	1.9	2.3
Sugar, raw and	gur	••	••	••	••	 1.3	2.2	2.0	1.5	1.9	1.8	1.9

The consumption of tea, sugar, and gur amounts to 1.52 lbs. 5.23 srs., and 3.76 srs. respectively per lamily of 7.24 persons or 5.60 consumption units. From the above table it is also found that the percentage xpenditure on sugar, is more than two in all income groups except the highest. In the highest income roup it is slightly less than two (Tables 17 and 18—pages 63-67).

#### ANALYSIS OF DIET.

On a perusal of the budgets it was found that in the case of certain items of food, for example, vegetables (except potato and onions), the quantities consumed have not been recorded in most of the budgets. Details of the varieties of vegetables consumed have also not been recorded in them. Those budgets which contained details of varieties and corresponding quantities of vegetables were utilised as the basis for estimating the quantity figures for different varieties of the vegetables most generally consumed by the people.

The distribution of the average quantities of the different items of food consumed monthly by each

family under each of the income groups is given in the table.

The average quantity of each item consumed daily by adult male equivalent was calculated in ounces and is shown below:—

Rice	• •	••	• •	• •	• ••	••		11.08 ozs.
Wheat		••		••	••	• •		3 57 ozs.

The amount of concession varied from Rs. 9-0 in the income group Rs. 200-250 to Rs. 13-14 in the income group Rs. 100-150. The major portion of benefit was derived from purchase of cereals. The average monthly concession came to Rs. 10-0 of which Rs. 4-5 was secured from cereals, Rs. 1-7 each and from pulses and potatoes and, Rs. 1-3 each from ghee and oil. The average monthly incort consequently rose from Rs. 229-14 to Rs. 239-14 and the expenditure from Rs. 276-3 to 286-3. Per centage expenditure on food rose from 41 to 43 per cent.

#### FUEL AND LIGHTING.

Firewood, soft coke, kerosene, match box and electricity are the important items in this group which egether account for a little over 86 per cent. of the total expenditure on "Fuel and lighting". Firewood and soft coke tegether account for more than 50 per cent. of the total expenditure.

The average monthly expenditure per family is Rs. 10-10 or about Rs. 1-14 As. per consumption nit (Table 17, page 65).

#### CLOTHING.

The average menthly expenditure on clothing has been estimated by dividing the total expenditure on each item by its estimated life.

The actual monthly expenditure on clothing has also been asked for as an additional information. The stimated expenditure and the average actual monthly expenditure on clothing on the basis of four quarterly eturns are shown in the table below for the purpose of comparison.

•				1	Belo	w I 100		I	Rs. 1		to	F	ks. 1 20		to	]	Rs. :		to	F		250 00	to		Ra and	. 30 abo			A	.11

The estimated monthly expenditure is Rs. 5-1 per family of Re. 0-14 per consumption unit while the actual expenditure per consumption unit is Re. 0-11 per month.

#### Housing.

Seventy per cent. of the families pay rents. Thirteen per cent, live in self-owned houses and the remaining 17 per cent, have not given any information about their status in respect of residence. Taking into account only those families who pay rents, it is found that 16 per cent, of the families pay rents between Rs. 5 and Rs. 15, 26 per cent, between Rs. 15 and Rs. 25, 23 per cent, between Rs. 25 and Rs. 35, 21 per cent, between Rs. 35 and Rs. 45 and 14 per cent, pays Rs. 45 and more (Table 12—page 61). 105 families have given information regarding their residential accommodation. It will be seen from table 13 (page 61) that two-roomed houses are common amongst the groups Rs. 100—150, Rs. 150—200 and Rs. 200—250 while three-roomed houses are more in use in the income group Rs. 250—300 and four-roomed houses are more common in the highest group. On the whole, 43.8 per cent, of the families, containing on an average 8.1 persons each, live in two-roomed houses, 21 per cent, of them with an average size of 7.1 in three roomed and 16.2 per cent, with an average size of 9.2 in four-roomed, 9.6 per cent, with an average size of 4 persons in one-roomed and 9.4 per cent, with an average size of 7.4 persons in houses of five or more rooms.

The actual picture of over-crowding is presented more clearly in (table 14—page 62) giving the distribution of families by number of persons and number of rooms. Even in one-roomed houses 50 per cent, of the families are those whose size is between 4 and 5 persons and fifty per cent, of the families are of size between 6 and 7 persons. In the two-roomed, three-roomed, four-roomed and bigger houses, percentages of families of six or more persons are respectively 58.7, 63.6, 88.2, and 70.0 per cent. respectively.

A better insight into the degree of overcrowding is given by distribution of tamilies by number of person per room given in the table below:—

#### Distribution of families by number of persons per room.

Number of persons per re	oom.	 -				1—2	23	3—4	Total
Number of familes		 	••	• •		37	50	18	105
Percentages of families	•	 ••	••	••		35.3	47.6	17-1	100-0

It shows that a little less than 50 per cent. of the families have two to three persons to a room. This distribution however disregards the different requirements of young and old and those of the differently related persons. Analysis in respect of the latter is so complicated that it is not worth the labour involved. The former fact may be taken account of by expressing the number of persons in the family in terms of equivalent adult males. Though this conversion is open to objection, this will probably provide better index of over-crowding

#### Distribution of families by number of adult male equivalent per room.

Number of equivalent adu	ılt males	per rooi	m.		12	2—3	Total
Number of families	'		• •	 ••	 87	18	105
Percentages of families	••	• •	••	 ••	 82.8	17.2	100.0

The percentage of families having 1 to 2 equivalent adult males to a room is found to be 83 per cent. The table 16 (page 63) shows the average number of persons per room and average floor space per personaleeping, by income groups.

#### EXPENDITURE ON 'MISCELLANEOUS'

The average expenditure under this group is Rs. 102-13 or 37.3 per cent. of the total expenditure Monthly expenditure on miscellaneous items varies from Rs. 36-14 in the lowest income group to Rs 195-10 in the highest (Table 17—page 63).

Services.—This item includes wages of domestic servants and charges of washerman, barber, cobbler and sweeper etc. The most important item of expenditure amongst services is the keeping of domestic servants, which varies from Rs. 1-3 to Rs. 13-10, per month per family. Next in importance are the washing charges which vary from Rs. 1-11 to Rs. 6-5. The total monthly expenditure on services varies from Rs 4-13 to Rs. 26-3. The average monthly expenditure per family is Rs. 12-10 or 12-3 per cent. of the tota expenditure of this group.

Children's education.—This is also an important item of expenditure. The menthly expenditure varies from Re. 0-8 to Rs. 22-11 per family. The average monthly expenditure per family is Rs. 11-8 i.e. about 11·3 per cent. ct the total miscellaneous expenditure. In the lowest income group the expenditure is very insignificant. It is probably due to the fact that this group contains young men who have go very few school-going children and necessarily have hardly any expenditure on this account. The average monthly expenditure on this item per spending family is about Rs. 13-13.

Religious ceremonies.—This includes expenses on account of festivals, births, deaths etc. The monthly expenditure on this item varies from Re. 0-13 to Rs. 3-11 per ramily. The average monthly expenditure on them is Rs. 2-0. Considering only those families who spent on this item the average expenditure per month comes to Rs. 2-9.

Toilet requisites and other necessaries.—The average expenditure on toilet requisites which include among other things generally, toilet soap and hair oil, is Rs. 3-3 or 3 per cent. As between the lowest and the highest income groups the monthly expenditure varies from Rs. 1-15 to Rs. 4-5. Other necessaries such as washing soap, tooth brush, tooth powder or paste account for expenditure ranging from Rs. 1-3 t Rs. 3-2. The average monthly expenditure on them is Rs. 2-2 per family or Re. 0-6 per consumption unit.

Newspaper and entertainments.—The monthly expenditure on newspaper varies from Re. 0-6 t Rs. 2-11 per family while that on entertainments from Re. 0-2 to Re. 1-14. The average monthl expenditure on both is Rs. 2-0 per family or Re. 0-6 per consumption unit.

Club subscription.—The monthly expenditure on this item ranges from Re. 0-3 to Rs. 1-4. The average monthly expenditure per family is Re. 0-8.

Postage.—The monthly expenditure on postage varies from Re. 0-5 to Re. 0-15 per family. The average monthly expenditure per family is Re. 0-14.

Medical charges.—The monthly expenditure on this item varies from Rs. 4-4 to Rs. 12-5 per family. The average monthly expenditure per family is Rs. 7-9 and accounts for about 7 per cent. of the total miscella neous expenditure.

Holiday expenses.—The monthly expenditure on this item ranges from Re. 0-3 to Rs. 1-5. The average monthly expenditure is Rs. 1-3 per family or about 1 per cent.

Calcutta.

Travelling.—In a city like Calcutta the expenditure on travelling to and from place of work is very usual-It ranges from Rs. 1-9 to Rs. 6-4 per family per month. The average monthly expenditure is Rs. 3-1 per family or about 3 per cent.

Maintenance of own conveyance.—The average monthly expenditure is only Re. 0-5 per family or about 0.3 per cent.

Taxes.—The monthly average expenditure on this item is Rs. 4-8 or about 4 per cent. When those families only who pay taxes are considered the average expenditure per family comes to about Rs. 9-0.

Provident fund and insurance.—The average monthly expenditure (or rather savings) on this account amounts to Rs. 20-12 per family or 20-2 per cent. The amount of Provident Fund contributions, varies from Rs. 4-1 in the lowest income group to Rs. 25-12 in the highest. Insurance premium varies from Rs. 3-10 to Rs. 15-15 between the same income group.

Remittances.—The average monthly remittance comes to about Rs. 5-15 or about 6 per cent. The monthly remittance per remitting family is about Rs. 18-0. It ranges from Re. 1-0 in the lowest income group to Rs. 10-12 in the highest.

Pansupari.—Expenses on this item are generally common. The average monthly expenditure comes to Rs. 1-13 and varies from Re. 0-15 in the lowest to Rs. 2-9 in the highest income group.

Cigarettes and tobacco.—The average monthly expenditure on cigarettes and tobacco is Rs. 2-0 or 2 percent, and varies between Rc. 0-9 and Rs. 4-5.

Debt disbursement.—About seventy six per cent. of the families have shown payments on account of debt. The average monthly payment per family towards debt disbursements is Rs. 15-15 only, which is about 7 per cent. of the average monthly income of the family. Taking only the indebted families th average monthly payment towards debt disbursements is Rs. 20-15 only, which is about 9 per cent. of the average monthly income (Table 11—page 61). It is seen from the table that the percentages of indebted families decrease from 90-9 per cent. in the lowest income group to 60-7 per cent. in the income group Rs. 200-250. The percentage then goes upto 84 per cent. in the income group Rs. 250—300, only to fall to 73-5 per cent. in the highest income group. The ratio of debt disbursements to monthly income is the highest in the income group Rs. 100-150 and the lowest in the income group Rs. 200-250.

#### BOMBAY CITY.

Bembay city constitutes about 11 per cent. of the total sample selected. In all 597 individuals were asked to submit four quarterly budgets and 676 effective budgets were received from them. The average monthly expenditure by items has been worked out on the basis of all four and non-four budgets and is shown in table 19 at pages 90-93. The detailed analysis has however been based on 400 effective (all four) budgets classified into six income groups.

In order to test the adequacy of the samples studied, the dispersion in the expenditure data has been worked out and is given below:--

	When t	the whole sa taken.	mple is	When	n the sample	is divided t	at random into two equal parts		
		- 4			First pa	ırt.	Second part.

#### DISTRIBUTION OF BUDGETS BY EXPENDITURE AND INCOME CLASSES.

The percentage of the families by expenditure classes is given below:-

Expenditure classes	Below Rs. 100	Rs. 100—125	Rs. 125150	<b>Rs.</b> 150—175	Rs. 175—200	Rs. 200 - 225	Rs. 225—250	Rs. 250—275	Rs. 275– 300	Rs. 300 and above
Percentages	3.0	3.0	7.0	9.0	10.0	10.0	9.0	9.0	6.0	34.0

Thirteen per cent. of the families spend less than Rs. 150 per month, 19 per cent. between Rs. 150 and 200, 19 per cent. between Rs. 200-250, 15 per cent. between Rs. 250-300 and 34 per cent. spend Rs. 300 and more. The quartile values of the expenditure are as follows:—

First quartile = Rs.  $182 \cdot 5$ . Median = Rs.  $247 \cdot 2$ . Third quartile = Rs.  $366 \cdot 4$ .

This means that 50 per cent. of the families spend in round number Rs. 247 or less, the upper 25 per cent. of the families have a monthly expenditure of more than Rs. 366 of more and the lower 25 per cent. an expenditure of Rs. 182 or less. The central 50 per cent. of the families incur an expenditure of between Rs. 182 and 366.

The quartile value of the income in rupees are :--

First quartile = Rs. 141.7.

Median = Rs. 206-8.

Third quartile = Rs. 287.5.

The percentage distribution of families by income groups is shown below: -

Income groups	Below Rs. 100	Rs. 100 —125	Rs. 125 -150	Rs. 150—175	Rs. 175200	Rs. 200—225	Rs. 225—250	Rs. 250275	Rs. 275300	Rs. 300 and above
Percentages	6.0	7.0	18.0	5.0	11.0	11.0	6.0	7.0	4.0	25.0

Thirtyone per cent. of the families earn less than Rs. 150, 16 per cent. between Rs. 150 and 200 17 per cent. between Rs. 200 and 250, 11 per cent. between Rs. 250 to 300 and 25 per cent. Rs. 300 or more.

It is found that the 38 per cent. of the families lie in the same expenditure and income classes and 51 per cent. in the expenditure classes above, and 11 per cent. in expenditure classes below the corresponding income classes (Table 1—page 81).

COMPOSITION OF THE FAMILY.

It will be seen from the table 2 at page 81 that out of 100 tamilies 77 families i.e., 77 per cent. are natural and 23 per cent. joint families. The average number of persons living in a family is 5·3; 1·6 being males, 1·4 females, 1·2 boys and 1·1 girls. The average number of persons living away from family is 0·4: 6 15 being males and 0·13 females; ·06 boys and ·06 girls who receive regular monthly remittances from the head of the family. The size of the family inclusive of dependants living away from family is 5·7 (Table 3—page 81).

It will be seen from the table that the number of persons per family increases almost continuously from 4·1 persons in the lowest income group to 6·9 in the highest income group. This tendency of increasing number is more pronounced in the case of adults than in the case of children.

Average number of earners per family is 1.23, including the head of the family. Average number of non-earners including those living away from family is 4.47 i.e., about 20 per cent. of the family members are earners and 80 per cent. non-earners of whom about 42 per cent. are boys and girls below fifteen years of age and about 29 per cent. are adult females above fifteen years of age. (Table 4—page 82). The number of earners varies from 1 per family in the lowest income group to 1.56 in the highest. There are female earners in the income groups "Rs. 200—250" and "Rs. 300 and above" and the total number of female earners is four only or .04 per family. Some idea of the pressure of dependants on earning members can be had from the (table 5—page 82).

The number of dependants per earner is 4·1 in the lowest income group, which declines to 3·8 persons in the next higher income group and then rises to 5·3 in income group Rs. 150 200 which records the maximum pressure on the earner. Thereafter the pressure decreases to 4·1 in the income group Rs. 250—300 to rise up slightly to 4·4 in the highest income group. It will be seen from the table that the earner of average family has to maintain 4·3 persons or 3·3 equivalent male adults. The dependants per earner in the average family vary from 3·1 consumption units to 3·9 in the income group Rs. 150 200 The earner in the highest income group has to maintain 3·4 equivalent male adults only.

## MODAL SIZE OF FAMILY.

About 37 per cent. of the families consist of 3 to 4 consumption units. They constitute the modal group, the modal value being 3.45 c. u.s. It is very closely followed by the median value of 3.46 consumption units. (Table 7—page 83).

## MONTHLY INCOME AND EXPENDITURE.

The average income of the head of the family from pay and allowances is Rs. 234-6 per month and from other sources such as land, investments etc., is Rs. 7 10 per month. The average earnings of other members of the family work out to Rs. 11-4 per family per month. The total income of the family therefore averages Rs. 253-4 per month. The greatest single source is the income of the head of the family from pay and allowances accounting to 92 per cent. The contribution of the other members of the family towards earnings is very small being only about 5 per cent. Income from other sources such as land, investments etc. is also very small being only 3 per cent. In all the income groups, pay and allowances of the head of family range from 91 to 97 per cent. of the family income.

The monthly income per family varies from Rs. 74-1 to Rs. 480-10 while the monthly expenditure per family shows a variation from Rs. 104-11 to Rs. 493-3. The monthly income per capita in the various income groups varies from Rs. 18-1 to Rs. 70-0 while the monthly expenditure per capita varies from Rs. 25-8 to Rs. 71-7.

The average monthly income per c. u. is Rs. 61-12 and the average monthly expenditure per c.u. is Rs. 71-14. Among the income groups, the deficit per family is the lowest in the highest income group, being only Rs. 12-9 per family, the highest being Rs. 70, in the income group Rs. 200--250. In the first three income groups, the deficits amount to Rs. 30-10, 59-3 and 42-0 respectively. In the highest but one income group it is Rs. 35-9 (Table 8 & 9-page 83).

# CHART. Expenditure.

Average monthly expenditure per family.

Norg. - Figures in brackets show percentages.

Expenditure on food is the highest being 39.0 per cent. of the total family expenditure and next comes spenditure on miscellaneous items which is 38 per cent. As between the lowest and the highest income roups the expenditure on food falls from 43 per cent. to 37 per cent. and on fuel and lighting from 7 per ent. to 4 per cent. Expenditure on clothing has been very erratic. From about 8 per cent. in the first bree income groups it rises to 10.7 per cent. in the tourth income group and then gradually falls down to 6 in the highest. Expenditure on housing also reveals the same trend of fluctuation. Furniture nd household requisites show an expenditure of about 2 per cent. in all the income groups.

## SURPLUS AND DEFICIT BUDGETS

Classification of budgets into surplus and deficit ones and the ratio of these categories to the total umber of budgets will be seen from the table given below. In all 78 per cent. of the total budgets showed eficit and only 22 per cent. showed surplus.

Income grou	ıps.		Total budgets (1)	Surplus budgets (2)	Deficit budgets (3)	% of (2) to (1).	% of (3) to (1).

## NON-REGULAR EXPENDITURE.

Three families, two in the income group Rs. 150—200 and one in Rs. 250—300, are reported to have curred non-regular expenditure. There was no non-regular expenditure reported from any of the maining four income groups. Thus, three families out of 100 in Bombay city incurred non-regular expenditure. Of the two families of the lower income group—referred to above—one made a present worth Rs. 205 the occasion of a marriage while the other spent a sum of Rs. 3,000 on account of two marriages taking are in the tamily. A funeral took place in the third family under consideration and it had to spend Rs. for that purpose.

### EXPENDITURE ON FOOD.

## Expenditure on food articles—percentages.

				Below Rs.	Rs. 100 to 150.	Rs. 150 to 200.	Rs. 200 to 250.	Rs. 250 to 300.	Rs. 300 & above.	All.
Cereals	••	••		24 · 7	15.8	15.8	15.5	16.7	15.3	15.6
Pulses				5-5	3·s	4.6	4.7	4.4	3.3	4.1
Milk & fats		••		36.2	38.3	43.3	40.2	38.2	<b>33</b> ·0	37.4
Fruits and vegeta	bles			12.9	16.2	16.7	15.4	14.9	16.3	<b>16</b> ·1
Condiments				4.6	4-5	4.5	4.7	4- 9	3.7	4 - 3
Animal food				6.9	8.3	3.6	5.1	7.2	12.8	8.5
Miscellaneous	• •	••	••	9.2	13-1	11.5	14-4	13.7	15-6	14.6
		Total		100%	100%	100%	100%	100%	100%	100%

From the above table it is seen that the proportion of expenditure given to milk and fats is the highes being about 37 per cent. of the total of fool expenditure. Next in importance is "fruits and vegetables" which accounts for about 16 per cent, of the food expenditure 'Cereals' is responsible for a little less that 16 per cent, of the total food expenditure. Percentages of expenditure on other items are 8 for animal food, 4 each for pulses and condiments and 14 for miscellaneous tood articles. As between the lowest and highest income groups the expenditure on cereals declines from 24.7 per cent, to 15.3 per cent; that or condiments and spices fluctuates between 4 per cent, and 5 per cent; that or pulses shows a declining tendency siz., from 5.5 per cent, to 3.3 per cent. The expenditure on milk and fats, on the other hand increase from 36.2 per cent, in the lowest to 43.3 per cent, in the income group Rs. 150-200 and shows a declining tendency thereafter coming down to 33 per cent, in the highest group. Expenditure on 'fruits and vegetables' has been 13 per cent, in the lowest group but is higher in the other income groupshovering between 15 and 17 per cent. The expenditure on animal food also has a rising tendency. It rise from 6.9 per cent, in the first income group to 8.3 in the next and than falls to 3.6 in the third income group.

Thereafter the percentage continuously increases to 1.8 in the highest income group.

Table below shows food expenditure by income groups. The average monthly expenditure per famil on food is Rs. 115-0.

#### Expenditure on food articles.

## DIETARY HABITS (Tables 17 & 18—pages 86—89).

Fifty eight per cent. of expenditure on cereals is spent on rice and about 28 per cent. on wheat. The percentage expenditure on rice from the lowest to the highest income groups is 14·1, 10·0, 9·4, 10·0, 9·8 and 3·2 respectively while that on wheat, wheat flour and other wheat products together to 9·7,5·2, 5·7, 5·2, 5·8 and 7·0 respectively, of the total food expenditure. The average consumption of rice is 8·7 payless per family of 5·4 persons or 4·2 adult male equivalents and that of wheat and wheat products 6·8 payless.

The percentage expenditure on milk varies between 23 and 19 while that enghee fluctuates between 22 and 3.2 as between the lowest and the highest income groups. In the income group Rs. 250—300, percentage expenditure on ghee, however, shoots up to 6.1 of the total food expenditure. The average onsumption of milk and ghee is 43.0 srs. and 2.1 lbs. respectively per family.

The percentage expenditure on fruits varies between 1 and 5, that on vegetables between 12 and 11 s between the lowest and the highest income groups. The average consumption of potato and onion per unily is 4.2 and 4.8 srs. respectively. Out of about 8.5 per cent. spent on animal food, about 2.8 per ent. is accounted for by fish and 2.2 by goat's meat.

Percentage expenditure on tea, sugar, gur and raw sugar is given below :--

				Below Rs. 100	Rs. 100 to 150	Rs. 150 to	Rs. 200 to 250	Rs. 250 to 300	Rs. 300 & above	All

Onion		••				0 10	0 10	0 8	0 12	• 5	0 4
Tea	••				0 12	0 11	1 7	0 8	6 15	0 14	0 8
Sugar		••	• •	!	9 11	0 13	0 10	0 8	1 5	0 5	Ú
			Total	i	22 2	24 1	27 0	19 l	29 10 °	22 9	22 6

The amount of benefit varied from Rs. 19-1 to Rs. 29 10 in the income groups. The money value of benefit derived by the first and the last income groups was almost equal and amounted to Rs. 22-2 and Rs. 22-9 respectively. With the exception of the income group "below Rs. 100" all other income group derived the major portion of benefit from milk; while the benefit derived from milk by the first income group was only Rs. 5-13 while that derived by the remaining groups varied from Rs. 10-8 to Rs. 14-14. The first group, of course got the major portion of its benefit from cereals which amounted to Rs. 7-10. For a other groups cereals took the second important place in respect of benefit derived from concessions. The average benefit per family amounted to Rs. 22-6 of which milk accounted for Rs. 12-1, cereals for R 5-8, pulses for Rs. 1-4, ghee for Rs. 1-5 and vegetable oils for Rs. 1-1. The net effect of the concession was raise the average monthly income from Rs. 253-4 to Rs. 275-10 and average monthly expenditure fro Rs. 294-10 to Rs. 317-0. Expenditure on food enhanced from Rs. 115 to Rs. 137-6 and was 43-3 per cen of the increased monthly expenditure.

#### FUEL AND LIGHTING.

Firewood and charcoal are the important items in this group, which together account for 75 per cen of the total expenditure on 'fuel and lighting'. The average monthly expenditure on fuel and lighting per family is Rs. 13-9 or about Rs. 3-3 per consumption unit.

#### CLOTHING.

Estimated expenditure and the average actual monthly expenditure on clothing on the basis of for quarterly returns are shown in the table below for the purpose of comparison:—

2			I		w R 00	.s.	]	Rs. 1	100 50	to	F	Rs. 1	150 00	to	R	Rs. 2	200 50	to	F		250 t 00	:n		s. 3 abo		nd		.!	All	_

The estimated monthly expenditure on clothing is Rs. 23:10 per family. The estimated monthly expenditure on men's clothing per min is Rs. 6-8, on won in's clothing per woman is Rs. 5-8 and children clothing per child is Rs. 2-7.

## FURNITURE AND HOUSEHOLD REQUISITES.

The actual expenditure on this group supplied by the families is also shown along side the estimated expenditure for comparison:—

		Below Rs. 100	Rs. 100 to 150	Rs. 150 to 200	Rs. 200 to 250	Rs. 250 to 300	Rs. 300 and above	All
istimated expenditure letual expenditure	• •	 Rs. As. 2 7 2 7	Rs. As. 3 1 3 10	Rs. As. 4 0 4 4	Rs. As. 7 2 4 10	Rs. As. 7 10 4 15	Rs. As. 8 0 5 8	Rs. As. 4 10 4 3

The estimated monthly expenditure is Rs. 4-10 per family or Rs. 1-2 per consumption unit while the actual expenditure per consumption unit is Rs. 1-0 per month.

## Housing.

Eightynine per cent. of the families pay rents. The remaining 11 per cent. either live in self-owned louses or free houses.

Taking into account only those families who pay rents, it is found that 6 per cent. of the families may rents below Rs. 10; 37 per cent. between Rs. 10 and Rs. 20, 28 per cent. between Rs. 20 and Rs. 30, 17 per cent. between Rs. 30 and Rs. 40 and 12 per cent. over Rs. 40.0 (Table 12 page 84). Seventyfive families have given information regarding their residential accommodation. It will be seen from table 13 at page 85 hat two-roomed houses are most common amongst all the groups. On the whole 16 per cent. of the families ive in one roomed houses with an average of 4.2 persons in a family, 58 per cent. containing on an average of 6 persons live in two roomed houses, 13 per cent. of them with an average size of 6.6 persons in three-comed, 13 per cent. with an average size of 5.1 persons in houses of four or more rooms. The actual neture of overcrowding is presented more clearly in the table (14) at page 85 giving the distribution of amilies by number of persons and number of rooms. Even in the one-roomed houses 50 per cent. of the amilies are having between 2 and 4 persons and another fifty per cent. of the families above 5 persons. In the two-roomed, three roomed and four-roomed houses, percentages of families of six and over persons are espectively 44, 60 and 55.

A better insight into the degree of over-crowding is given by the distribution of families by number of persons per room given in the table below:—

Sumber of persons per i	room	• •	• •	••	• •			12	23	3 & above.	Total.

#### Expenditure on " miscellaneous "

The average monthly expenditure under this group is Rs. 112-1or 38 per cent. of the total expenditure Table 17--page 86). It ranges from Rs. 32-11 in the lowest income group to Rs. 204-8 in the highest.

Services.—The most important item of expenditure amongst services is the keeping of domestic ervants, which varies from Rs. 1-13 to Rs. 12-12. The total monthly expenditure on services varies tom Rs. 4-3 to Rs. 25-8. The average monthly expenditure per family is Rs. 13-15 or 12 per cent. of he total miscellaneous expenditure.

Children's education. The monthly expenditure varies from Re. 0-11 to Rs. 17-14 per family. The verage monthly expenditure per family is Rs. 9-5 i.e. about 8 per cent. of the total miscellaneous expenditure. In the lowest income group the expenditure is very insignificant. The average monthly expenditure on this item per spending family is about Rs. 11-6.

Religious ceremonies.—The average monthly expenditure under this head has been Rs. 3-9 or about 3 per cent: considering only those families who spend on this item, the average expenditure per month comes to Rs. 4-10.

Toilet requisites and other necessaries.—The average monthly expenditure on toilet requisites is Rs. 1-11 or 1-5 per cent. As between the lowest and the highest income groups the monthly expenditure varies from Re. 0-10 to 2-8. Other necessaries such as washing soap, tooth brush, tooth powder or paste secount for expenditure ranging from Re. 0-14 to Rs. 3-14. The average monthly expenditure on them is Rs. 2-14 per family.

Newspaper and entertainments.—The monthly expenditure on newspaper varies from Re. 0-2 to Rs. 4-3 per family while that on entertainments from Re. 0-7 to Rs. 4-13. The average monthly expenditure on both is Rs. 4-6 per family.

Club subscription.—The monthly expenditure on this item ranges from Re. 0-9 to Rs. 2-5. The average monthly expenditure per family is Rs. 1-5.

Postage.—The monthly expenditure on postage varies from Re. 0-4 to Rs. 1-3 per family. Average monthly expenditure is Re. 0-13 per family.

Medical charges.—The monthly expenditure on this item varies from Rs. 4-13 to Rs. 15-13 per family. Average monthly expenditure per family is Rs. 10-5.

Holiday expenses.—Holiday expenses range from Re. 0-9 to Rs. 7-12 between the income groups per month. The average monthly expenditure is Rs. 3-11 per family or about 3 per cent. of expenditure under this group.

Travelling.—Monthly expenditure on this item ranges from Rs. 1-5 to Rs. 8-1 per family per month. The average monthly expenditure is Rs. 4-2 per family or about 3.7 per cent.

Maintenance of own conveyance.—The average monthly expenditure is only Re. 0-5 per family.

Taxes.—The monthly payment on account of taxes varies from Re. 0-13 in the income group Rs. 150—200 to Rs. 14-5 in the highest income group. The average for all income groups comes to Rs. 4-14 or about 4 per cent.

Provident fund and insurance.—The average monthly expenditure (or rather savings) on this account amounts to Rs. 22-1 per family or 20 per cent. The amount of Provident fund contribution varies from Rs. 3-12 in the lowest income group to Rs. 28-3 in the highest. Similarly, insurance premium also varies from Rs. 1-11 to Rs. 15-4.

Remittances.—The average monthly remittance per tamily comes to about Rs. 6-6 or 5.7 per cent The monthly remittance per remitting family is Rs. 20-2.

Pansupari.—About 70 percent, of the families reported expenditure on this item. The average monthly expenditure comes to Rs. 1-5 for all families and varies from Re. 0-9 as in the lowest to about Rs. 2-6 in the highest income group. Taking only the expending families the average monthly expenditure come to Rs. 1-14.

Cigarettes and tobacco.—About 42 per cent, of the families have shown expenses on cigarettes and 33 per cent, on tobacco. The monthly expenditure on cigarettes per spending family is Rs. 3-11 and on tobacco Re. 0-13. The average monthly expenditure on cigarettes and tobacco is Rs. 1-15 or 1.7 per cent, for all families and varies between Re. 0-15 and Rs. 3-8.

Debt disbursement. —About 64 per cent. of the families have shown payments on account of debt. The average monthly payment per family towards debt disbursements is Rs. 13 only which is about 5 per cent of the average monthly income of the family. Taking only the indebted families the average monthly payment towards debt disbursements is Rs. 20-13 only which is about 8 per cent. of the average monthly income. It is seen from the table that the percentage of families in debt is over 80 in income groups below Rs. 100, Rs. 200—250 and Rs. 250—300. The percentage falls to 44 per cent. in the highest income group. The ratio of debt disbursements to monthly income is the highest in the income groups Rs. 200—250 and Rs. 250—300 and the lowest in the income group Rs. 300 and above (Table 11—page 84).

## MADRAS CITY.

The share of Madras city in the total sample selected is 7 per cent. In all, 348 individuals were invited to submit four quarterly budgets. The number of effective budgets received from them was 460 including both all-four and non-four budgets. A summary table showing the average monthly expenditure by items based on all these budgets is annexed to the Report (vide table 19; pp 113-115). The Report is, however, based on the analysis of 388 all-four budget. It will be noted that there are only 8 budgets in the income group of Rs. 250 300 which is too inadequate for the purposes of any statistical analysis. But to maintain the comparability of figures with other centres, they have been treated separately.

In order to test the adequacy of the sample studied, the dispersion in the expenditure data has been

worked out and is given below:

When the whole s	sample	is taken.		When the sample is divided at random into two equal parts.							
						First part	i i	Second part			
		M	s	v	M <sub>1</sub>	Sı	V <sub>1</sub>	M <sub>2</sub>	S <sub>2</sub>	v	
		Rs.	Rs.	%	Rs.	Rs.	%	Rs.	Rs.	%

#### DISTRIBUTION OF BUDGETS BY EXPENDITURE AND INCOME CLASSES.

The percentage of families by expenditure classes is given below :---

Expenditure classes	Below	Rs. 100	Rs. 125	Rs. 150	Rs. 175	Rs. 200	Rs. 225	Rs. 250	Rs. 275	Rs. 300
	Rs. 100	to 125	to 150	to 175	to 200	to 225	to 250	to 275	to 300	and abov
Percentages	7.2	14·4	17.5	18.6	7.2	10.3	5.2	4.1	5.2	10.3

About 39 per cent. of the families spend less than Rs. 150 per month, about 26 per cent. between R 150 and Rs. 200, 16 per cent. between Rs. 200 and 250, 9 per cent. between Rs. 250 and 300 and the E maining 10 per cent. spend Rs. 300 or more.

The quartile values of the expenditure in rupees are given below as follows:-

First quartile =Rs.  $129 \cdot 9$ Median =Rs.  $164 \cdot 7$ Third quartile =Rs.  $224 \cdot 5$ 

This means that 50 per cent, of the families spend in round numbers Rs. 185 or less, the upper 25 per cent, of the families have a monthly expenditure of about Rs. 224 or more and the lower 25 per cent an expenditure of Rs. 130 or less. The central 50 per cent, has an expenditure between Rs. 130 at Rs. 224.

The quartile values of the income in rupees are :-

First quartile =Rs. 99·1 Median =Rs. 129·8 Third quartile =Rs. 204·4

The percentage distribution of families by income groups is shown below:-

Income groups	Below Rs. 100	Rs. 100 to 125	Rs. 125 to 150	Rs. 150 to 175	Rs. 175 to 200	Rs. 200 to 225	· Rs. 225 to 250	Rs. 250 to 275	Rs. 275 to <b>300</b>	Rs. 30
Percentages	26-8	21.6	8.2	11-4	5.2	10.3	5.2	1.0	1.0	9.

About 57 per cent. of the families earn less than Rg. 150, 17 per cent. between Rs. 150 and Rs. 26 15 per cent. between Rs. 200 and Rs. 250, 2 per cent. between Rs. 250 and 300 and 9 per cent. Rs. 30

It is found that about 30 per cent. of the families lie in the same expenditure and income classes, 61 p cent. in expenditure classes above, and 9 per cent. in expenditure classes below, the corresponding income classes. [Table 1—page 104].

#### COMPOSITION OF FAMILIES.

It will be seen from table 2 at page 104 that out of the 97 families, 51 families i.e. 53 per cent. are natural families and 47 per cent. joint families. The average number of persons living in the family is 6.4; 1.8 belonger as 1.3 boys and 1.2 girls. The average number of persons living away from family is 0 who receives regular monthly remittances from the head of the family. The size of the family inclusion of dependents living away from family is 6.7 (Table 3—page 104).

It will be seen from the table that the number of persons per family except in the income group Rs. 150—, 200 and Rs. 250 to Rs. 300, increases almost continuously from 5·8 persons in the lowest income group to ·4 in the highest income group. Average number of earners per family is 1·12, including the head of the mily. Average number of non-earners including those living away from family is 4·58 i.e. about 17 per int. of the family members are earners and 83 per cent. non earners of whom 38 per cent. are boys and girls elow fifteen years of age and about 34 per cent. are femiles above 15 years of age. (Table 4 – page 105). Verage number of earners per family varies from 1·00 to 1·45 between the income groups. There is no smalle earner in any of the income groups. The economic pressure seems to be the lowest in the income roup of Rs. 150 to Rs. 200 where there are only 4·9 dependants per earner. In both "Rs. 100 to 150" and Rs. 200 to 250" groups the number of dependants per earner is 6·1 whereas in the lowest and highest income roups they are 5·7 and 5·6 respectively. (Table 5—page 105).

#### MODAL SIZE OF FAMILY.

About 27.8 per cent. of the families consist of 4 to 5 consumption units. They constitute the modal toup, the modal value being 4.42 c.u's. It is closely followed by the median value of 4.69 c.u's.

#### MONTHLY INCOME & EXPENDITURE

The average income of the head of the family from pay and allowances is Rs. 143-11 per month and om other sources such as land, investments, etc. the income is Rs. 19-14 per month. The total income of ne family therefore averages Rs. 163-9 per month. The greatest single source of income is the pay and llowances etc., drawn by the head of the family which accounts for 88 per cent. The contribution of the ther members of the family towards earnings is very small, being only about 5 per cent. Income from other purces such as land, investments etc: is also very small being only 7 per cent. of which the income from land lone accounts for about 5 per cent. In the lowest income group pay and allowances of the head of the mily account for more than 93 per cent, of the family income. In all other income groups they contribute etween 80 and 90 per cent, of the total income. The monthly income per family varies from Rs. 86-8 to is 411-6 while the monthly expenditure shows a variation from Rs. 122-10 to Rs. 375-14. The monthly er capita income in the various income groups varies from Rs. 14-14 to Rs. 55-10 whereas the monthly er capita expenditure varies from Rs. 21-8 to Rs. 50-13. The monthly income per c.u. varies from Rs. 9-4 to Rs. 69-15 and the average monthly expenditure per c.u. varies from Rs. 27-4 to Rs. 64-13. n the highest income group a surplus of Rs. 5-2 per c.u. has been recorded. In all other groups there re deficits; the highest deficit of Rs. 11-0 per c.u is to be found in the income group Rs. 100-150 and he lowest deficit of Rs. 1-4 per c.u. has been in the highest but one income group. If the income group Rs. 250 to 300 be left out from our study for the reasons stated at the beginning, tis noticed, as between the lowest and highest income groups expenditure on food falls from 45.4 to 18.4 per cent, and fuel and lighting from 6.2 to 5.1 per cent. The proportion of expenditure on lothing is the highest in the income group Rs. 100 to 150, being 13.1 per cent. of the tetal expenditure and the lowest in the highest income group being 8.4 per cent. Expenditure on housing varies from 7.2 c 9.4 per cent. Expenditure on miscellaneous items which include luxury items, generally increases with income. Furniture and house-hold requisites also do not show a very marked variation in different roups except in the first two income groups in which it is 2.3 and 2.6 per cent. respectively.

## SURPLUS AND DEFICIT BUDGETS

Classification of budgets into surplus and deficit ones and the ratios of these categories to the total number of budgets will be seen from the table given below. In all, 84 per cent. of the total budgets show eficits and only about 16 per cent. show surplus.

To the contract of the contrac				•				Total budgets	Surplus budgets 2	Deficit budgets 3	Percentage of 2 to 1	Percent. age of 3 to 1

## NON-REGULAR EXPENDITURE.

Seven families out of ninety seven reported non-regular expenditure. In the lowest income group one sent a sum of Rs. 2,700 for marriage. In the next income group three families reported such expenditure:

one spent Rs. 900 for thread ceremony, another Rs. 375 for a religious ceremony and the third spent Rs. 75 only for presents. In the income group Rs. 200-250 there was an expenditure of Rs. 123 for a religious ceremony in one family and in an other there was an expenditure of Rs. 72 for medical treatment. In the following income group a cycle was purchased in one family for Rs. 62-12. In the highest income group ene family spent Rs. 297 for a marriage present.

Expenditure on food - percentages.

				Total	••	100	100	100	100	100	100	100

From the above table it is seen that the proportion of food expenditure given to milk and fats is the highest, being about 40.6 per cent. Milk alone accounts for 20 per cent. Next in importance is 'cereals' which accounts for about 21.7 per cent. of the food expenditure. Rice is the most important item in this sub-group covering 18.6 per cent. Percentages of expenditure on other items are 11.9 per cent. for fruits and vegetables 9.7 per cent. for miscellaneous food articles, 5.7 per cent. each for pulses and condiments, and 4.7 per cent for animal food. As between the lowest and highest income groups the expenditure on cereals decreased from 24.6 per cent. to 15.6 percent. Except for the highest income group, this decrease is gradual. The expense on milk and fats, on the other hand, increased from 37.7 per cent. to 45.8 per cent. Expenditure on true and vegetables does not vary widely from group to group; a maximum of 12.6 per cent, is recorded in the second income group. In the case of expenditure under "miscellaneous" the maximum of 13.0 per cent is recorded in highest but one income group. The proportion of expenditure on animal food is small in comparison with that on milk and fat. In the highest income group it is only 3.2 per cent. of the total expenses on tood.

The table below shows food expenditure by income groups. It will be seen that average month!

expenditure per family comes to Rs. 80-4 only.

ė.,

#### Food expenditure per consumption unit.

	Rs. As.	Rs. as.	Rs. as.	Rs. as.	Rs. as.	Rs. As.	Rs. As
Food expenditure (excluding outside meals)	55 7	72 7	77 0	105 11	134 15	141 2	<b>79</b> 5
Food expenditure per consumption unit	12 6	14 15	17 9	19 7	19 9	24 14	16 6

The table above shows the food expenditure per c. u. which increases a great deal less steeply betwee the income groups than does the food expenditure per family.

#### DIETARY HAPITS.

As regards dietary habits, rice is the staple article of food. Next important item of consumption under reals is wheat including wheat products. The average consumption of rice and wheat including wheat oducts is 39·2 and 4·8 measures respectively per family of 6·4 persons or 4·9 adult equivalent males. The acentage expenditure on rice from the lowest to the highest income groups are 88, 87, 84, 87, 83 and 80 spectively of the total expenses on cereals and 22. 21, 18, 17, 17, 12 respectively of the total expenditure 1 food. There are as many as 43 vegetarian families out of a total of 97. The percentage expenditure on ilk alone varied from 43 to 47 per cent. of the expenditure on this group and 16 to 22 per cent of the total od expenditure. The average consumption of milk per family is 19 measures i.e. approximately 57 lbs. iscellaneous food group includes tea, coffee, sugar, biscuits etc. Food bought and consumed away from ome is also included in this sub-group. Average consumption of coffee per month is 2·25 lbs per family d that of sugar is 2·58 measures supplemented by raw sugar (1·15 measures) and gur (1·04 measures). ables 17-18—pages 109-112.)

Percentage expenditure on coffee, sugar and gur and raw sugar is given below:

			•			Below Rs. 100	Rs. 100 to 150	Rs. 150 to 200	Rs. 200 to 250	Rs. 250 to 300	Rs. 300 & above	Average of all groups

				Total	••	10 10	9 14	10 8	11 6		7 15	10 4

The amount of concession was the lowest (Rs. 7-15) in the highest income group and the highest (Rs. 11-6) the income group Rs. 200-250. In the lowest income group, cereals accounted for the major portion of the enefit. In the remaining groups (with the exception of group Rs. 250-300) ghee or oil accounted for the major portion of benefit. The average monthly concession came to Rs. 10-4 of which Rs. 3-5 was derived come cereals, and Rs. 3-0 from ghee, Rs. 2-6 from gingelly oil and Rs. 1-4 from pulses. The total monthly become increased from Rs. 163-9 to Rs. 173-13 and expenditure rose from Rs. 194-11 to Rs. 204-15. The ercentage expenditure on food changed from 41.2 to 44.2 per cent. of the total expenditure.

#### FUEL AND LIGHTING.

Finewood, charcoal, kerosene, match box and electricity are the chief items in this group which be better account for a little over 96 per cent of the total expenditure on 'fuel and lighting'. Firewood and harcoal together account for more than 82 per cent of the total expenditure. The average monthly expenditure per family on fuel and lighting is Rs. 10-7.

The estimated monthly expenditure and the average actual monthly expenditure on clothing on basis of four quarterly returns are shown in the table below for the purpose of comparison.

On an average, expenses on women's clothing are more than men's. Women folk of this part of country are more accustomed to use silk sarees for their daily wear than the women folk in other parts.

#### FURNITURE AND HOUSEHOLD REQUISITES.

The actual expenditure on this group is also shown along side the estimated expenditure for comparis

					Below Rs. 100	Rs. 100 to 150	Rs. 150 to 200	Rs. 200 to 250	Rs. 250 to 300	Rs. 300 & above	A grot
					Rs. as.	Rs. As.	Rs. as.	Rs. as.	Rs. as.	Rs. as.	Rs.
Estimated expenditure	• •	٤.	••	••	2 14	4 5	3 8	3 2	3 8	5 5	:
Actual expenditure	••	••	••	• •	1 6	2 7	6 3	4 14	3 11	5 12	1

In the first two groups, estimated expenditure on this item is more than the actual. In all other incompositions actuals exceed the estimates. Considering all income groups, however, the estimated monexpenditure which is Rs. 3-11, exceeds the actual slightly.

#### Housing.

Seventy four families pay rents. The remaining 23 families either live in self-owned or free hou Taking into account only those families who pay rents, it is found that 49 per cent of the families pay 16 between Rs. 5 and Rs. 15, 38 per cent. between Rs. 15 and Rs. 25 and 13 per cent. pay Rs. 25 or m (Table 12, page 107). It is found that the modal rent group is Rs. 10 to Rs. 14, in which about 38 per confide families lic. 78 families have given information regarding residential accommodation. It will be a from table 13 at page 108 that two-roomed houses are common amongst the first two lower income growhile three-roomed houses are more in use in the income group Rs. 200—250. There are 14 families occoing 4-roomed houses out of which 5 have self-owned houses. On the whole, about 40 per cent. of the families on an average 6.2 persons each, live in two-roomed houses, 29 per cent. of them with an average of 6.4 in three-roomed and 18 per cent. with an average size of 5.8 in four-roomed, 4 per cent. with an average of 4 persons in one-roomed and the remaining 9 percent families in five roomed houses or those have more than five rooms. 77 per cent. of the two-roomed houses occur in the first two lower income group The actual picture of overcrowding is presented more clearly in the table (14) at page 108 giving distribution of families by number of persons per room as in the table below

#### Distribution of families by number of persons per room.

Number of persons per room	••		••	••		12	2—3	, 3—4	То
Number of families	••	••	••			36	31	11	
Percentage of families	• •	••		••		46.2	39•7	14 · 1	10
					- 1			Prince 1	V

It shows that it 46 per cent. of families there are between 1 and 2 persons to a room. In 40 per cent the families there are 2 to 3 persons to a room and in 14 per cent. of the families the number of per to a room is between 3 and 4.

#### Distribution of families by number of adult male equivalents per room.

Number of equivalent a	dult	males per	room	••	••	••	٠.	 12	2-3	Total
Number of families	••	••	••	••	• •	••	• •	 67	11	78
Percentage of families	••	••	•	••	••	• •	••	 86	14	100

The percentage of families with between 1 and 2 equivalent adult males to a room is found to be about 86. The information relating to average number of persons per room and average floor space per person sleeping by income groups is given in table (16) at page 109. In the rented group average number of persons sleeping in a room is limited to 1.8 to 2.4 and the average floor space occupied except for the highest income group is neither much in excess nor much in deficit of 50 square feet per person.

#### EXPENDITURE ON 'MISCELLANEOUS'

The monthly expenditure on this item varies from Rs. 30-2 to Rs. 140-15 per family as between the lowest and highest income groups. The average monthly expenditure per family is Rs. 61-15 or about 32 per cent. (Table 17 at page 111).

Services.—The most important item of expenditure amongst services is the keeping of domestic servants, which varies from Rs. 2-0 to Rs. to 4-13 per month per family. Next in importance are the washing charges which vary from Rs. 2-9 to Rs. 4-15. The total monthly expenditure on services varies from Rs. 6-5 to Rs. 14-14.

Children's education.—The monthly expenditure varies from Rs. 2-5 to Rs. 14-11 per family. The average monthly expenditure per family is Rs. 6-14 i.e. about 11 per cent. of the total miscellaneous expenditure. In the lowest income group the expenditure is very insignificant for the obvious reason that this group contains young men with very few school-going children.

Religious ceremonies.—The average monthly expenditure on them varies from Re. 0-9 to Rs. 4-4 in different income groups. The average expenditure per month for all families comes to Rs. 1-7 or about 2-3 per cent. of the expenditure on this group.

Toilet requisites and other necessaries.—The average monthly expenditure on toilet requisites is Rs. 1-5 or about 2·1 per cent. As between the lowest and highest income groups the monthly expenditure varies from Re. 1-0 to Rs. 2-7. Other necessaries such as washing soap, account for expenditure ranging rom Re. 0-14 to Rs. 2-8. The average monthly expenditure on them is Rs. 1-6 per family.

Newspaper and entertainments.—The monthly expenditure on 'newspaper' varies from Re. 0-4 to Rs. 3-3 per family while that on entertainments from Re. 0-6 to Rs. 1-7 per family.

Club subscription.—The monthly expenditure on this item ranges from Re. 0-5 to Rs. 1-2. The average nonthly expenditure per family is Re. 0-7.

Postage.—The monthly expenditure on postage varies from Re. 0-4 to Rs. 1-7 per family. Average nonthly expenditure per family is Re. 0-9.

Medical charges.—The monthly expenditure on this item varies from Rs. 1-15 to Rs. 15-13 per family. The average for all families is Rs. 4-14 or about 8 per cent. of the total expenditure.

Holiday expenses.—Except for two income groups, the expenditure on this head is negligible. The verage for all families is only Re. 0-13.

Travelling.—In a city like Madras the expenditure on travelling to and from place of work is very usual, tranges from Rs. 1-7 to Rs. 8-12 per family per month. The average monthly expenditure is Rs. 3-2 er family or about 5 per cent.

Maintenance of own conveyance.—The average monthly expenditure is only Re. 0-6 per family and perfore is of little consequence.

Taxes.—It mainly consists of income tax. It will be found from the table that in the first two lower come groups, there is no income tax. In the highest income group the average payment on account this is Rs. 11-1. The average monthly payment of taxes for all income groups is Rs. 1-12.

Provident fund and insurance.—The average monthly expenditure (or rather savings) on this account mounts to Rs. 10-11 per family or 17.3 per cent. The amount of Provident Fund contribution and intrance premia, increases from the lowest income group to the highest, and monthly payment on this account ries from Rs. 4-15 to Rs. 35-2 per family.

Pansupari, cigarettes, tobacco.—Monthly expenditure on pansupari, cigarettes and tobacco does not ceed Rs. 2-10 in any of the income groups. The average expenditure is Rs. 1-12 per family i.e. less than per cent. of the total expenditure.

Debt disbursement.—From table 11 at page 107, it will be seen that about 68 per. cent of the families we shown payments on account of debt. The average monthly payment per family towards debt distrements is Rs. 11-7 only which is about 7 per cent. of the average monthly income of the family. Taking ly the indebted families, the average monthly payment towards debt disbursements is Rs. 16-14 only lich is about 10 per cent. of the average monthly income. 73 per cent. of families are indebt in the lowest ome group. There is a slight fall in the percentage of families in debt in the second group. But the thest percentage occurs in the third group viz. 81 per cent. Percentage then goes down and is only 44 per lat. in the highest income group (Rs. 250 to 300 income group has not been taken into account). The ratio debt disbursements to monthly income is the lowest in the highest income group and is only 6.2.

#### DELHI

Delhi city (New and Old) constitutes 9 per cent of the total sample selected. 465 individuals were ask to submit 4 quarterly budgets. In all, 448 effective budgets were received. They comprise all-four and no four budgets. A supmary table showing average monthly expenditure per family by items based these budgets have been prepared and annexed to the Report (Table 19—pages 134-137). The Report h been based on detailed analysis of 284 all-four budgets.

In order to test the adequacy of the sample studied, dispersion in the expenditure data has be worked out and is given below:—

	. \	When the	whole samp	ple is con-	7	When the sample is divided at random into two equal parts.				
* *		4 4	7 9			First part			ond part	
. , ""	*	M	ន	v	M <sub>1</sub>	8,	V <sub>1</sub>	M <sub>s</sub>	8,	v

#### DISTRIBUTION OF BUDGETS BY EXPENDITURE AND INCOME CLASSES.

The percentage of families by expenditure classes is given below :---

Expenditure classes.	Ra. 100 to 125	Rs. 125 to 150	Rs. 150 to 175	Rs. 175 to 200	Rs. 200 to 225	Rs. 225 to 250	Rs. 250 to 275	Rs. 275 to 300	Rs. 300 and above
Percentages.		2.9	5·6	11.2	11.2	5-6	5.6	11.2	46

About 3 per cent. of the families spend between Rs. 125 and Rs. 150 per month, about 17 per cereach between Rs. 150 and Rs. 200, Rs. 200 and Rs. 250 and Rs. 250 and 300 and 46 per cereapend—Rs. 300 or more.—The quartile values of the expenditure are given below:— .

First quartile = Rs. 211-3;
Median = Rs. 292.6;
Third quartile = Rs. 358.3.

This means that 50 per cent. of the families spend in round figures Rs. 293 or less, the upper 25 per cel of the families have a monthly expenditure of about Rs. 358 or more, the lower 25 per cent. an expediture of about Rs. 211 or less and the central 50 per cent. an expenditure of between Rs. 211 a 358.

The quartile value of the income in rupees are :-

First quartile = Rs. 198.9;

Median = Rs. 244.2;

Third quartile = Rs.  $327 \cdot 0$ .

The percentage distribution of families by income groups is shown below:—

Income groups.	Rs. 100 to 125	Rs. 125 to 150	Rs. 150 to 175	Rs. 175 to 200	Rs. 200 to 225	Rs. 225 to 250	Rs. 250 to 275	Rs. 275 to 300	Rs. 300 at above
Percentages	5.6	8-4	4.2	7-1	12.7	15-6	4.2	9.8	32.4

Fourteen per cent. of the families earn between Rs. 100 and Rs. 150, 11 per cent. earn between Rs. 150 and 200, about 28 per cent. between Rs. 200 and Rs. 250, about 14 per cent. between Rs. 250 at 300 and about 33 per cent. earn Rs. 300 or more.

It is found that about 42 per cent. of the families lie in the same expenditure and income gro 44 per cent. in expenditure classes above and 14 per cent. in expenditure classes below, the correspond income classes. (Table 1—126).

#### Composition of the family.

It will be seen from table (2) at page 126 that out of 71 families, 57 families i.e., about 80 per cent. natural and 20 per cent. joint families. The average number of persons living in the family is 6.2; being males 1.7 females, 1.5 boys and 1.3 girls. The average number of persons living away from famils 0.8; 0.2 being males and 0.3 females and 0.3 boys and girls who receive regular monthly remittar from the head of the family. The size of the family inclusive of dependants living away from famil 7.0. It will be seen from table (3) at page 126 that the number of persons per family increases from 4.1 the income group Rs. 100—150 to 6.7 in the income group Rs. 200—250, then falls to 4.6 in the next income group and again increases to 7.9 in the highest income level.

The average number of earners per family is 1.14, including the head of the fan Average number of non-earners including those living away from family is 5.86 i.e., about 16 per c

119,

he family members are earners and 84 per cents non-earners of whom about 44 per cent. are boys and girls 10 fitteen years of ages and about 27 per cent. are females above fifteen years of age. The number of ners per family varies from 1 to 1.45 as between the income groups. There is no famale earner in any ome group but the highest where the number of female earners is 10 per family (Table 4—page 127).

Some idea of the pressure of dependants on earning members can be had from table 5—page 127. number of dependants per earner increases from 3.8 persons in the income group Rs. 100—150 1.4 persons in the income group Rs. 200—250, then it decreases to 4.5 in the next higher income group again increases to 5.5 in the highest income group. It will be seen from the table that the earner in average family has to maintain 5.3 persons or 4.0 equivalent adults. The number of dependants earner in the family varies from 3.0 consumption units to 4.8 consumption units between the income ips.

The proportionate excess of expenditure over income of the family declines as one goes up the income ups, while the number of earners, except for initial decrease remains nearly constant until the highest me group is reached (Table 10—page 128) where the number shows a considerable increase.

### MODAL SIZE OF FAMILY.

About 28 per cent. of the families consist of 3 to 4 consumption units. They constitute the modal up, the modal value being 3 64 c. u.'s The median value is 4 40 c. u.'s (Table 7—page 127)

#### MONTHLY INCOME.

In all income groups pay and allowances account for about 90 per cent. of the family income (Table 9—8 128). The average income of the head of the family from pay and allowances is Rs. 257-9 per month from other sources such as land, investments etc. is Rs. 18-12 per month. The average earnings other members of the family work out to Rs. 9-12 per month. The total income of the family, therefore, ages Rs. 286-1 per month. 90 per cents of this sum on an average is derived from employment of the head to family. The contribution of the other members of the family towards carnings is very small being about 3.5 per cent. Income from other sources such as land, investments etc. is also very small being 6.5 per cent. of which the income from land alone accounts for about 3.5 per cent. The monthly me per family varies from Rs. 126-14 to Rs. 448-2. The monthly per capita income is Rs. 30-8 in income group Rs. 100 to 150 and Rs. 61-13 in the income group Rs. 250 to 300. In the next two ier groups per capita income is Rs. 36 and Rs. 40-5 respectively. In the highest income group per ta income is Rs. 56-11. The average monthly income is Rs. 46-2 per capita or Rs. 60-10 per c. u.

DISTRIBUTION OF EXPENDITURE BY INCOME-GROUP

#### TOTAL MONTHLY EXPENDITURE. .

The total monthly expenditure per family varies from Rs. 182-12 in the lowest income group to Rs. 417-13 in the highest and the average monthly expenditure per family is Rs. 301-8 when all income groups are taken into account. (Table below).

# CHART Expenditure by groups. (Figures in brackets show percentages.)

(-garden and productions)

						Total		182 12 (100)	206 14 (100)	270 10 (100)	299 6 (100)	417 1 <b>8</b> 100)	301 S (100)

Highest percentage expenditure on food (41.6 per cent.) occurs in the income group Rs. 150-200 hereas the lowest (37.0 per cent.) occurs in the highest income group. Percentage expenditure on clothing shows a downward tendency from 10.6 per cent. in the lowest group to 8.5 per cent. in the last but ne group. In the highest group it is only 9 per cent. Expenditure on housing, except for the income group 8.200 to 250 where the percentage expenditure is 9.4, fluctuates between 8.5 and 6.5 and is the lowest in 16 highest income group. This is perhaps due to the fact that most of the people in the higher income roup, now occupy quarters of lower type than those they are entitled to. On the other hand, percentage penditure on miscellaneous items which include luxury items such as toilet, amusements, holiday penses, etc., increases with income from 31.6 per cent. in the income group Rs. 150 to Rs. 200 to 41.1 per nt. in the highest income group. Furniture and household requisites show a narrow margin of fluctuation tween 2.3 and 3.6 per cent. except for the income group Rs. 150 in which expenditure on this em is only 0.8 per cent.

#### SURPLUS AND DEFICIT BUDGETS.

Budgets have been classified into surplus and deficit ones and their ratio to total number of budgets s been shown in the following table. It will be seen that 61 per cent. of the total number of budgets owed a deficit while only 39 per cent. showed a surplus (Table below).

		1	noome gr	ou <b>p</b> s.	Total budgets J	Surplus budgets 2	Deficit budgets 3	% of (2) to (1) 4	% of (3) to (1) 5

							Total		284	112	172	39	61

#### Non-regular expenditure.

Three families, one in the income group Rs. 100—150 and 2 in the highest income group, have shown penses on account of marriage. The total expenses shown on this account is little over Rs. 1,000 rehase of new cycles has been reported in two families showing an average expenditure of Rs. 150.

An expenditure of Rs. 115 due to funeral has also been reported by one of the families. Expenditure account of the purchase of buffalo for Rs. 300 has been incurred by one of the families. Only two family in the highest income group show an average expenditure of Rs. 220 under holiday expenses. The expenditure on these items has been excluded when working out the average expenditure on different head

#### EXPENDITURE ON FOOD.

#### Monthly expenditure on food articles per family—percentages.

								Rs- 100 to 150	Rs. I50 to 200	Rs. 200 to 250	Rs. 250 to 300	Rs. 300	All
Cereals	•••	••		••		••		16·2	16.3	18-1	15-1	16.7	16

						'Total		100-0	100.0	100.0	100.0	100.0	100.

From the above table, it is seen that the proportion of expenditure given to milk and fats is the highes being 40 per cent. of the total of food expenditure. Percentage of expenditure on cereals is 16.5, on frui and vegetables 17.4, on animal food 6.1, on miscellaneous food articles 13, on pulses 4.4, and on condimen and spices 2.6 per cent. Expenditure on cereals is 16.2 per cent. in the "income group Rs. 100-150" It gradually rises to 18.1 per cent. in the income group "Rs. 200-250". Thereafter it goes down to 15-per cent. in the next group to rise up to 16.7 per cent. in the highest income group. There is no large variation in the percentage expenditure on milk and fats. It may be noted that the highest proportion of expenditure on this item viz., 44.7 per cent. occurs in the lowest income group.

#### Monthly expenditure on food articles per family.

								Rs. 100 to 150	Rs. 150 to 200	Rs. 200 to 250	Rs. 250 to 300	Rs. 300 and above	All
								Rs. as.	Rs. as.	Rs. 450	Rs. 48.	Rs. as.	Rs.
Coreals	••	••	•••	••	-	••	••	12 4	13 14	19 1	17 1	25 14	19
Pulsos	••	••	••	••	••	••		3 9	3 9	4 2	4 5	6 3	4
Milk & fate	••	••	••	••	••	••	••	32 11	37 2	41 13	49 10	62 6	46
Fruits & vogetables	••	••	••	••	••	••	••	11 12	14 12	17 2	19 5	28 0	20
Condiments	••	••	••		••	••		1 11	2 15	3 11	4 6	4 0	3
Animal food	••	••	••	••	••	••	••	3 12	4 0	8 2	3 0	9 10	6 1
Miseellancous	••	••	••	••	••	••	••	7 15	9 11	11 1	15 13	18 8	14
						Total	••	73 10	85 15	105 0	113 8	154 9	114

From the above table, it is found that the total monthly expenditure on food per family varies from Rs. 73-10 in the lowest income group to Rs. 154-9 in the highest. The average monthly expenditure per family, considering all the income groups, is Rs. 114-9 out of which cereals, milk and fats and fruits and vegetables together account for Rs. 85-9 i.e., more than 74 per cent. of the total expenditure on food.

#### Monthly expenditure on food articles per c. u.

			Rs. 150 to 200	Rs. 200 to 250	Rs. 250 to 300	Rs. 300 & above	All grou
Monthly food expenditure (per family excluding outside meals)	••	Rs. as. 72 2	Rs. as. 83 10	Rs. as. 103 10	Rs. as. 108 6	Rs. as. 149 3	Rs. 4
Monthly food expenditure per consumption unit	••	22 5	19 8	20 14	31 8	27 2	24

It appears from the above table that the food expenditure per consumption unit is higher in the lower income group than in the next two higher income groups and that in the highest income group it is less that of the preceding one.

#### DIETARY HABITS

Wheat is the principal article of food. The percentage expenditure on wheat and wheat products om lowest to the highest income groups is 61, 57, 67, 65 and 56 respectively of the total expenditure on reals. The average consumption of wheat and wheat products is about 44.0 seers per family or 9 seers or consumption unit. Rice comes next in importance. The percentage expenditure on it is 33, 38, 31, and 42 respectively of the total expenditure on cereals. Consumption is about 19.7 seers per family or not 4 seers—per consumption unit.

Expenditure on milk and fats is higher than that on any other food groups. Milk is the most important em of consumption under this head followed next by glice. The percentage expenditure on milk varies tween 44 per cent. and 50 per cent. while that on ghee varies between 24 per cent. and 27 per cent. the total expenditure on milk and fats. The average monthly consumption of milk and glice is 46.0 ers and 3.2 seers respectively per family of 4.7 consumption units.

In the "fruits and vegetables" group, vegetables play a very important part in consumption. Fruits, very important protective food is found to be neglected. The percentage expenditure on fruits varies abetween the lowest and the highest income group from 13 per cent. to 32 per cent, and that on vegetables of tween 87 per cent. & 68 per cent, of the total expenditure on fruits and vegetables.

Potato is a major item of consumption under vegetables. The average monthly consumption of poto and onion is about 9.5 seers and 3.4 srs. respectively per family. The expenditure on animal food ries between 2.7 per cent. to 7.6 per cent. of the expenditure on food, and it shows that 'animal food' per not form an essential article of consumption in the dietary habits of the people.

Percentage expenditure on sugar, gur and raw sugar to total expenditure on food is given below:—

			Rs. 100 to 150	Rs. 150 to 200	Rs. 200 to 250	Rs. 250 to 300	Rs. 300 and above	All groups		
ıgar, refined		 	 		2.7	4.6	3.8	2.0	2.6	2.8
ggar, raw and gur	••	 	 		1.6	0.5	1.3	1.8	1.3	1.4
P <b>G.</b>	••	 	 • •	••	1.3	1.4	1.4	1.1	1.3	1.3

Monthly consumption of sugar and raw sugar, including gur is 7 seers and 3 seers respectively per mily (Tables 17 and 18, pages 130---134).

#### ESTIMATE OF MONEY VALUE OF MONTHLY CONCESSIONS RECEIVED PER FAMILY.

A statement showing the money value of concessions by income groups is given below :-

	Items				Rs. 100 to 150	Rs. 150 to 200	Rs. 200 to 250	Rs. 250 to 300	Rs. 300 and above	Average all groups	
eals		 • •		••	••	 Rs. As. 8 7	Rs. As. 5 15	Rs. as. 8 9	Rs. as. 4 4	Rs. As. 3 10	Rs. as. 5 0
806	••	 ••				 2 10	1 0	1 8	0 12	1 5	1 6
k	••	 	• •	••		 		0 9		0 12	0 6
∞ (including b	uiter)	 • •	• •			 1 11	18	••	1 0	1 11	1 2
(AP		 ••		••	••	 0 7					0 1
					Total	 8 3	8 7	10 10	6 0	7 6	7 15

The estimated money value of monthly concessions was the lowest (Rs. 6-0) in the income group Rs. 300 and the highest (Rs. 10-10) in the income group Rs. 200 250. The maximum amount of consion was derived from cereals in all income groups. The next concession item of importance was "pulses" lowed closely by ghee. There has been a concession of Re. 0-9 and Re. 0-12 in milk in the income groups .200-250 and Rs. 300 and above, respectively. The recipients of this concession are the employees of Indian ricultural Research Institute, New Delhi. Average estimated value of concession per family in Delhi nes to Rs. 7-15 per month of which Rs. 5-0 is derived from cereals, Rs. 1-6 from pulses Rs. 1-2 from ghee, .0-6 from milk and Rs. 0-1 from sugar. The net result of the concession is that the average income per aily is raised from Rs. 286-1 to Rs. 294-0 and average expenditure from Rs. 301-8 to Rs. 309-7 Expendre on food rises from Rs. 114-9 to Rs. 122-8 or from 38-0 per cent. to 39-5 per cent. of the total uthly expenditure.

#### FUEL AND LIGHTING

The average monthly expenditure per family is Rs. 14-6. More than 80 per cent. of the expenses is 'ered by firewood, charcoal and soft coke.

#### CLOTHING.

The estimated expenditure and the average actual monthly expenditure on clothing on the basis of a quarterly returns are shown in the table below for the purpose of comparison.

		Rs. 100	) to 150	Rs. 150	) to 200	Rs. 200	10 250	Rs. 250 to 300	Rs. 300 and bove	All group

The estimated monthly expenditure on clothing is Rs. 27-5 per family.

#### FURNITURE AND HOUSEHOLD REQUISITES.

The estimated and the actual expenditure on furniture and household requisites is shown in following table:—

						Rn. 100 to 150	Rs. 150 to 200	Rs. 200 to 250	Rs. 250 to 200	Rs. 300 and above	
Estimated expenditure	 ••	••	••		••	Rs. As. 1 9	Rs. As. 5 9	Re. As. 9 12	Re. As. 8 13	Rs. As. 9 8	Rs.
Actual expenditure	 ••	••	••	••	••	4 10	5 10	8 3	8 18	7 15	•

The estimated monthly expenditure per family is Rs. 7-14 while the actual expenditure is Rs. 6-4. Housing.

About 90 per cent. families pay rent: 4 per cent. live in rent-free quarters and the remaining 6 per cent families live in their own houses. Fiftytwo of the rent-paying families pay rent to the Governmen Railway authorities and the remaining to private landlords. Taking into a count only those families v pay rents, it is found that about 19 per cent. of the families pay rents between Rs. 5 and 15, 59 per cent. between Rs. 15 and 25, 13 per cent. between Rs. 25 and 35 and 9 per cent. between Rs. 35 and 50. (Table—12, p 129). It is found that the modal rent group is Rs. 15—19 in which there are about 45 per cent. of the famil

About 85 per cent. of families have given information regarding their residential accommodation. will be seen from the table 13 at page 129 that 43 per cent. of them live in three-roomed houses, 32 cent. in two-roomed houses, 18 per cent. in four-roomed houses and the remaining seven per cent. in croomed houses. Four-roomed houses are common only in the highest income group. About 38 cent. of the families occupying three-roomed houses falls in the highest income group.

The actual picture of overcrowding is presented more clearly in the table (14) at page 129 giving distribution of families by number of persons and number of rooms. In the two-roomed, three-room and four-roomed houses, percentages of families of more than six persons are respectively 37, 57 and 64.

A better insight into the degree of overcrowding is given by the distribution of families by number persons per room given in the table below and also in table 16 at page 130.

#### Distribution of families by number of persons per room.

Number of persons per room	••	••	••	••	•••	• •	••	1-2	23	34	Total
Number of families					··· <b>.</b>	••	• •	21	28	11	
Percentage of families	••	••	••	••		••	••	<b>\$5</b> 0	46-6	18-4	100

It shows that in a little less than 50 per cent. of the families there are between two and three persons t room.

#### Distribution of families by number of adult male equivalents per room.

Number of equivalent ad	ult male	per roon	n	••	••	••	••	••	]	1—2	2-3	3-4	To
Number of families	• •	••			••	••	••	••		40	17	3	
Percentage of families	• •	••	••	••	••	-	••	••		66-6	28.3	5.1	100

The percentage of families between 1 and 2 equivalent adult males to a room—is found to be about 67.

#### EXPENDITURE ON MISCELLANEOUS ITEMS.

The total monthly expenditure 'on miscellaneous items' varies from Rs.61-7 in the income group Rs. 100-150 to Rs. 171-15 in the highest. The average monthly expenditure per family amounts to Rs. 114-14 or 38 per cent.

Services.—Expenditure or domestic servants, varies from Rs. 1-7 to Rs. 6-15 per month per family. Washerman's charges range from Rs. 2-8 to Rs. 5-13. The total monthly expenditure on services varies from Rs. 7-12 to Rs. 16-12. The average monthly expenditure per family on this item is Rs. 12-12 or about 11 per cent. of the total expenditure on this group.

Children's education.—The monthly expenditure varies from Rs. 10-11 to Rs. 22-10 per family. The average monthly expenditure per family on this account is Rs. 14-13 i.e., about 12 per cent. of the total miscellaneous expenditure.

Religious ceremonies. - The average monthly expenditure on this item is Rs. 3-11.

Toilet requisites and other necessaries.—The average monthly expenditure on toilet requisites is Rs. 2-2 or 1-8 per cent. As between the lowest and the highest income groups the monthly expenditure varies from Re. 0-13 to Rs. 3. Other necessaries such as washing soap, tooth brush and tooth powder or paste account for the expenditure ranging from Rs. 1-8 to Rs. 3-13. The average monthly expenditure on them is Rs. 2-13 per family.

Newspaper and entertainments.—The monthly expenditure on newspaper varies from Re. 0-5 to Rs. 2-15 per family while that on entertainments from Re. 0-4 to Rs. 2-8. The average monthly expenditure on both is Rs. 3-2 per family.

Club subscription.--The monthly expenditure on this item ranges from Re. 0-5 to Re. 0-13; the average monthly expenditure per family is Re. 0-9.

Postage.—The monthly expenditure on postage varies from Re. 0-11 to Rs. 1-9 per family.

Medical charges.—The menthly expenditure on this item varies from Rs. 4-3 to Rs. 9-1 or is, on average Rs. 7-2 per family.

Holiday expenses.—The average monthly expenditure is Rs. 5-14 per family.

Travelling.—The average expenditure per family is Rs. 2-11. Monthly expenditure is the lowest n the highest income group and the highest in the income group Rs. 150-200.

Maintenance of own conveyance.—Public conveyance being inadequate in Delhi people have to depend nainly on cycles as means of conveyance; so the expenses under the head form a regular feature in almost ill the budgets. Monthly expenditure per family is the lowest in the income group Rs. 150—200 and the ighest in the last income group. Average monthly expenditure amounts to Rs. 1-11 only.

Taxes.—The monthly payment of taxes varies from Re. 0-11 in the income group Rs. 150—200 to Rs. 11-10 n the highest income group. The monthly average for all families is Rs. 5-14 or nearly 5 per cent.

Provident fund and insurance.—The average monthly expenditure (or rather savings) on this account mounts to Rs. 28-11 per family or 22 per cent. The amount of Provident Fund contribution increases rom Rs. 7-15 in the income group Rs. 150—200 to Rs. 34-9 in the highest. Insurance premium rises from Rs. 1-4 in the income group Rs. 150—200 to Rs. 13-14 in the highest income group. The amount of Proident Fund contribution and insurance premium in respect of income group Rs. 100—150 are Rs. 11-8 rd Rs. 1-6 respectively.

Remittances.—The average monthly remittance comes to about Rs. 6-1. It varies from Re. 0-3 in the name group Rs. 100—150 to Rs. 10-14 in the highest income group.

Pansupari.—The average monthly expenditure per family is Rs. 1-10 and varies from Re. 1-0 to is, 2-2 between the income groups.

Cigarettes and tobacco.—The monthly expenditure on cigarettes per spending family is Rs. 2 nd on tobacco Re. 0-6. The average monthly expenditure on cigarette and tobacco is Rs. 2-6 or 2·1 per ent. for all families and varies between Re. 0-7 to Rs. 3-9.

Debt disbursement.—About 40 per cent. of the families have shown payments on account of debt. The average monthly payment per family towards debt disbursements is Rs. 5-13 only which is about 2 er cent. of the average monthly income of the family. Taking only the indebted families, the average nonthly payment towards debt disbursements is Rs. 14-12 only which is about 5 per cent. of the average nonthly income. It is seen from table (11) at page 128 that the percentage of families in debt decreases com 60 per cent. in the lowest income group to 30 per cent. in the income group Rs. 250—300. The ercentage then goes up to 43 per cent. in the highest income group. The ratio of debt disbursement to nonthly income is the highest in the lowest income group and the lowest in the income group Rs. 250—300.

#### Bengal (excluding Calcutta) \* and Assam.

Bengal (excluding Calcutta) and Assam constitute about 7 per cent. of the total sample. In all, 366 persons were asked to submit four quarterly budgets. The total number of effective budgets received was 464 comprising all four and non-four budgets. A summary table showing a comparative study of these budgets is annexed to the Report (Table 19---page 159). The Report has, however, been based on the analysis of all-four budgets only.

In order to test the adequacy of the sample studied, the dispersion in the expenditure data has been worked out and is given below:--

		\ { 1-		whole san sidered.	ple is	When	the sample	is divided a	t random i	nto two equ	al parts
			м	8	v		First part		Sec	ond part

#### DISTRIBUTION OF BUDGETS BY EXPENDITURE AND INCOME CLASSES.

The percentage of families by expenditure classes is given below:—

Below Rs. 100	Rs. 100 to 125	Rs. 125 to 150	Rs. 150 to 175	Rs. 175 to 200	Rs. 200 to 225	Rs. 225 to 250	Rs. 250 to 275	Rs. 275 to 300	Rs. 300 & above
1.5	2.9	16.0,	13.0	10.2	8.7	10·1	7.2	8.7	21-7

About 20 per cent., of the families spend less than Rs. 150 per month, 23 per cent. between Rs. 150 and 200, 19 per cent. between Rs. 200 and 250, 16 per cent. between Rs. 250 and 300 and about 22 per cent. of them spend Rs. 300 or more. The quartile values of the expenditure in rupees are given below:—

First quartile = Rs. 158·8 Median = Rs. 218·4

Third quartile ' Rs. 290.5

The quartile values of the income in rupees are :-

First quartile Rs. 127.6

This means that 50 per cent. of the families spend in round numbers Rs. 218 or less, the upper 25 per cent. of the families have a monthly expenditure of about Rs. 290 or more and the lower 25 per cent. an expenditure of Rs. 159 or less. The central 50 per cent. incur an expenditure between Rs. 159 and Rs. 290.

The percentage distribution of families by income group is shown below;—

Below Rs. 100	Rs. 100 to 125	Rs. 125 to 150	Rs. 150 to 175	Rs. 175 to 200	Rs. 200 to 225	Rs. 22540 250	Rs. 250 to 275	Rs. 275 to 300	Rs. 300 & above
8,7	14.5	17-4	11.5	17•4	5.8	1.5	7.2	1.5	14-5

About 41 per cent. of the families earn less than Rs. 150, 27 per cent. between Rs. 150 and Rs. 200, 7 per cent. between Rs. 200 and 250, 12 per cent. between Rs. 250 and 300 and about 13 per cent. Rs. 300 or more.

It is found that about 29 per cent. of total families lie in the same expenditure and income classes, 66 per cent in the expenditure classes above and 5 per cent. in the expenditure classes below the corresponding income classes (Table 1—page 149).

### Composition of the family.

It will be seen from table 2 at page 149 that out of 69 families, 33 families i.e. 47.8 per cent. are natural families and 52.2 per cent. joint families. The average number of persons living in the family is 6.9; 1.9 being males, and 1.9 females, 1.6 boys and 1.5 girls. The average number of persons living away from family is 1.2; 0.4 being males and 0.5 females and 0.3 children. The size of the family inclusive of dependants living away from family is 8.1 (Table 3—page 149).

<sup>\*</sup>During the course of the enquiry, India was divided into Dominions of India and Pakistan. Pakistan territories falling within the area under review have been excluded and separate sets of statements have been prepared for West Bengal and Assam excluding Calcutte and appended to the Report.

It will be seen that the number of persons per family increases almost continuously from 4.4 persons in he lowest income group to 7.6 in the penultimate group, falling thereafter to 6.4 in the highest income roup.

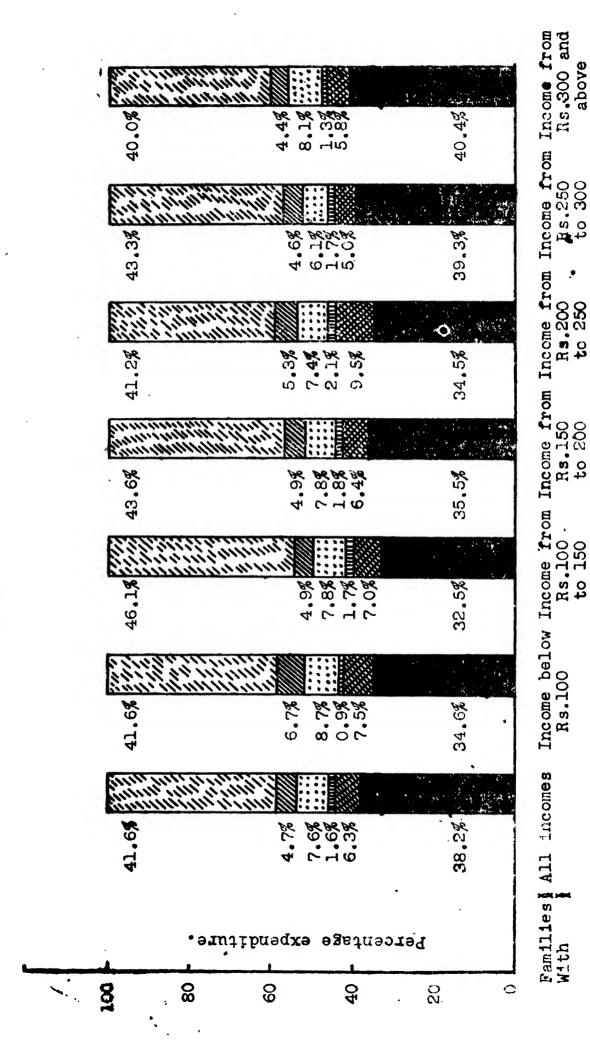

Average number of earners per family is 1·10, including the head of the family. Average number of on-earners including those living away from family is 7·0 i.e. about 14 per cent. of the family members are arrest and 86 per cent. non-earners of whom about 37 per cent. are boys and girls and about 33 per cent. re adult females. The number of earners varies from 1·0 in the lowest income group to 1·6 in the highest at one income group. The number of earners in the highest income group is 1·2. There are no female anners in any of the income groups (vide Table 4—page 150). The number of dependants per earner are assess from 4·3 persons in the lowest income group to 7·0 persons in the income group Rs. 150—200. he highest income group Rs. 300 and above has 5·4 persons per earner. It will be seen that the earner of average family has to maintain 6·2 persons or 4·8 equivalent male adults. Economic pressure seems be maximum in the income groups Rs. 100—200 and Rs. 150—200 wherein 5·4 equivalent male adults live a the earning of one man. Minimum pressure has been on the lowest income group where an earner has support 3·5 equivalent male adults (Table 5—page 150).

#### MODAL SIZE OF FAMILY.

About 20.3 per cent. of the families consist of 6 to 7 consumption units. They constitute the modal roup, the modal value being 6.48 c.v.'s. It is preceded by the median value of 5.41 c.u.'s (Table 7 -page 151).

### MONTHLY INCOME AND EXPENDITURE.

The average income of the head of the family from pay and allowances is Rs. 163-9 and from other sours such as, land, investments etc. is Rs. 31-0 per month. The average earning of other members of the mily works out to Rs. 3-12 per month. The total income of the family therefore averages Rs. 198-5 per conth. The greatest single source of income is the earning of the head of the family from pay and allowances accounting for 82 per cent. The average contribution of the other members of the family towards arnings is very small, being only about 2 per cent. Income from other sources such as, land, investments at is also very small being only 16 per cent. of which the income from the land alone accounts for about 8 er cent. In the lower half of the income groups, pay and allowances account for more than 80 per cent. In the lower half of the income group, pay and allowances account for, about 63 per cent. Sper cent. and 59 per cent. respectively in the income groups Rs. 200—250, Rs. 250—300 and Rs. 300 and hove. The monthly income per family varies from Rs. 81-6 to Rs. 410-6 while the monthly expenditure er family shows a variation from Rs. 134-3 to 410-6. The monthly income per capita in the various come groups varies from Rs. 17-13 to Rs. 64-2 while the monthly expenditure per capita varies from 8. 25-11 to Rs. 64-2. The average monthly income per c. u. varies from Rs. 23-2 to Rs. 82-1 and the average monthly expenditure per c. u. varies from Rs. 33-5 to Rs. 82-1. Deficit per c.u. varies from nil 18s. 15-1 per month (Tables 8 & 9—page 151).

Expenditure on food is the highest, being 41.6 per cent. of the total family expenditure and next comes scellaneous items with 38.2 per cent. The expenditure on food is 41.6 per cent. in the lowest income up in which family is also the smallest containing only 3.5 c.u.'s, as compared with 5 or more in each of remaining groups. In the next income group it is 46.1 per cent, and it gradually comes down to 40.0 cent, in the highest income group—with the exception of income group Rs. 250—300 in which it spurts to 43.3 per cent. Expenditure on fuel and lighting varies from 6.7 to 4.4 per cent. Expenditure on thing centres round about 7.6 per cent, of the total expenditure. Expenditure on housing also varies m 5 to 9.5 per cent. On the other hand, percentage expenditure on miscellaneous items marks a tinucus rise from 32.5 per cent, in the second income group to 40.4 per cent, in the highest. Furniture 1 household requisites also show a steady rise from 0.9 to 2.1 per cent, up to the fourth income group and on comes down to 1.3 per cent, in the highest.

#### SURPLUS AND DEFICIT BUDGETS

Budgets have been classified into surplus and deficit ones and their ratio to total number of budgets has in shown in the following table. It will be seen that deficits are 77 per cent. and surplus about 23 per cent.

	•	•				Total budgets (1)	Surplus budgots (2)	Deficit budgets (3)	Porcentage of (3) to (1)	Persontage of (8) to (1)

#### NON-REGULAR EXPENDITURE.

Seven out of 69 families under consideration reported expenditure of a non-regular nature. The lowest the highest income groups had incurred no non-recurring expenditure during the period under review. The income group Rs. 100-150 one family had to spend Rs. 208 on account of medical attendance and dicine for treatment of the wife of the head of the family; two families in the same group had to incure expenditure of Rs. 1,700 and Rs. 400 respectively for marriage. Two families in the next income group ured non-regular expenditure: one having spent Rs. 1,250 for marriage and the other Rs. 400 for riceing ceremony and illness taken together. One family in the income group Rs. 200 to 250 spent Rs. 95 tonsil operation. Lastly one gentleman in the income group Rs. 250 to 300 incurred an expenditure Rs. 183 in partial preparation of marriage of his daughter.

#### EXPENDITURE ON FOOD.

#### Expenditure on food-percentages.

	Food	groups.		•		Below Rs. 100	Rs. 100 to	Bc, 150 to 200	Rs. 200 to 250	Rs. 250 to:	Rs. 300 & above	Ali

				Total	••	100	100	100	100	100	100	

From the table given above it is seen that the proportion of expenditure given to milk and fats is the highest, being about 27.8 per cent. of the total of food expenditure. Next in importance is 'cereals' which accounts for about 23.7 per cent. of the food expenditure. Rice is the most important item in the 'cereals' sub-group.

Percentages of expenditure on other items are 16 for 'fruits and vegetables', 15·3 for animal food, 9 for 'miscellaneous food articles', 3·7 for pulses, and 3·8 per cent. for condiments and spices. Expenditure on cereals declines from 28·9 per cent. in the second income group to 16·2 per cent. in the last. The expenditure on 'milk and fats', on the other hand increases from 24·2 per cent. in the lowest group to 29 per cent. in the highest. The other two sub-groups under food which show increasing percentages are expenditure in the highest income group are 'animal food' and 'miscellaneous food articles' which represent 17·8 per cent. and 16·5 per cent. as against 13·0 per cent. and 10·2 per cent. in the corresponding groups of the lowest income category. Pulses record a decline in expenditure from 4·7 per cent. in the lowest income group to 2·3 per cent. in the highest.

#### DIETARY HABITS.

As regards dietary habits, rice is the staple article of food. The percentage expenditure on rice from 10 lowest to the highest income groups is 22·1, 22·7, 19·6, 19·7, 16·5 and 10·4 respectively of the total 20 expenditure while that on wheat, wheat flour and other wheat products together varies from 2·6 to 3. The average consumption of rice is 56 seers per family of 6·9 persons or 5·3 adult male equivalents and that of wheat and wheat products is 13 seers. The percentage expenditure on milk varies between 11 and 15 while that on ghee varies between 4 and 7. The average consumption of milk and ghee is 29 seers and 1·4 see:s respectively per family. The percentage expenditure on fruits varies between 1·3 and 3·4 and that on vegetables between 11 and 16 in the various income groups. A slight improvement in the 20 msumption of fruits is however noticeable in the highest income group. The average consumption of potato 20 and 20 onion per family is 11·7 seers and 3·0 seers respectively. In the 'animal food group', 'fish' is the 20 april 10 per cent. is accounted for by fish alone. The average consumption of fish is 6·7 seers per family.

Percentage expenditure on tea, sugar, gur and raw sugar is given below:—

	 			Below Rs. 100	Rs. 100 to 150	Rs. 150 to 200	Rs. 200 to 250	Rs. 250 to 300	Rs. 300 &	All

					Total	••	18	1	17	6	13	1	16	5	17	3	19	7	15

The amount of concession increased from Rs. 13-1 in the income group Rs. 150—200 to Rs. 19-7 in 1 highest income group. The major portion of the benefit was received from cereals. The average month concession amounted to Rs. 15-8 of which Rs.8-2 came from cereals, Rs. 2-2- from oil, Rs. 2-1 from potate Rs. 1-7 from pulses and Rs. 1-3 from ghee. The average income increased from Rs. 198-5 to Rs. 213-13 at the average expenditure from Rs. 239-4 to Rs. 254-12. The percentage expenditure on food rose from 41-6 to 45-1 per cent.

#### FUEL AND LIGHTING.

Firewood, soft coke, kerosene and match box account for about 78 per cent. of the total expendit on 'fuel in Highting'. Firewood and soft coke together account for more than 50 per cent. The aver expenditure per family is Rs. 11-5 or about Rs. 2-2 per consumption unit.

#### CLOTHING.

The estimated expenditure on clothing on the basis of four quarterly returns is shown in the tebelow for the purpose of comparison with the actual expenditure given therein.

	Be	low	Re. 1	00	Ra.	100	to 15	0	Rs.	150	to 200		Ro. 2	200	to 2	250	Rs	. 250	) to 3	00	F	ls, 3 abo	00 &			A	11

The estimated monthly expenditure on clothing per family is Rs. 18-3.

#### FURNITURE AND HOUSEHOLD REQUISITES.

The actual expenditure on this group supplied by the families is also shown along side the estima expenditure for comparison.

-		Below Rs. 100	Rs. 100 to 150	Rs. 150 to 200	Rs. 200 to 250	Rs. 250 to 300	Rs. 300 & above	All
Estimated expenditure	 ••	 Rs. As. 1 4 1 4	Rs. As. 3 2	Rs. As. 3 14 2 10	Rs. As. 4 15 4 15	Rs. As. 4 14 7 9	Rs. As. 5 8 13 10	Rs. 3

The estimated monthly expenditure is Rs. 3-12 per family or Re. 0-12 per consumption unit while actual expenditure per consumption unit is Re. 0-14 per month.

#### Housing.

Seventy four percent, of the families pay rems. The remaining 26 percent, either five in self-owned puses of tree-houses. Taking into account only those families who pay rents, it is found that about 35 per ent, of the families pay rents below Rs. 10, 20 per cent, between Rs. 10 and Rs. 15 and 15 percent. Rs. 16 above (Table 12—page 152). Forty-two families have given information regarding their residential accomplation. It will be seen from the table (13) at page 153 that two-roomed houses are common amongst all income groups. On the whole, 55 per cent, of the families live in two-roomed houses, 16.7 per cent, in pre-roomed and 9.5 per cent, of the families in one-roomed and the rest in houses of four or more rooms.

A better in-sight into the degree of over-crowding is given by the distribution of families by number i persons per room as in the table below :--

### Distribution of families by number of persons per room.

ımber of persons per roo	10					-1-2	<b>2</b> —3	3-4	Total
mber of families	••	••	••	-	••	 9	17	16	42
reentage of families	••	••	•	••	••	 21	40	<b>3</b> 9	100

It shows that about 40 per cent. of the families are those who accommodate between two and three arons to a room and 39 per cent, three to four persons to a room.

## Distribution of families by number of adult male equivalents per room.

aber of equivalent adult	males p	er room		·			1—2	2—3	Total
umber of families	••	••	• •	••	••		18	24	42
rcentage of families	••	••	••	• •	••		43	57	100

It will be seen from the above table that 57 per cent. of the families have only one room each for 2 3 adult male equivalents.

#### EXPENDITURE ON "MISCELLANEOUS"

The average expenditure under this group is Rs. 91-7 or 38:2 per cent. of the total expenditure per family de table 17—pages 154-157). It varies from Rs. 46-6 per family in the lowest income group to Rs. 165-9 the highest.

Services. -- Expenditure on account of wages of domestic servants valies from Rs. 2-12 to Rs. 13-4 t menth per family. Next in importance are the washing charges which vary from Rs. 1-11 to Rs. 5-11. e total monthly expenditure on services varies from Rs. 6-12 to Rs. 27-0. The average monthly penditure per family is Rs. 11-14 or 13-per cent. of the total imiscellaneous expenditure.

Children's education.—The monthly expenditure and e. this head varies from Rs. 3-1 to Rs. 22-10 r family. The average monthly expenditure per family in Rs. 11-14 in about 13 per cent. of the total scellaneous expenditure. The average monthly expenditure on this item per spending family is Rs. 13-8.

Religious ceremonies.—The average monthly expenditure on them has been Rs. 3-0 or about 3-3 cent. Considering only those families who spent on this item, the average expenditure per month or mes Rs. 4-0.

Toilet requisites and other necessaries.—The average expenditure on toilet requisites is Rs. 2-14 of 3-1 cent. As between the lowest and highest income groups the monthly expenditure varies from Rs. 2-3 Rs. 4-11.

Other necessaries, such as washing soap, tooth brush, tooth pewder or paste, account for an expendituranging from Rs. 1-9 to Rs. 3-8. The average monthly expenditure on them is Rs. 1-14 per family.

Newspaper and entertainments.—The monthly expenditure on newspaper varies from Re. 0-10 | Rs. 3-2 per family while that on entertainments from Re. 0-3 to Rs. 2-0. The average monthly expenditu on both is Rs. 2-4 per family.

Club subscription.—The monthly expenditure on this item ranges from Re. 0-4 to Rs. 1-2. Average monthly expenditure per family is Re. 0-11.

Postage.—The monthly expenditure on postage varies from Re. 0-8 to Rs. 1-5 per family. Average monthly expenditure on this item is Re. 0-14 only.

Medical charges.—The monthly expenditure on this item varies from Rs. 1-12 to Rs. 14-1. Average expenditure per family is Rs. 6-4 and accounts for about 6.8 per cent. of the total miscell neous expenditure.

Holiday expenses.—The average monthly expenditure is Re. 0-13 per family or about 1 per cent. varies from Re. 0-1 to Rs. 1-13 between the income groups.

Travelling.—The monthly expenditure on travelling ranges from Re. 0-6 to Rs. 2-9 per family p month. The average monthly expenditure is Rs. 1-1 per family or about 1.1 per cent.

Maintenance of own conveyance.—The average monthly expenditure is only Re. 0-11 per family or about one cent. As between the groups it varies from Re. 0-4 to Rs. 1-2.

Taxes.—The monthly payment of taxes per family varies from Re. 0-15 in the income group. Rs. 150-200 to Rs. 5—15 in the highest income group. The average for all income groups comes to Rs. 1-or about 2 per cent.

Provident Fund and insurance.—The average monthly expenditure (or rather savings) on this accousamounts to Rs. 16-4 per family or 17.8 per cent. The amount of Provident Fund contribution continuous increases from Rs. 3-4 in the lowest income group to Rs. 14-4 in the highest. Insurance premium varifrom Rs. 2-0 to Rs. 11-13.

Remittances.—The average monthly remittance comes to about Rs. 8-14 or 9.7 per cent. The month remittance per remitting family is Rs. 16-2.

Pansupari.—About 80 per cent. of the families reported expenditure on this item. The average monthly expenditure comes to Rs. 1-8 for all families and varies from Rs. 1-2 to about Rs. 2-3. Taking only the expending families the average monthly expenditure comes to Rs. 1-13.

Cigareties and tobacco.—About 60 per cent. of the families have shown expenses on cigarettes and per cent. on tobacco. The monthly expenditure on cigarettes per spending family is Rs. 3-8 and tobacco Rs. 1-6. The average monthly expenditure on cigarettes and tobacco is Rs. 2-9 or 2.8 per cent fall families and varies between Rs. 1-2 and Rs. 5-8.

Debt disbursement.—About 67 per cent. of the families have shown payments on account of debt. To average monthly payment per family towards debt disbursements is Rs. 12-11 only which is about 6 per cent. of the average monthly income of the tamily. Taking only the indebted families the average monthly payment towards debt disbursements is Rs. 18-8 only which is about 9.3 per cent. of the average monthly income (Table 11—page 152). It is seen from the table that the percentages of families in debt decrease from 83.3 per cent. in the lowest income group to 57.9 per cent. in the income group Rs. 150—200. The percentage then goes up to 100 per cent. in the penultimate income group only to fall to 55.6 per cent. in the highest income group. The ratio of debt disbursements to monthly income is the highest in the Rs. 250—3 group and the lowest in the highest income group.

individuals. The number of effective budgets received from this area was 337 including both all-four and non-four budgets. A summary table showing the average monthly expenditure by items based on these budgets is annexed to the Report (vide table 19—pp. 189-192). The report is however based on the analysis of 240 all-four budgets.

In order to test the adequacy of the sample studied, the dispersion in the expenditure data has been worked out and is given below :---

When the	ie whole	sample	is considere	d.		Whe	n the samp	le is divide part	d at random s.	into two e	qual
						1	dirst part.		S	econd part

# DISTRIBUTION OF BUDGETS BY INCOME AND EXPENDITURE CLASSES.

The percentage of families by expenditure classes is given below:—

Below Rs. 100	Rs. 100 to 125	Rs. 125 to 150	Rs. 150 to 175	Rs. 175 to 200	Rs. 200 to 225	Rs. 225 to 250	Rs. 250 to 275	Rs. 275 to 300	Rs. 300 & above.
5.0	10-0	16.7	311.7	13.3	. 6.7	11.7	8.2	5.0	11.7

About 32 per cent. of the families spend less than Rs. 150 per month, 25 per cent. between Rs. 15 and 200, 18 per cent. between Rs. 200 and 250, 13 per cent. between Rs. 250 and 300 and 12 per cent. spen Rs. 300 or more. The quartile values of the expenditure are given below:—

First quartile = Rs. 126.5.

Median = Rs. 187.4.

Third quartile = Rs. 249.8.

This means that 50 per cent. of the families—spend in round numbers Rs. 187 or less, the upper 25 per cent of the families have a monthly expenditure of about 250 or more and the lower 25 per cent. on expenditure of Rs. 126 or less. The central 50 per cent, incur—an expenditure of between Rs. 126 and 250 or more.

The quartile value of the income in rupees are :-

First quartile =Rs. 97.5.

Median =Rs. 159.4.

Third quartile =Rs. 212.5.

The percentage distribution of families by income groups is shown below :-

Below Rs. 100	Rs. 166 to	Rs. 125 to	Rs. 150 to	Rs. 175 to	Rs. 200 to	Rs. 225 to	Rs. 250 to	Rs. 275 to	Rs. 300
	125	150	175	200	225	250	275	300	above.
25.0	8.3	11.7	13.3	10.0	6.7	5.0	5.0	3.3	11.

About 45 per cent. of the families earn less than Rs. 150, 23 per cent. between Rs. 150 and Rs. 20 about 12 per cent. between Rs. 200 and Rs. 250, 8 per cent. between Rs. 250 to 300, and 12 per cent. car Rs. 300 or more.

It is found that 40 per cent. of the families lie in the same expenditure and income classes, 52 per cent in expenditure classes above and 8 per cent. in expenditure classes below the corresponding income classe (Table 1, page 180).

# COMPOSITION OF FAMILY.

It will be seen from table (2) at page 180 that out of 60 families 65 per cent, are natural families and 35 p cent, joint families. The average number of persons living in the family is  $5 \cdot 7 : 1 \cdot 6$  being males,  $1 \cdot 7$  female  $1 \cdot 3$  boys and  $1 \cdot 1$  girls. The average number of persons living away from family is  $0 \cdot 4 : 0 \cdot 22$  being mal and  $0 \cdot 18$  females. The size of the family inclusive of dependants living away from family is  $6 \cdot 1$  (Table 3 page 181). It will be seen from table (3) that the minimum number of persons per family falls in the incomgroup Rs. 100—150, and the maximum number in the last but one income group.

Average number of earners per family is 1.12, including the head of the family. Average number of non-earners including those living away from family is 4.93, 3.5., about 20 per cent. of the family members are earners and 80 per cent. non-earners of whom about 50 per cent. are boys and girls and about 36 per cent. are adult temales. The number of earners varies from 1.1 in the lowest income group to 1.1 in the last but one. There are female earners in the income groups Rs. 100—150, Rs. 150 to 200 and Rs. 250 to 300 in which their number is only .08, .07 and .20 per family respectively.

Some idea of pressure of dependants on earning members can be had from table 5, page 181. The number of dependants per earner varies from 3.7 persons in the income group Rs. 100—150 to 6.1 persons in the income group Rs. 300 and above. It will be seen from the table at page 181 that the earner of an average family has to maintain 4 to 6 persons or 3 to 5 equivalent adults. The number of dependants per earner in the average family varies from 3.0 consumption units in the income group Rs. 100—150 to 4.7 in the income group Rs. 300 and above. The number of dependants per earner is 5.1 persons or 4.0 c.u. s. in the lowest income group. The proportionate excess of expenditure over income of the family declines as one goes up the income groups, while the number of earners shows an alternate increase or decrease. Table 10, page 183).

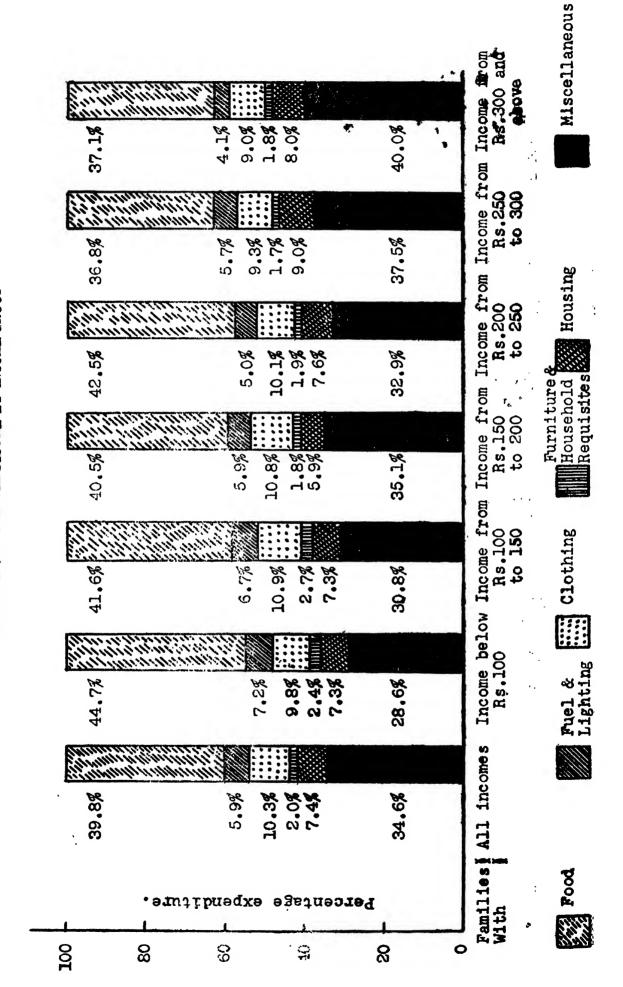

# MODAL SIZE OF FAMILY.

About 33 per cent, of the families consist of 3 to 4 consumption units. They constitute the modal group, the modal value being 3.48 c.u.'s followed by the median value of 3.35 c.u.'s. (Table 7, page 182).

# MONTHLY INCOME AND EXPENDITURE.

The average monthly income of the family consists of the salary and allowances of the head of the family and other members and the income from other sources such as, land, investments, contributions from relaives etc. The average income of the head of the family from pay and allowances is Rs. 166-7 per month and rem other sources is Rs. 14-4 per month. The average carning of other members of the family works out to 3s. 3-2 per month. The total income of the family therefore aggregates Rs. 183-13 per month. The greatest ingle source is the income of the head of the family from pay and allewances which account for 90 per cent. The contribution of the other members of the family towards earnings is very small, being only about 2 per cent. nome from other sources such as land, investment etc. is also very small being only 8 per cent. In all ncome groups except the highest, pay and allowances account for more than 90 per cent. of the family ncome. In the highest income group pay and allowances account for about 79 per cent. of the total family ncome, other income claiming about 21 per cent. of the total income. The monthly income per family varies from Rs. 85-1 to Rs. 407-6 while the monthly expenditure per family ranges from Rs. 124-4 to Rs. 418-5. The monthly income per consumption unit in the various income groups varies from Rs. 19-13 to Rs. 86-11 while the monthly expenditure per consumption unit varies from Rs. 29-0 to Rs. 89-0. Among the income roups the deficits vary from Rs. 9-3 per c.u. in the lowest group to Rs. 2.5 in the highest group. (Tables 3 & 9, pages 182 -- 183).

DISTRIBUTION OF EXPENDITURE BY INCOME-GROUP

# CHART.

#### TOTAL EXPENDITURE BY GROUPS WITH PERCENTAGES.

				•			Below Rs. 100	Rs. 100 to 150	Rs.150 to 200	Rs. 200 to 250	Rs. 250to 300	Rs. 300 & above	All

Expenditure on food is the highest being 39.8 per cent. of the total family expenditure and next comes miscellaneous items, with 34.6 per cent. As between the lowest and the highest income groups, the expenditure on food falls from 45 per cent. to 37 per cent. and on fuel and lighting from 7 per cent. to 4 per cent. Expenditure on clothing is 9.8 per cent. in the lowest group, it then rises to 10.9 per cent. in the following income group and then reveals a declining tendency going down to 9.0 per cent. in the highest income group. Expenditure on housing has been erratic; it is slightly above 7 per cent. in the first two groups, then it falls to 5.9 per cent. in the following group to rise upto 9 per cent. in the last but one income group whereafter it comes down to 8 per cent. in the highest. Percentage expenditure on miscellaneous items increases with increasing income with a slight set-back in the fourth income group. Furniture and household requisites remain almost steady at about 2.0 per cent.

### SURPLUS AND DEFICIT BUDGETS.

On classification of budgets into surplus and deficit ones as given below it is found that 80 per cent. of the total families show deficit and only about 20 per cent. show surplus.

		1	Income g	groups.					Totel budgets	Surplus <b>budgets</b>	Deficit <b>budgets</b>	% of 2 to	% of 3 to
									1	2	3	4	5

						All 8	roups		240	48	192	20	80

# Non-regular expenditure.

Out of 60 families under consideration, only four reported non-regular expenditure. There was no incidence of non-regular expenditure in the income groups "below 100"—and Rs. 300 and above. The intermediate groups had each one incidence of such expenditure. A family in the income group Rs. 100—150 had to make presents worth Rs. 150 on the occasion of a marriage. Another family in the next income group had to see through a marriage which cost Rs. 1500. Serious illness befell a family in the income group Rs. 200—250 and Rs. 75 had to be spent on medicine etc. A similar trouble occurred in the fourth family, in the income group Rs. 250—300 and Rs. 214/12/- had to be spent for medical attendance and medicine.

# Expenditure on food.

# Monthly expenditure on food articles—percentages.

		Food gro	u <b>ps</b>			Below Rs.	Rs. 100 to 150	Ra. 150 to 200	Rs. 200 to 250	Rs. 250 to 300	Rs. 300 and above	All

The estimated monthly expenditure on clothing is Rs. 21-13 per family or Rs. 4-15 per consumption unit. The estimated monthly expenditure on clothing per man is Rs. 5-6, per woman Rs. 4-9 and per clike Rs. 2-3.

# FURNITURE AND HOUSEHOLD REQUISITES.

The actual expenditure on this group supplied by the families is also shown alongside the estimated expenditure for comparison.

			 Below Rs.	Rs. 100 to 150	Rs. 150 to 200	Rs. 200 to 250	Rs. 250 to 300	Ra. 300 & above	All
			Ru. As.	Rs. As.	Rs. As.	Ra. As.	Rs. As.	Rs. As.	Ra. At
Retimated expenditure	••	٠	2 15	4 4	3 13	4 8	5 1	7 8	4 :
Actual expenditure			 1 8	1 15	3 15	3 14	3 6	7 12	3 ;

The estimated monthly expenditure is Rs. 4-2 per family or Re. 0-15 per consumption unit while the actual expenditure per consumption unit is Re. 0-12 per month.

# Housing.

Eighty per cent. of the families pay rents. The remaining 20 per cent. either live in self-owned or fr houses. Taking into account only those families who pay rents, it is found that 37 per cent. of the familipay as rent less than Rs. 9; 38 per cent. between Rs. 10 and Rs. 19; 17 per cent. between Rs. 20 and Rs. 2 and 8 per cent. over Rs. 30 (Table 12, page 184). The modal rent group is Rs. 5 to 9 in which abo 33 per cent. of the families lie. Forty five families have given information regarding their resident accommodation. It will be seen from the table that two-roomed houses are common amongst the incomproups "Below Rs. 100" and Rs. 150-200 while three-roomed houses are more in use in other incomproups. (Table 13, page 184). Forty per cent. of the families containing on an average 5.8 persons ealive in two-roomed houses, 33 per cent. of them with an average size of 5.5 persons in three-roomed and per cent. with an average size of 6.2 in four-roomed, 9 per cent. with an average size of 5.7 persons houses of five or more rooms (Table 14, page 184). The actual picture of overcrowding is presented me clearly in the table 14, at page 184 giving the distribution of families by number of persons and number rooms. It may be noted that no family has one-roomed house. In the two-roomed, three-roomed, for roomed and other houses, percentages of families of six or more persons are respectively, 55.6, 47-0, 50 and 25.0. A better insight into the degree of overcrowding is given by the distribution of families number of persons per room as in the table below:—

# Distribution of families by number of persons per room.

Number of persons per room	••	••		٠	••	••	 ų 1—2	2—3	3 & above	Tota
Simmber of tamilies	••	••	••		••	••	 22	17	6	
Perrentage of families	••	••	••	••	••	••	 80	38	12	
							y (1)			

# Distribution of families by number of adult male equivalents per room.

iumber of equivalent adult male	s per roo	m					• •		1-2	2-3	Total
tamber of immice	• •	• •	• •						38	7	45
bercentage of families	• •	• •	• •	• •	• •	• •	• •		84	16	100
								- 1	!		

Average number of persons per room and average floor space per person are given in table 16, at 185. But information in this respect is so meagre and incomplete that this will provide a very doubtful relax of overcrowding.

# EXPENDITURE ON "MISCELLANEOUS".

The average expenditure under this head is Rs. 72-9 or 34-6 per cent. of the total monthly expenditure puble 17, pages 185—188). The monthly expenditure per family varies from Rs. 35-8 in the lowest acome group to Rs. 167-7 in the highest.

Services. The wages of domestic servants alone varies from Rs. 1-14 to Rs. 14 11. The total nonthly expenditure on all services varies from Rs. 4-14 to 26-7. The average monthly expenditure on

ervices per family is Rs. 9-10 or 13-3 per cent. of the total miscellaneous expenditure.

Children's education.—The monthly expenditure varies from Rs. 1-1 to Rs. 26-10 per family. The average nonthly expenditure per family is Rs. 7-4 i.e. about 10.0 per cent. of the total miscellaneous expenditure. The average monthly expenditure on this item per spending family is about Rs. 11-1.

Religious ceremonies.... The average monthly expenditure on them has been Rs. 2-0 or about 2.7 per ent.; considering only those families who spend on this item, the average expenditure per month comes

o Ra. 2-12.

Toilet requisites and other necessaries.—The average expenditure on toilet requisites is Rs. 1-3 or 1-8 per ent. As between the lowest and highest income groups the monthly expenditure varies from Re. 0-13 o Rs. 3-0.

Other necessaries such as, washing soap, tooth brush, tooth powder or paste account for the expenditure anging from Rs. 1-5 to Rs. 4-8. The average monthly expenditure on them is Rs. 2-7 per family or 3-2 per cent.

Newspaper and envertainments.—The monthly expenditure on newspaper varies from Re. 0-7 to Rs. 3-6 per family while that on entertainments from Re. 0-9 to Rs. 7-7. The average monthly expenditure on both sRs. 2-13 per family or Re. 0-10 per consumption unit.

Club subscription.—The monthly expenditure on this item ranges from Re. 0-6 to Rs. 2-11: the average

nonthly expenditure per family is Re. 0-13.

Postages.—The monthly expenditure on postage varies from Re. 0-10 to Rs. 1-12 per family. The noutbly expenditure per family is Re. 0-14 only.

Medical charges.—The monthly expenditure on this item varies from Rs. 3-11 to Rs. 9-7 per family or Rs. 1-6 per consumption unit and accounts for about 8 per cent, of the total miscellaneous expenditure.

Hiliday expenses.—The monthly expenditure on this item varies from Re. 0-2 is to Rs. 3-6 between the income groups. The average monthly expenditure is Rs. 1-7 per family.

Travelling.— It ranges from Re. 0-1 to Re. 1-10 per family per month. The average monthly ex-

penditure is Rs. 1-1 per family or about 1.4 per cent.

Maintenance of own conveyance.—There has been no expenditure on this account in the income group below Rs. 100. The average monthly expenditure is only Re. 0-6 per family or about \*02 per cent.

Taxes.—The payment on account of taxes ranges from Rs. 1-12 in the income group Rs. 150-200 to Rs. 9-7 per month in the highest income group. The average for all income groups is Rs. 2-8 or about 3 per cent.

Provident fund and insurance.—The average monthly expenditure (or rather savings) on this account amounts to Rs. 17-5 per family or 23.8 per cent. The amount of Provident Fund contribution increases from Rs. 4-11 in the lowest income group to Rs. 22-14 in the highest. The insurance premium also ranges from Rs. 1-8 in the lowest income group to Rs. 14-15 in the highest.

Remittances .- The average monthly remittance comes to about Rs. 3-3 or 4.3 per cent. The monthly

remittance per remitting family is Rs. 10-9.

Pansupari.—About 72 per cent. of the families reported expenditure on this item. The average monthly expenditure comes to Rs. 1-5 for all families and varies from Re. 0-15 in the lowest to about Rs. 1-15 in the highest income group. Taking only the expending families the average monthly expenditure comes to Rs. 1-14.

Cigarettes and tobacco.—About 40 per cent, of the families have shown expenses on cigarettes and tobacco. The monthly expenditure on cigarettes per spending family is Rs. 1-15 and on tobacco Re. 0-5. The average monthly expenditure on cigarettes and tobacco is Rs. 1-4 or 1.7 per cent, for all families and varies between Re. 0-3 and Rs. 3-13.

Debt disbursement.—About 55 per cent. of the families have shown payments on account of debt. The average monthly payment per family towards debt disbursements is Rs. 8-0 only which is about 4 per cent. of the average monthly income of the family. Taking only the indebted families the average monthly payment towards debt disbursements is Rs. 16-7 only which is about 9 per cent. of the average monthly income.

It is seen from the table that the percentages of families in debt vary from 42 per cent. in the income group Rs. 100—150 to 80 per cent. in the income group Rs. 250—300.

The ratio of debt disbursements to monthly income is the highest in the income group Rs. 100—150 and the lowest in the income group Rs. 300 and above among families in debt (Table 11, page 183).

# MADRAS PROVINCE (EXCLUDING MADRAS CITY).

The area under consideration constitutes about 7 per cent. of the total sample selected. In all, 345 persons were asked to submit budgets from this area. The number of effective budgets received from this area was 518 including all-four and non-four budgets. A summary table based on the analysis of all these budgets is given in this Report (vide table 199, pp. 211-214). The Report on the other hand is based on the analysis of 440 all-four budgets.

In order to test the adequacy of the sample studied, the dispersion in the expenditure data has been worked cut and is given below :--

	When the	whole samp	le is taken			sample is di	ivide i into ta		ts.
					First part		Se	cond part

# DISTRIBUTION OF BUDGETS BY INCOME AND EXPENDITURE CLASSES.

The percentage of families by expenditure classes is given below :-

Belew Rs.	Ra. 100 to	Rs. 125 to .	Rs. 150 to	Rs. 175 to	Rs. 200 to 225	Rs. 225 to	Rs. 250 to	Rs. 275 to	Ra. 300 &
100	125	150	175	200		250	275	300	above
14-5	13-6	13.6	15.5	11.0	4.6	1.8	9·1	2.7	13.6

About 42 per cent. of the families spend—less than Rs. 150 per month, 26 per cent. between Rs. 150 and 200 6 per cent. between Rs. 200 and 250, 12 per cent. between Rs. 250 and 300 and about 14 per cent. of ther spend—Rs. 300 or more. The quartile values of the expenditure are given as follows:—

First quartile == Rs. 119.3.

Median = Rs. 163.4.

Third quartile = Rs. 251.1.

This means that 50 per cent, of the families spend in round numbers Rs. 163 or less, the upper 25 per cent of the families have a monthly expenditure of about Rs. 251 or more and the lower 25 per cent. an expenditure of Rs. 119 or less. The central 50 per cent, incur an expenditure of between Rs. 112 and Rs. 251.

The quartile values of the income are :--

First quartile == Rs. 90.7.

Median

=Rs. 137·3.

Third quartile =Rs. 193.2.

The percentage distribution of families by income groups is shown below :-

Below Bs. 100	Rs. 100 to 125	Re. 125 to 150	Rs. 150 to 175	Rs. 175 to 200	Rs. 200 to 225	Rs. 225 to 250	Rs. 250 to 275	Re. 275 to 390	Rs. 300 & above.
21.9	14-5	7.3	12.7	11-8	4.6	4.6	1.8	3.6	7-1

About 54 per cent. of the families earn less than Rs. 150, 24 per cent. between Rs. 150 and Rs. 200 per cent. between Rs. 200 and Rs. 250, 6 per cent. between Rs. 250, and 300 and about 7 per cent. Rt 300 or above.

It is found that about 33 per cent. of the families lie in the same expenditure and income classes 52 per cent. in expenditure classes above, and 15 per cent. in expenditure classes below, the corresponding income classes. (Table 1, page 202).

# Composition of the family.

It will be seen from table (2) page 202 that out of 110 families, 60 per cent. are natural families and 40 per cent. joint families. The average number of persons living in the family is 6; 1.50 being males, 2.00 females, 1.40 boys and 1.10 girls. The average number of persons living away from family is 0.60; 21 being males and .26 females, .08 boys and .05 girls. The size of the family inclusive of dependants living away from family is 6.60 (Table 3, page 202). It will be seen from the table that the number of persons per family increases almost continuously from 4.9 persons in the lowest income group to 8.2 persons in the income group Rs. 200 to 250 and then falls to 6.20 in the highest. Average number of carners per family is 1.17, (including the head of the family). Average number of non-carners including those living away from family is 5.43 i.e., about 18 per cent. of the family members are carners and 82 per cent. non-carners of whom about 40 per cent. are boys and girls and about 32 per cent. are addit temales (Table 4, page 203). The number of carners per family except in the income group is 1.06 and in the highest income group, is almost the same. In the lowest income group the number of dependants per carner increases almost gradually from 4.7 persons in the lowest income group to 6.4 persons in the income group Rs. 250 to 300. The highest income group has however 3.8 persons per carner. It will be seen from the table that the carner of an average family has to maintain 4 to 6 persons or 3 to 5 equivalent male adults. The dependants per carner in the average family vary from 3.7 consumption units in the lowest income group to 4.9 in the income group Rs. 250 to Rs. 300. The earner in the highest income group has to maintain 3.0 consumption units. The proportionate excess of expenditure over income of the family declines as and goes up the income groups while the number of earner increases up to the income groups Rs. 200—250 and then falls abruptly only to rise to 1.62 in the highest income group. (Tab

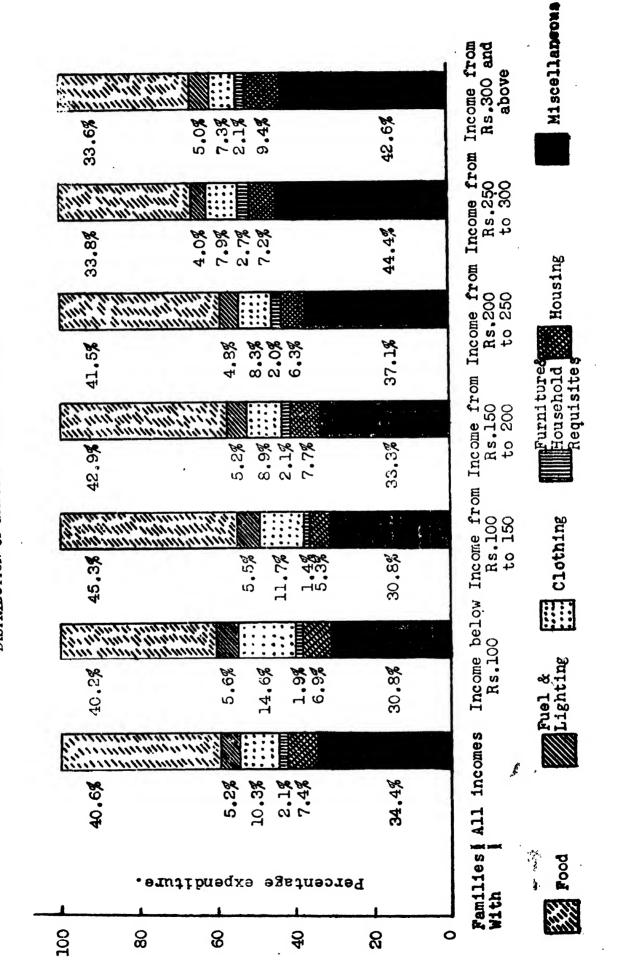

# MODAL SIZE OF FAMILY

About 29 per cent. of the families consist of 4 to 5 consumption units. They constitute the modal group, the modal value being 4°39 c.u.'s which is followed by the median value of 4°50 c.u.'s. (Table 7, page 204).

# MONTHLY INCOME AND EXPENDITURE

The average income of the head of the family from pay and allowances is Rs. 139-7 per month and from other sources is Rs. 14-3 per month. The average earning of other members of the family works out to Rs. 5-12 per month. The total average income of the family therefore amounts to Rs. 159-6 per month. The greatest single source is the earning of head of the family accounting for 87 per cent. The contribution of the other members of the family towards earnings is very small, being only about 4 per cent. Income from other sources such as land, investments etc. is also very small being only 9 per cent. of which the income from the land alone accounts for about 5 per cent. The monthly income per family varies from Rs. 81-8 to Rs. 388-9 while the monthly expenditure per family shows a variation from Rs. 114-7 to Rs. 356-7. The monthly income per capita in the various income groups varies from Rs. 16-10 to Rs. 62-11 while the monthly expenditure per capita varies from Rs. 23-6 to Rs. 57-8 and the average monthly expenditure per c.u. varies from Rs. 29-5 to Rs. 74-4. Among the income groups, the deficit is the highest, viz., Rs. 9-8 per c.u. in the income group Rs. 150 – 200, and the lowest viz., Rs. 2-8 per c.u. in the following group. There is a surplus of Rs. 6-11 per c.u. in the highest income group. (Tables 8 and 1, page 204).

DISTRIBUTION OF EXPENDITURE BY INCOME-GROUP

The percentage expenditure on food except for an initial increase declines from 40·2 in the lowest come group to 33·6 in the highest. Expenditure on fuel and lighting also decreases from 5·6 per cent. the lowest to 4·0 per cent. in the fifth and then rises to 5·1 per cent. in the highest. Expenditure on thing declines from 14·6 per cent. in the lowest income group to 7·3 in the highest. Expenditure on using varies between 5·3 per cent. and 9·4 per cent. On the other hand, percentage expenditure on scellaneous items increases from 30·8 per cent. in the lowest income group to 44·4 per cent. in the highest tone income group. Furniture and household requisites show a small fluctuation between income groups.

## SURPLUS AND DEFICIT BUDGETS.

Budgets have been classified into surplus and deficit ones and it will be seen from the following table tabout 80 per cent. of the total budgets show deficits and only about 20 per cent. surplus.

	Īn	rome gro	oups.		Total budgets (1)	Surplus budgets (2)	Deficit budgets (3)	Percentage of (2) to (1) (4)	Percentage of (3) to (1)

#### NON-REGULAR EXPENDITURE.

Expenses on marriage, stadh, sacrificial ceremonies, trip to holy places and medical expenses incurred ricus or prolonged illness etc. have been taken under non-regular expenditure. Only one family recolor involving an expenditure of Rs. 900. An expenditure of Rs. 315 on presents for marriages to families, had been reported. There had been a case of sacred-thread ceremony involving an expenditure of Rs. 700, one case of illness involving a sum of Rs. 50 and another case of visiting holy places for which a of Rs. 85 is reported to have been spent.

# EXPENDITURE ON FOOD.

# Monthly expenditure on food articles—percentages.

					'Total		100 *	100	100	100	100	100	jul

From the table above it is seen that the proportion of expenditure given to cereals is about 20 pc cent. of the total of food expenditure. Milk and fats account for the highest expenditure in the group ciz about 40.8 per cent. Percentages of expenditure on other items are 11.8 for "fruits and vegetables", 6. for "condiments", 5.3 for "pulses", 4.0 for animal food and 11.8 for miscellaneous food articles. I between the lowest and highest income groups, the expenditure on cereals declines from 25.7 per cent. 16.0 per cent. of the total food expenditure. Fluctuations in the percentage expenditure on "milk an fats" are not very large among the income levels and vary within the range 37—44 per cent. In fruits at vegetables except for the highest income group, the percentage expenditure shows a small variation. Proportions of expenditure on animal food are the smallest.

The table below shows food expenditure by income groups. Monthly expenditure on food variation Rs. 48-2 in the lowest income group to Rs. 124-14 in the highest. Average expenditure per family Rs. 75-1 only.

DIETARY HABITS (Tables 17 & 18, pages 207-210).

The percentage expenditure on rice from the lowest to the highest income groups is 92, 88, 80, 87, 76 at 83 respectively of the expenditure on cereals or 24, 18, 16, 16, 13, and 14 of the total expenditure on cereals. The average consumption of rice is 38.8 measures per family of 4.6 consumption units. Consumption of wheat and wheat products was 3.9 measures per family. Monthly consumption of pulses per mily is about 7 measures in all income groups except in the income groups Rs, 100--150 and Rs. 200--250 which the monthly consumption is 10 and 12 measures respectively. Considering all income groups, the verage monthly consumption of pulses is 8 measures per family. The percentage expenditure on milk is sout 45 while that of ghee is 17 of the expenditure on "milk and fats" and 20 and 7 respectively of the chediture on food. The average monthly consumption of milk is 22 measures per family. Monthly nesumption of potatoes per family varies from 1 viss in the lowest to 5 viss in the highest income groups he average for all income groups is about 2 viss. As between the lowest and highest income groups the onthly consumption of onions varies from 1.5 viss to 4, the average for all income groups being about viss. Expenses on animal food are insignificant in most of the income groups. In the highest income roup only, the average expenditure on animal food per family is about Rs. 10 or 8 per cent. of the stal expenditure on food items. The average monthly consumption of coffee and tea is 2.27 lbs. and 39 lbs. respectively per family while the average consumption of refined sugar is 2.84 viss supplemented y raw sugar (.97 viss) and gur (1.43 viss).

Monthly expenditure on coffee & tea, sugar and gur and raw sugar are given below:-

				Below Rs. 190	Rs. 100 to 150	Rs. 150 to 200	Rs. 200 to 250	Rs. 250 to 300	Rs. 300 & above	All

					Total	 8 0	14 6	11 4	14 9	6 0	6 3	10 8

The maximum benefit from concession appears to have been enjoyed by the income group Rs. 200—250, ich derived Rs. 14-9 per month. The minimum benefit of Rs. 6-0 only was received by the income group 250—300. With the exception of income group Rs. 150—200, the major portion of benefit was derived by the income group Rs. 150—200 got the major portion of its benefit from pulses while cereals define were equally responsible for the major portion of benefit derived by the highest income group to average monthly benefit amounted to Rs. 10-8 of which Rs. 4-8 was derived from cereals, Rs. 2-2 mm pulses, Rs. 1-11 from gingelly oil and Rs. 1-10 from glace. The net effect of the receipt of this benefit ay be expressed by saying that the total monthly income per family increased from Rs. 159-6 to 1.169-14 and total monthly expenditure from Rs. 184-11 to Rs. 195-3. Food expenditure similarly rose mm Rs. 75-10 to Rs. 86-2 or was 41-1 per cent. of the increased total expenditure.

# FUEL AND LIGHTING

Firewood, charcoal, kerosene, match box and electricity are the important items in this group which together account for 95 per cent. of the total expenditure on 'fuel and lighting'. Firewood alone accounts for more than 56 per cent. of the total expenditure. The average monthly expenditure per family is Rs. 9-10

# CLOTHING.

The estimated expenditure and the average actual monthly expenditure on clothing are shown in the table below for the purpose of comparison.

				В	lelo 10	w I	łн.			. 100 150				150 200				s. 20 250				. 25 <b>3</b> 00			. 300 bove	g	All rouj

Actual monthly expenditure	••	••	••	1 4	3 10	2 2	2 15	7 8	7 2	2 15

The estimated monthly expenditure on furniture and house hold requisites is Rs. 4.0 per family.

### Housing.

Eighty per cent. of the families pay rents, of which 68 per cent. pay rent to the private landlords and 1 per cent. to the Government or Railway authorities. The remaining 20 per cent. live either in self-owne houses or free houses. Taking into account only those families who pay rents, it is found that 78 per cent of such families pay rents of less than Rs. 15, 10 per cent. between Rs. 15 and Rs. 20 and 12 per cent between Rs. 20 and above (Table 12, page 205). Eighty families have furnished information regardin residential accommodation. Twenty per cent. of the families with an average of 5.7 persons live in one roomed houses, 51 per cent. with an average of 5.3 persons in double-roomed, 13 with an average of 5 persons in three-roomed, and 16 per cent. with an average of 6.8 persons in houses, of four or mor rooms (Table 13, page 206). The actual picture of overcrowding is presented more clearly in the table 14 page 206, giving the distribution of families by number of persons and number of rooms.

A better insight into the degree of overcrowding is given by the distribution of families by number opersons per room as in the table below:—

# Distribution of families by number of persons per room.

Number of persons per i	room						12	. 23	3-4	Total
Number of families	••	•••	•••	••	•••	• •	22	50	8	8
Percentage of families	••	• •	••		••	. •	27 · 5	<b>62</b> ⋅5	ir)	190-

It shows that more than 60 per cent. of the families are those in which two to three persons live in room.

# Distribution of families by number of adult equivalents per room.

Number of equivalent adu	lt males p	er room.						1—3	2—3	Total
Number of families	••	••	••	••	••	••	••	44	36	80
percentage of families	••	••	••	••	••	•••		55.0	15.0	100

The percentage of families with 1 and 2 equivalent adult mates to a room is found to be 55. (Table 15, page 206).

EXPENDITURE ON 'MISCELLANEOUS'.

The monthly expenditure on this group per family varies from Rs. 34-9 to Rs. 157-4 between the lowest and the highest income groups. The average monthly expenditure is Rs. 63-8 per family. (Table 17, pages 207-210.)

Services.—The most important item of expenditure amongst services is the keeping of domestic servants, which varies from Rs. 1-3 to Rs. 8-7 per month per family. Next in importance are the washing charges which vary from Rs. 2-0 to Rs. 6-14. The total monthly expenditure on services varies from Rs. 4-12 to Rs. 17-11. The average monthly expenditure per family is Rs. 8-4 or about 12 per cent. of the total expenditure on this group.

Children's education.—The monthly expenditure varies from Rs. 2-10 to Rs. 20-7 per family. The average monthly expenditure per family is Rs. 7-2 i.e. about 11 per cent. of the total miscellaneous expenditure.

Religious ceremonies.—The average monthly expenditure on them has been Rs. 1-13 or about 3 per cent. Between income groups, monthly expenditure ranges from Re. 0-1 to Re. 0-1.

Toilet requisites.—The average expenditure on toilet requisites is Rs. 1-6 or about 3 per cent. As between the lowest and highest income groups the monthly expenditure varies from Re. 9 13 to Rs. 2-14.

Newspaper and entertainments.—In the lower two income groups expenditure on newspaper is quite insignificant. In the last two income groups the monthly expenses per family are Rs. 2-3 and Rs. 2-9 respectively. Expenditure on entertainments in the highest income group is Rs. 2-11 per family.

Club subscription.—The highest monthly expenditure on this item is Re. 0-12 and it is in the highest income group. Average monthly expenditure is Re. 0-5 only.

Postage.—The monthly expenditure on postage varies from Re. 0-8 to Rs. 1-14 per family. The average expenditure is Re. 0-14.

Medical charges.—The monthly expenditure on this item varies from Rs. 3-9, to Rs. 9-8 per family or amounts on average to Rs. 5-3 or about 8 per cent. of the total miscellaneous expenditure.

Holiday expenses. -The average monthly expenditure is Rs. 1-1 per family. As between the income groups it varies from Re. 0-5 to Rs. 1-11.

Travelling.- The average monthly expenditure per family on this account is Rs. 1-1. It ranges from Re. 0-6 to Rs. 4-5 between the income groups.

Taxes.—As between the income groups the monthly payment of taxes per family varies between Re. 0-12 and Rs. 9-15. The monthly average for income groups is Rs. 1-7 or about 2 per cent.

Provident fund and insurance.—The average monthly expenditure (or rather savings) on this account mounts to Rs. 13-11 per family or about 21 per cent. of the total miscellaneous expenditure. The amount f Provident Fund contribution increases continuously from Rs. 4-4 in the lowest in one group to s. 25-14 in the highest. The insurance premium also shows a similar tendency and varies from Rs. 2-2 Rs. 17 respectively

Remittances.—The average monthly remittance comes to about Rs. 2-10. It ranges from Re. 0-14 the lowest income group to Rs. 8-3 in the highest.

Pansupari.—The average monthly expenditure comes to Rs. 1-3 only when all income groups are onsidered and varies from Re. 0-15 to Rs. 2-1 among the income levels.

Cigarettes and tobacco.—The average monthly expenditure per family is Rs. 1-1 and in the lower come groups it is below rupee one. In the highest income group expenditure on this account works at to Rs. 4-14.

Debt disbursement. About 71 per cert. of the families have shown payments on account of debt, he average monthly payment per family towards debt disbursements is Rs. 11-1 only, which is about per cent. of the average monthly income of the family. Taking only the indebted families the average nonthly payment towards debt disbursements is Rs. 15-9 only, which is about 10 per cent. of the verage monthly family income (Table 11, page 205). It is seen from the table that the percentage of milies in debt decreases from 89 per cent. in the lowest income group to 50 per cent. in the highest income group not the lowest income group.

#### I'UNJAB, SIND AND N.W.F.P. BLOCK\*

This block constitutes about 10 per cent. of the total sample considered. 518 persons were asked  $t_0$  submit budgets and in all 668 budgets were received, comprising all-fours and non-fours. A summary table showing the average monthly expenditure by items based on all these budgets is annexed  $t_0$  the Report at pages 234-237. The Report is however based on the analysis of 316 all-four budgets.

In order to test the adequacy of the sample studied, the dispersion in the expenditure data has been vorked out and is given below:—

				he whoic si conside <b>red</b>		When	the sample i	is divided at parts	t random int	to two equ	al

#### DISTRIBUTION OF BUDGETS BY INCOME AND EXPENDITURE CLASSES.

The percentage of families by expenditure classes is given below:—

Below Rs.	Rs. 100 to	Rs. 125 to	Rs. 150 to	Rs. 175 to	Rs. 200 to	Rs. 225 to	Rs. 250 to	Rs. 275 to 300	Rs. 300
100	125	150	175	200	225	250	275		and abou
2.3	7.6	5-1	3.8	12.7	7-6	11-4	10-1	2.5	36-7

About 15 per cent. of the families spend less than Rs. 150 per month, 16 per cent. between Rs. 16 - 200, 19 per cent. between Rs. 200 and Rs. 250, 13 per cent. between Rs. 250 and Rs. 300 and about 37 percent. of them spend Rs. 300 or more. The quartile values of the expenditure are given below:

First quartile = Rs. 186.8 Median = Rs. 247.9 Third quartile = Rs. 344.4

This means that 50 per cent. of the families spend in round numbers Rs. 248 or less, the upper 25 per cent. have a monthly expenditure of Rs. 344 or more, the lower 25 per cent. an expenditure of Rs. 187 less and the central 50 per cent. have a monthly expenditure of between Rs. 187 and Rs. 344.

The quartile values of the income in rupees are :-

First quartile = Rs. 141  $\cdot$  8. Median = Rs. 189  $\cdot$  7. Third quartile = Rs. 305  $\cdot$  7.

The percentage distribution of families by income group is shown below :--

Below Rs.	Rs. 106 to 125	:'s. ∴ 5 to 150	Rs. 150 to 175	Rs. 175 to 200	Rs. 200 to 225	Rs. 225 to 250	Rs. 250 to 275	Rs. 275 to 300	Rs. 300 ac
13.9	5.1	8-9	13.9	13.9	5-1	3.8	5·1	2.5	27.8

About 28 per cent, of the families earn less than Rs. 150, 28 per cent, between Rs. 150 and Rs. 26 9 per cent, between Rs. 200 and 250, 7 per cent, between Rs. 250—300 and about 28 per cen Rs. 300 or more.

It is found that about 37 per cent of the families lie in the same expenditure and income classes, to per cent, in expenditure classes above, and 9 per cent, in expenditure classes below, the corresponding income classes. (Table 1, page 225).

<sup>\*</sup>During the course of this Enquiry India was divided into the Dominion of India and the Dominion of Pakistan. The territories of I kistan falling in this block have been excluded and separate sets of statements have been prepared for East Punjab and appended to t Report. It may be noted that initially it was intended to treat Simla separately but owing to the paucity of budgets therefrom it was possible to do so. Budgets from Simla have, however, been included in East Punjab as the latter had not adequate number of budgets for analysis.

#### COMPOSITION OF FAMILY.

It will be seen from the table 2, page 225 that out of 79 families, 68 per cent. are natural and 32 per cent. joint families. The average number of persons living in the family is 6.5; 1.7 being males, and 1.6 females, 1.6 boys and 1.6 girls. The average number of persons living away from family is 0.56; .26 being males and .30 females. The size of the family inclusive of dependants living away from family is 7.1. It will be seen from the table 3, page 225 that the number of persons per family increases almost continuously from 4.8 persons in the lowest income group to 7.7 in the highest. Average number of earners per family is 1.39, including the head of the family. Average number of non-earners including those living away from family is 5.7 i.e., about 19 per cent. of the family members are earners and 81 per cent. non-earners of whom about 46 per cent. are boys and girls and about 22 per cent. are adult females (Table 4, page 226). The number of earners varies from 1.0 in Rs. 100—150 to 1.6 in the highest. There are no female earners except in the income groups Rs. 150—200 and Rs. 300 and above in which their number is only 0.14 and 0.04 per family respectively. The number of dependants per earner increases from 4.4 persons in the lowest income group to 6.4 persons in the income group Rs. 200—250. The highest income group has 4.7 persons per earner. It will be seen from the table that the earner of an average family has to maintain 4.7 persons or 3.5 equivalent adults. The dependants per earner in the average family vary from 3.2 to 4.6 c.u.'s. in the income groups. The earner in the highest income group has to maintain the same number of equivalent adults as that in the income group Rs. 100—150 viz., 3.6 consumption units (Table 5, page 226).

#### MODAL SIZE OF FAMILY.

About 23 per cent. of the families consist of 5 to 6 consumption units. They constitute the modal group, the modal value being 5.4 c.u.'s. The median value is found to be about 5.0 (Table 7, page 227).

#### MONTHLY INCOME AND EXPENDITURE.

The average income of the head of the family from pay and allowances is Rs. 193-13 per month and from other sources is Rs. 26-12 per month. The average earnings of other members of the family work out to Rs. 14-0 per month. The total income of the family therefore averages to Rs. 234-9 per month. The greatest single source of income is the earning of the head of family accounting for 83 per cent. In all income groups except the last two, pay and allowances of the head of family account for more than 80 per cent. of the family income. In the highest income group pay and allowances, account for about only 69 per cent. of the total family income, other income claiming about 31 per cent. of the total income.

The monthly income per family varies from Rs. 81-15 to Rs. 417-15 while the monthly expenditure per family shows a variation from Rs. 122-2 to Rs. 462-14 The monthly income per capita varies from Rs. 17-0 to Rs. 54-5 while the monthly expenditure per capita varies from Rs. 25-7 to Rs. 60-0. •The average monthly income per c.u. is Rs. 47-14 and the average monthly expenditure per c.u. is Rs. 58-5. Among the income groups the deficits per c.u. vary from to Rs. 5-13 to Rs. 15-9. (Tables 8 and 9, page 227).

			Total		100.0	100.0	100.0	100.0	100.0	100.0	100.0

The average monthly expenditure on food is the highest among all groups, being 41·1 per cent. of the otal family expenditure and next comes miscellaneous items with 36·2 per cent. As between the lowest and the highest income groups the expenditure on food falls from 49·3 per cent. to 38·1 per cent. and on uel and lighting from 7·5 per cent. to 4·2. Expenditure on clothing first rises from 7·4 per cent. in the twest income group to 8·7 per cent. in the third. Thereafter it has a set-back and comes down to 7·7 per ent. in the penultimate income group. In the last group it rises to 11·1 per cent. Expenditure on ousing remains over 7 per cent. in the first three groups. Thereafter it declines to 6·3 per cent. in the ollowing group and rises to 9·4 per cent. in the last but one income group. In the last group it falls own to 5·8 per cent. On the other hand, percentage expenditure on miscellaneous items rises from 20·6 er cent. in the lowest income group to 38·7 per cent. in the highest. Furniture and household requisites emain more on less steady at 2 per cent.

#### SURPLUS AND DEFICIT BUDGETS.

Budgets have been classified according as they are surplus or deficit ones and it is found that 86 per ent. of the total budgets show deficits and only 14 per cent. show surpluses.

				-	,	Total budgets (1)	Surplus budgets (2)	Deficit budgets (3)	Percentage of (2) to (1)	Percentage of (3) to (1)

#### Non-regular expenditure.

Ten families out of 79 m this area are reported to have incurred non-regular expenditure. There was no non-regular expenditure in the lowest two income groups. Two families in the third income group incurred expenditure on occasion of marriage, one spent Rs. 2,500 for the entire ceremony while the other made only a present of Rs. 50. A family in the income group Rs. 250—300 had to spend Rs. 100 for medical treatment. In the highest income group there happened to be seven families who spent sums varying from Rs. 100 to Rs. 550 on sundry purposes such as, religious ceremony, thread ceremony, first food-taking ceremony etc.

EXPENDITURE ON FOOD.

Food expenditure by groups —percentages.

			Total	••	100	100	100	100	100	100	300

From the above table it is seen that the proportion of expenditure given to milk and fats is the highest, being about 42.0 per cent. of the total of food expenditure. Next in importance is 'cereals' which accounts for about 16.0 per cent. Wheat is the most important item in the cereals sub-group. Percentage of expenditure on other items is 15.3 for fruits and vegetables, 8.5 for animal food, 11.4 for miscellaneous food articles, 4.2 for pulses, and 2.6 for condiments and spices. The expenditure on cereals declines from 22.4 per cent. in the lowest group to 13.9 per cent. in the highest, that on condiments and spices from 3.1 per cent. to 1.6 per cent. in the last but one group. The expenditure on milk and fats varies from 39.5 to 46.9 per cent. between the income groups. The expenditure on animal food (4.0 per cent.) is the lowest in the first income group; in all other groups it is more than 8 per cent.

The table below shows food expenditure by income groups. The average expenditure per family on food is Rs. 117-9 or Rs. 24-0 per consumption unit.

Food expenditure by income groups.

#### DIETARY HABITS.

As regards dietary habits wheat is the staple article of food. Wheat & wheat products and recount for 12·1 and 3·8 per cent. respectively of the total expenditure on food. The percentage expenditure on wheat and wheat products from the lowest to the highest income groups is  $14\cdot2$ ,  $10\cdot4$ ,  $13\cdot7$ ,  $13\cdot6$ ,  $11\cdot8$  and  $11\cdot0$  respectively while that on rice is  $6\cdot9$ ,  $5\cdot1$ ,  $4\cdot0$ ,  $4\cdot2$ ,  $2\cdot3$  and  $2\cdot9$  per cent. of the total food expenditure. The average consumption of wheat is  $51\cdot5$  seers per family of  $6\cdot5$  persons or  $4\cdot9$  adult male equivalents and that of rice is  $14\cdot6$  seers. The percentage expenditure on milk varies between  $14\cdot0$  and  $18\cdot1$  while that on ghee varies between  $13\cdot4$  and  $22\cdot9$  per cent. of the total expenditure on food. The average consumption of milk and ghee is  $42\cdot5$  and  $4\cdot9$  seers respectively per family.

The percentage expenditure on fruits varies between 2.9 and 6.7 per cent. and that on vegetables between 9.1 and 13.2. The average consumption of potato and onion per family is 5.2 and 4.8 seers respectively. In the 'animal food group' expenditure varies from about 4 per cent. in the lowest group to 9.7 per cent. in the last but one group. Goat's meat is the major item in the sub-group which alone accounts for about 5 per cent. of the total food expenditure. On an average, expenditure on animal food is 8 per cent. of the food expenditure. Percentage expenditure on tea, sugar, gur and raw sugar is given below:—

						Below Rs. 100	Rs. 100 to 150	Rs. 150 to 200	Rs. 200 to 250	Rs. 250 to 300	Rs. 300 and above	An
Tea	••	••	••	• •	••	1-14	1-17	1.06	0-46	0-96	1.09	1.01

Sugar, r	aw & gur	••	••	••	••	2.07	2-13	1.89	2.04	1.68	1-16	1-64

The consumption of tea, sugar, gut and raw sugar are •73 lbs., 6·12 seers and 4·05 seers respectively family. (Tables 17 and 18, pages 230-233).

#### ESTIMATES OF MONEY VALUE CONCESSION RECEIVED PER FAMILY.

Concession enjoyed by different income groups in the Punjab block is shown in details in the following table:—

		Ita	ems			Below 100		Rs. 100 150		Rs. 150 to 200	Rs. 200 to 250	Rs. 250 to 300	Rs. 300 and above	Average all groups
						Rs.	As.	Rs.	As.	Rs. As.	Rs. As.	Rs. As.	Rs. As.	Rs. 48
Cereals		••		••		3	3	5	7	4 5	6 12	3 14	5 3	4 12
Pulses		••	••	••				1	0	1 6	1 4	0 4	0 4	0 11
Ghee (inc	luding	butter)	••			1	2	1	5			1 9	3 1	1 5
Musterd	oil etc.	(includin	g vanas	pati)		(	7	o	8	0 15	0 13		0 13	0 11
Potatoes		••					. 3	0	7	0 5				0 3
Tea	••	••	••	• •			3	0	5	0 6	0 2	0 7	0 12	0 7
				Fotal	• •		5 2		 ) 0	7 6	8 15	6 2	19 1	8 1

It will be seen that the amount of concessions varied from Rs. 5-2 in the lowest income group t Rs. 10-1 in the highest. Each group derived the major portion of concession from the purchase of cereals—which varied from Rs. 3-3 to Rs. 6-12. The average monthly concession received was Rs. 8-1 of which cerea accounted for Rs. 4-12, ghee for Rs. 1-5 and pulses and mustard oil for Re 0-11 each. As a result receipt of this concession the average income per family rose from Rs. 234-9 to Rs. 242-10 and average expenditure from Rs. 285-14 to Rs. 293-15. Food expenditure was 43 per cent. of the enhanced expenditure mentioned above.

#### FUEL AND LIGHTING.

Firewood is the most important single item in this group which alone accounts for a little over 55 p cent. of the total expenditure on "fuel and lighting". Firewood and charcoal together account for more the 73 per cent. of the total expenditure. The average expenditure per family is Rs. 12-15 or about Rs. 2 per consumption unit. (Table 17, pages 230-232).

#### CLOTHING.

The estimated expenditure and the average actual monthly expenditure on clothing are shown in table below for the purpose of comparison.

				_	Belo 1	w 1	łs.		Rя. 1	100 50	to	1	ts. 1	.50 00	to	 	ts. 2	00 50	to		Ra.	250 00	to		s. 3( ubo	00 ar <b>v</b> e	ıd			Ail

Actual expenditure		 	3	7	3	13	4	14	4	12	4	8	8	0	5

The estimated monthly expenditure is Rs. 6-6 per family or Rs. 1-4 per consumption unit while actual expenditure per consumption unit is—Rs. 1-1 per month.

#### Housing.

Sixty one per cent. of the families pay rents. The remaining 39 per cent. either live in self-owned to or free houses. Taking into account only those families who pay rents, it is found that 33 per cent them pay tent below Rs. 10, 27 per cent. between Rs. 10 and 15, 12 per cent. between Rs. 15 and 15 per cent. between Rs. 20 and 25 and the remaining 13 per cent. pay Rs. 25 or more (Table 12, page 2 Fifty six families have given information regarding their residential accommodation. On the whole, I per cent. of the families containing on an average 4.4 persons live in one-roomed houses, 39.3 per cent. of families containing on an average 5.3 persons each live in two-roomed houses, 26.8 per cent. of them a average size of 5.7 in three roomed and 8.9. per cent. with an average size of 5.1

<sup>\*21</sup> per cent. have mentioned that they are in occupation of self-owned houses, 12 per cent. have stated that they are in free houses. Re: ing families have not given any information about rent or the nature of occupancy.

four-roomed, and 10.7 per cent. with an average size of 8.0 persons in houses of five or more rooms. The actual picture of overcrowding is presented more clearly in table 14, page 229, giving the distribution of families by number of persons and number of rooms. Even in the one-toomed house 62 per cent. of the families are those whose size is between 3 and 4 persons and another 25 per cent. of the families are those with persons between 7 and 8. A better insight into the degree of overcrowding is given by the distribution of families by number of persons per room given in the table below:—

#### Distribution of families by number of persons per room

Number of persons per r	oom		••	••	1-2	2-3	3-4	Totai
Number of families		• •	••	••	26	22	8	56
Percentage of families		••	•,•		46-1	39.3	14.3	100-0

It shows that a little less than 40 per cent. of the families are those having between two and three persons to a room and about 46 per cent. of families have between 1 and 2 persons to a room.

Distribution of families by number of adult male equivalent per room.

Number of equivalent ac	dult ma	les per ro	o <b>m</b>		1-2	2-3	Total
Number of families	••	••	••	••	39	17	56
Percentage of families	• •	••	••	••	70.0	30-0	100.0

The percentage of families with 1 and 2 equivalent adult males to a room is found to be 70.

#### EXPENDITURE ON MISCELLANEOUS.

The average expenditure under this group is Rs. 103-7 or 36.2 per cent. of the total monthly expenditure. Monthly expenditure per family varies from Rs. 31-4 in the lowest income group to Rs. 179-0 in the highest (vide table 17, pages 230—232).

Services.—One of the important items of expenditure amongst services is the wages of domestic servants, which varies from Re. 0-9 to Rs. 9-1 per month. Washing charges vary from Rs. 2-3 in the lowest income group to Rs. 8-12 in the last but highest group. The monthly expenditure, on services varies from Rs. 4-10 to Rs. 23-8 per family. The average monthly expenditure per family is Rs. 13-14 or 13 per cent. of the total expenditure of this group.

Children's education.— The monthly expenditure varies from Rs. 2-8 to Rs. 20-15 per family. The average monthly expenditure per family is Rs. 13-3 i.e. about 13 per cent. of the total miscellaneous expenditure. In the lowest income group the expenditure is as low as Rs. 2-8 per family. The average monthly expenditure on this item per spending family is about Rs. 15-9.

Religious ceremonies.—The average monthly expenditure on them is Rs. 4-7 or about 4 per cent. Considering only those families who spend on this item the average expenditure per month comes to Rs. 7-0.

Toilet requisites and other necessaries.—The average expenditure on toilet requisites is Rs. 2-5 or 2·1 per cent. As between the lowest and highest income groups the monthly expenditure varies from Re. 0-8 to Rs. 3-12. Other necessaries such as, washing soap, tooth brush, tooth powder or paste account for an expenditure ranging from Rs. 1-15 to Rs. 4-14. The average monthly expenditure on these items is Rs. 3-11 per family or Re. 0-12 per consumption unit.

Newspaper and entertainments.—The monthly expenditure on newspaper varies from Re. 0-9 to Rs. 2-8 per family while that on entertainments from Re. 0-4 to Rs. 2-6. The average monthly expenditure on both is Rs. 2-8 per family or Re. 0-10 per consumption unit.

Club subscription.—The monthly expenditure on this item ranges from Re. 0-4 to Rs. 1-2. The average monthly expenditure per family is Re. 0-12.

Postage.—The monthly expenditure on postage varies trom Re. 0-11 to Rs. 2-5 per family. The average monthly expenditure amounts to Rs. 1-5 only.

Medical charges.—The monthly expenditure on this item varies from Rs. 4-2 to Rs. 11-0 per family. The average monthly expenditure per family comes to Rs. 8-6 or Rs. 1-11 per consumption unit and is about 8 per cent. of the total miscellaneous expenditure.

Holiday expenses.—The average monthly expenditure is Rs. 3-1 per family or about 3 per cent. The monthly expenditure varies from Re. 0-4 to Rs. 7-10.

Travelling.—Cost at travelling to and from place of work varies from Re. 0-3 to Rs. 3-6 per family per month. The average monthly expenditure is Rs. 2-0 per family or about 2 per cent.

Maintenance of own conveyance.—The average monthly expenditure is only Rs. 1-12 per family or about per cent. Between the income groups, the monthly expenditure varies from Re. 0-3 to Rs. 2-5.

Taxes.—The monthly payment of taxes varies from Re. 0-9 to Rs. 12-1. The monthly average for a families is Rs. 4-7 or about 4 per cent.

Provident fund and Insurance.—The average monthly expenditure (or rather savings) on this accon amounts to Rs. 22-12 per family or 22 per cent. The amount of Provident Fund contribution increases fr Re. 0-12 in the lowest income group to Rs. 31-8 in the highest. Insurance premia also increase from  $R_{8, \frac{7}{4}}$  in the lowest income group to Rs. 15-14 in the highest.

Remittances.—The average monthly remittance comes to about Rs. 5-7 or 5 per cent. Thirty seven leads to a seven the families reported expenditure on remittances. The monthly remittance per family making remittance is Rs. 15-0.

Pansupari.—About 47 per cent. of the tamilies reported expenditure on this item. The average montle expenditure comes to Re. 0-8 for all families and varies from Re. 0-1 to about Rs. 1-2 in the high income group. Taking only the spending families the average monthly expenditure comes to Rs. 2-0.

Cigarettes and tobacco.—About 42 per cent. of the families have shown expenses on cigarettes and tobac The monthly expenditure on cigarettes per spending family is Rs. 3-1 and on tobacco Rs. 1-0. I average monthly expenditure on cigarettes and tobacco is Rs. 1-11 or 1.5 per cent. for all families and var between Rc. 0-9 to Rs. 7-10.

Debt disbursement.—About 37 per cent. of the families have shown payments on account of debt. I average monthly payment per family towards debt disbursements in Rs. 6-5 only which is about 3 per cent. the average monthly income of the family. Taking only the indebted families, the average monthly payment towards debt disbursements is Rs. 21-11 only which is about 9 per cent. of the average monthly income It is seen from the table that the percentages of families in debt decrease from 72.7 per cent. in the income group Rs. 100-150 to 40.9 per cent. in the income group Rs. 300 and above. Percentage in the lowest income group is 18.2 per cent. only, while there has been no indebtedness in the income group Rs. 250-300. I ratio of debt disbursements to monthly income is the highest in the lowest income group and the lowest the income group Rs. 200-250 (Table 11, page 228).

UNITED PROVINCES	

#### UNITED PROVINCES

United Provinces constitute about 10 per cent. of the total sample selected. In all, 500 persons were asked to submit budgets and 617 effective budgets comprising all-fours and non-fours were received A summary table showing the average monthly expenditure by items based on these budgets is annexed to the Report (vide table 19 pages 267-270). The Report is, however, based on the analysis of 380 all-four budgets.

In order to test the adequacy of the sample studied, the dispersion in the expenditure data has been worked out and is given below:—

	When the	he whole san	nple is taken	When t	ke sample is	divided at	random int	o two equal	parts.
			First part Second part.

71.0

The percentage of families by expenditure classed is given below:-

80.8

79.3

Below Rs. 100	Rs. 100	Rs. 125	Rs. 150	Rs. 175	Rs. 200	Rs. 225	Rs. 250	Rs. 275	Rs. 300
	to 125	to 150	to 175	to 200	to 225	to 250	to 275	to 300	and over
8-4	17.9	8-4	11-6	12.6	5.3	8-4	3.2	4.2	20.0

About 35 per cent. of the families spend less than Rs. 150 per month, 24 per cent. between Rs. 150—200, 14 per cent. between Rs. 200—250, about 7 per cent. between Rs. 250—300 and 20 per cent. spend Rs. 300 or more. The quartile values of the expenditure are as follows:—

First quartile =Rs. 123·2.

Median =Rs. 182·3.

Third quartile =Rs. 268·7.

This means that 50 per cent. of the families spend in round numbers Rs. 182 or less, the upper 25 per cent. of the families have a monthly expenditure of about 269 or more and the lower 25 per cent. an expenditure of Rs. 123 or less. The central 50 per cent. incur an expenditure ranging between Rs. 123 and Rs. 269.

The quartile values of the income are :—

Total food

Total miscellaneous ..

First quartile =Rs. 86.2.

Median =Rs. 133.8.

Third quartile =Rs. 213.9.

The percentage distribution of families by income groups is shown below:—

Below Rs. 100	100 to 125	Rs. 125 to 150	Rs. 150 to 175	Rs. 175 to 200	Rs. 200 to 225	Rs. 225 to 250	Rs. 250 to 275	Rs. 275 to 300	Rs. 300 & over.
33.7	12.6	10.5	10.5	4.2	6.3	5.3	3.2	3.2	10.6

About 34 per cent. of the families earn less than Rs. 100, 23 per cent. between Rs. 100—150, about 15 per cent. between Rs. 150—200, 12 per cent. between Rs. 200—250, 6 per cent. between Rs. 250—300 and 10 per cent. Rs. 300 and over.

It is found that 25 per cent. of the families lie in the same expenditure and income classes, 70 per cent. in expenditure classes above, and 5 per cent. in expenditure classes below, the corresponding income classes. (Table 1, page 257).

#### Composition of family.

It will be seen from table 2 at page 257 that out of 95 families 65.3 per cent. are natural families and 34.7 per cent. joint families.

The average number of persons living in the family is 6.2; 1.6 males and 1.7 females, 1.4 boys and 1.5 girls. The average number of persons living away from family is 1.41; .18 being men, .24 women, .80 boys and .19 girls. The size of the family inclusive of dependants living away from the family is 7.61 (Table 3, page 257).

Average number of earners per family is 1·15 including the head of the family. Average number of one-carners including those living away from family is 6·46 i.e., about 15 per cent. of the family members are including those living away from family is 6·46 i.e., about 15 per cent. of the family members are included and girls and about 27 per int. are adult females. Among the adult non-earners in this group are included school and college-going oys and girls. The average number of earners varies from 1·06 in the lowest income group to 1·40 in the ghest; there are no female earners except in the income group below Rs. 100 and Rs. 200—250 in which their reage number is only ·03 and ·18 per family respectively. (Table 4, page 258). The number of dependants of earner remains almost constant at 5·4 persons for all income groups. It will be seen from the table that the earner of an average family has to maintain 5—6 persons or 4—4·5 equivalent adults. The dependants of earner in the average family vary from 3·9 to 4·4 consumption units (Table 5, page 258). The opportionate excess of expenditure over income of the family declines from the first income group the last but one and then shows an increase while the number of earners increases up to the income group s. 200—250, falls in the next income group and then increases to 1·40 in the highest income group (Table ), page 260).

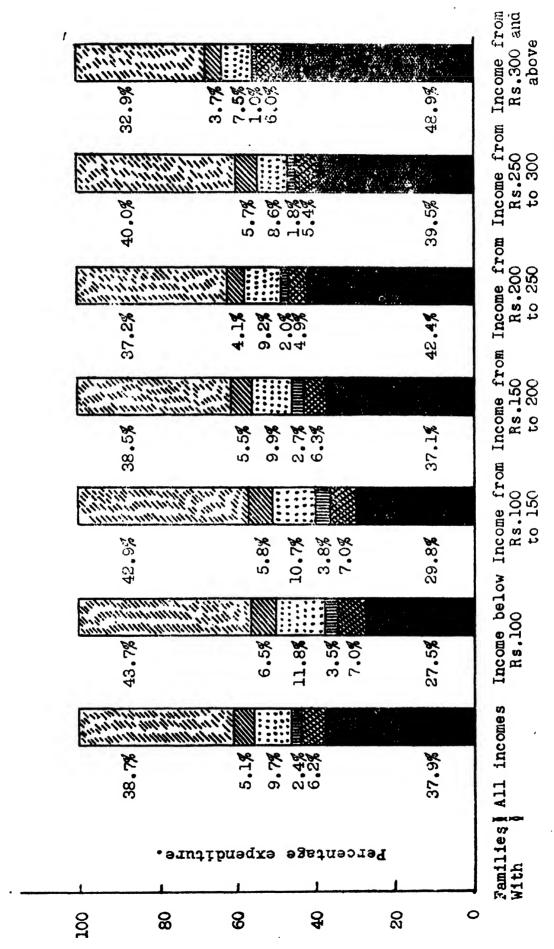

# MODAL SIZE OF FAMILY.

About 23.2 per cent. of the families consist of 4.-5 consumption units. They constitute the modal oup, the modal value being 4.5 c.u.'s. It closely follows the median value of 4.8 c.u.'s. (Table 7, page 259).

# MONTHLY INCOME AND EXPENDITURE.

The average income of the head of the family from pay and allowances is Rs. 154-5 per month and from her sources is Rs. 9-14 per month. The average earning of other members of the family works out to s. 5-2 per month. The total income of the family therefore averages Rs. 169-5 per month. The greatest agle source is the earning of the head of the family accounting for 91 per cent. The contribution of the her members of the family towards earnings is very small, being about 3 per cent. Income from other sources only 6 per cent. In all income groups, pay and allowances account for more than 80 per cent. of the mily income. The monthly income per family varies from Rs. 79-9 to Rs. 421-5 while the monthly penditure per family shows variation from Rs. 115-4 to Rs. 479-7. The monthly income per capita the various income groups varies from Rs. 12-13 to Rs. 68-0 while the monthly expenditure per capita ries from Rs. 18-9 to Rs. 77-4.

The average monthly income per c.u. is Rs. 36 and the average monthly expenditure per c.u. is Rs. 8 per family. Among the income groups the deficits per c.u. vary from Rs. 1-12 in the last but highest come group to Rs. 10-4 in the income group Rs. 200—250 (Tables 8 & 9, page 259).

				•	Total		100.0	100.0	100.0	100.0	100 υ	100.0	100.0

Expenditure on food is the highest being 38.7 per cent. of the total family expenditure and differs from that on miscellaneous items by a fraction viz., .8. As between the lowest and highest income groups the expenditure on food falls from 43.7 per cent. to 32.9 and on fuel and lighting from 6.5 per cent. to 3.7 per cent. except for a rise in both cases in the fifth income group as compared with the fourth. The expenditure on clothing however shows a continuous and steady fall from the lowest to the highest income group. Expenditure on housing gradually falls from 7 per cent. in the lowest income group to 4.9 per cent. in the income group Rs. 200—250 and again rises to 6.0 per cent. in the highest income group. Furniture and household requisites first shows a slight rise from 3.5 to 3.8 per cent. and then steadily falls to 1.0 per cent. The expenditure on miscellaneous item on the other hand rises from 27.5 per cent. to 48.9 per cent. as between the lowest and the highest income levels except for a fall in the income group Rs. 250—300.

#### SURPLUS AND DEFICIT BUDGETS

Budgets have been classified into surplus and deficit ones and from the table below it is found that 85 per cent. of the total budgets show deficits and only 15 per cent. show surplus.

								Total budgets (1)	Surplus budgets (2)	Deficit budgets (3)	Perceutage of (2) to (1)	Perecan we of (3) to (1)

# AVERAGE INCOME PER FAMILY AND CONSUMPTION UNIT.

It will be seen from the table 8 at page 259 that considering all income groups the average family conforms very closely to an average family in the income group Rs. 150—200 both in respect of income and expenditure per equivalent male adult and number of consumption units.

Average family with an income of about Rs. 169-5 has a monthly deficit of Rs. 39-12 or about Rs. 8.8 per consumption unit. The deficit is generally stated to be met from previous savings, and temporary loans from friends and relatives. It should be remembered that the expenditure includes payments towards G. P. Fund contributions and Life Insurance premiums which are a sort of savings.

Let us now focus our attention on the following table:-

			***************************************							Index of average income per family on the assumption that the average income for all families is Rs. 100.	Index of average income per c.u. on the assumption that the average income per c.u. in all families is Rs. 100.
Below Rs. 100	••	••	••	• •	• •	••	• •	••		47.0	51·3
<b>Rs.</b> 100—150		••	••			••	••	••	••	73-6	80•4
Ra. 180 200	••	••	••	••	••	••	••	••	••	1 <b>02·</b> 0	97·s
Rs. 200—250	••	••	••	••	••	••	••	••	••	133·7	114-2
Rs. 250—300	••	••	••	••		••	••	••	••	164-8	171.9
Rs. 300 and above	••	• •	••	••	••	••	••	••	••	248-8	191-5
								All	••	100-0	100.0

From the above distribution of indices of average income it will appear that the variation in the average income per family is the same as the variation in the average income per equivalent adult male between the first and second income groups. Between the second and third, third and fourth and fifth and sixth income groups the variations in the average income per family exceed those in the average income per equivalent adult male. But the position is reversed in the case of variations between the fourth and the fifth income groups.

The following facts emerge from the above observations.

- 1. The variations between the first and second income groups in the two cases point to the fact that with the increase of income family size is unchanged.
- 2. The variations between the fourth and fifth income groups in the two cases tell a different take namely, with the increase of income the family size in fact records a decrease.
- 3. In other income groups the variations in the two cases support the argument that with the increase of income the family size tends to increase.

The prosperity of the families appears to increase with the increase of income, the differing size of the families not-withstanding.

#### Non-regular expenditure.

Out of 95 families in this area under review only 3 families reported expenditure of non-regular nature. In the lowest income group, one family incurred an expenditure of Rs. 550 on account of marriage. In the following income group, two families incurred non-regular expenditure—one spent Rs. 100 for religious ceremony and the other Rs. 550 for marriage. There was no expenditure of this nature in other income groups.

#### EXPENDITURE ON FOOD.

From the table given at page 253, it is seen that the proportion of expenditure given to milk and fats up the highest, being 34.6 per cent. of the total food expenditure. Next in importance is cereals which accounts for about 22 per cent. of the food expenditure—Percentage expenditure on other items is 14.6 per cent. for fruits and vegetables, 6.3 per cent. for animal food, 12.0 per cent. for miscellaneous food articles, 7.0 per cent. for pulses and 3.4 per cent. for condiments and spices. Expenditure on cereals declines from 29.3 in the lowest to 15.2 per cent. in the last but the highest income group. The percentage expenditure in the highest rises to 16.8 per cent. Expenditure on condiments and spices is almost constant at about 3 per cent. over all income groups, that on pulses declines from 8.1 per cent. to 4.5 per cent., although there is a rise in the income group of Rs. 200—250. The expenditure on milk and fats, on the other hand has a rising ten lency though there is a set-back in the fourth and the highest income groups.

The expenditure on animal food is most irregular and erratic from income group to income group. This is due to the uneven distribution of non-vegetarian families in the various income groups.

Food expenditure—percentages.

							Below Rs. 100	Rs. 100 to 150	Rs. 150 to 200	Rs. 200 to 250	Rs. 250 to 300	Rs. 300 & above.	All

The table below shows tood expenditure by consumption unit.

Food expenditure by consumption unit.

		Below Rs.	Rs. 100	Rs. 150	Rs. 200	Rs. 250	Rs. 300 All
		100	to 150 	to 200	to 250	to 300	& above
Food expenditure (excluding outside meals)		Rs. As. 50 6	Rs. As. 66 5	Rs. As. 83-15	Rs. As. 104-14	Rs. As. 113 0	Rs. As Rs. As. 155 5 79 14
Food expenditure per consumption unit	••	11 11	15 7	17 2	19 1	25 2	25 7 17 3

The notable increase in the cost of diet per consumption unit in the top income groups may be explained by the fact that the families of those income classes consumed more of costlic diets than those in the lower income levels. That the top income group families spent more on costlier diets is apparent from the table below:—

The comparison of food expenditure in income groups 1 & 6.

### DIETARY HABITS.

Though wheat is the staple food, rice also occupies an important position. The percentage expend ture on wheat and other wheat products from the lowest to the highest income groups is 14.5, 13.3, 13.1 9.8, 9.2 and 11.9 respectively while that on rice continuously falls from 11.7 per cent in the lowest income group to 3.7 in the income group Rs. 250—300 and again rises to 7.2 per cent. in the highest income group. The average consumption of wheat and wheat products is 36.69 seers per family of 6.2 persons or 4.7 adult male equivalents and that of rice 22.13 seers. The percentage expenditure on milk from the lowest to the highest income groups is 10.8, 14.9, 16.8, 11.0, 20.4 and 9.2 respectively. The average monthly consumption of milk and give is 27.75 and 2.80 seers respectively per family. In the fruits and vegetables group the percentage expenditure devoted to vegetables is 11.7, and that on fruits account for only 3.0. The average monthly consumption of potato and onion per family is 9.87 and 3.35 seer respectively. The average consumption of meat is 2.40 seers per family. The percentage expenditure of tea, sugar and gar and raw sugar is given below:—

•						Below Rs. 100	Rs. 100 to 150	Rs. 150 to 200	Rs. 200 to 250	Rs. 250 to 300	Ra. 300 and above.	All

Sugar	••	••	••	••	••	••	0 6	0	8		0 7	0.5	0 13	0 (
					Total		17 4	105	6	n o	13 2	6 4	12 15	14 .

It will be seen that maximum benefit of Rs. 17-4 was received by the lowest income group. The nex higher group received R4. 16-6. The minimum benefit of Rs. 6-4 was derived by the income group Rs. 250-300. With the exception of Rs. 250-300 group all other income groups derived the majo portion of benefit from cereals only. The average monthly benefit came to Rs. 14-3 for all groups, of which Rs. 8-1 was derived from cereals 4.2. about 57 per cent. Pulses accounted for Rs. 2-15 while ghee for Re. 2-1. Musta doil and sugar were responsible for Re. 0-12 Re. 0-6 respectively. Average family income was thus raised from Rs. 169-5 to Rs. 183-8 and average expenditure from Rs. 209-1 to Rs. 2.3-4. Expenditure on tood registered an increase of Rs. 14-3 and was 42.6 per cent. of the total monthly expenditure.

#### FUEL AND LIGHTING.

Firewood is the most important item of consumption supplemented by charcoal and soft coke. Othe important items of consumption include kerosene oil, match box, lamp chimney, and electricity. Firewoo alone accounts for about 58 per cent of the total fuel and light expenditure. The average monthlexpenditure per family is Rs. 10-11 or about Rs. 2-4 per consumption unit.

#### CLOTHING.

This group includes also shoes and umbrella. The average monthly expenditure on clothing is arrive at by dividing the total expenditure on each item by its estimated durability. But the actual monthl expenditure on clothing has also been asked for as additional information. The estimated expenditure and the average actual monthly expenditure on clothing on the basis of four quarterly returns are shown in the table below for the purpose of comparsion.

#### EXPENDITURE ON CLOTHING.

				Ra	3e4				100 150		Re.	150 200		Rs. to 2	20.0 250		s. 250 300			К <b>п.</b> & а	300 bove		Al	l

The estimated monthly expenditure on clothing is Rs. 20-3 per family or Rs. 4-5 per consumption unit.

The estimated monthly expenditure on men's clothing per man is Rs. 5-10, on women's clothing per woman is Rs. 4-2 and children's clothing per child is Rs. 1-7.

# FURNITURE & HOUSEHOLD REQUISITES.

The average monthly expenditure on 'furniture and household recessaries' is estimated, as in the case of clothing, by dividing the total expenditure on each item by its estimated life. The actual expenditure on this group supplied by the families is also shown along side the estimated expenditure for comparison.

						Below Rs. 109	Rs. 100 to 150	Rs. 150 to 200	Rs. 200 to 250	Rs. 250 to 300	Rs. 300 and al ave	Alı

Actual expenditure		••	••	••	••	2 7	7 4	2 11	2 7	5 1	11 6	4 1

The estimated monthly expenditure is Rs. 5-1 per family or Rs. 1-1 per consumption unit while the actual expenditure per consumption unit is Re. 0-14 per month.

#### Housing.

About 67 per cent. of the families pay rents. The remaining 33 per cent. either live in self-owned houses or free houses. Taking into account only those families who pay rents it is found that about 17 per cent. of them pay rents below Rs. 5, 45 per cent between Rs. 5 and 10, 17 per cent. between Rs. 10 and 15, 9 per cent. between Rs. 15 and 20, and about 12 per cent. Rs. 20 and over (Table 12, page 200). It is found that the modal rent group is Rs 5 to 10 in which about 45 per cent. of the families live. 61 families have given information regarding their residential accommodation. It will be seen from the table that two-roomed houses are common amongst the families in the groups—"below Rs. 100 and Rs. 100 to 150. On the whole 11 per cent. of the families containing on an average of 5.0 persons live in one-roomed houses, 39 per cent. of them with an average size of 5.2 in two-roomed and 20 per cent. with an average size of 6.9 in three roomed, 16 per cent. with an average size of 6.2 in four recomed leaves and about 14 per cent. with an average size of 6.6 persons in houses of five and nore rooms. A better in-sight into the degree of over-crowding is given by the distribution of tamilies by number of persons per room given in the table below and also (table 14, page 261).

### Distribution of families by number of persons per room.

Number of persons per re	om	••	••	••	••		1-2	2-3	3 and above	Total.
Number of families	• •	• •			••		39	18	4	<b>6</b> 1
Percentage of families						!	64	<b>3</b> 0	6	100

Considering all families there are on an average two persons to a room. It shows that in about 64 per cent, of the families there are between one and two persons to a room. In families of all sizes, number of equivalent adult males to a room does not exc ed 2 (vide table 15, page 261). The table 16 at page 262 shows the number of persons per room and average floor space per person sleeping.

# MISCELLANEOUS.

Monthly expenditure ranges from Rs. 31-10 in the lowest income group to Rs. 234-10 in the

highest. Average expenditure amounts to Rs. 79-5.

Services.—Two important items of expenditure amongst services are the wages of domestic servants and washerman's charges. The total montaly expenditure on services varies from Rs. 6-7 to Rs. 30-0 including expenditure on shaving requisites. The average monthly expenditure per family is Rs. 11-11 or 14-8 per cent, of the total expenditure of this group. The expenditure on account of domestic servants varies from Rs. 2-9 to 14-8 as between the lowest and highest income groups, while that on washing charges varies from Rs. 2-4 to Rs. 6-12.

Children's education.—The monthly expenditure varies from Rs. 3-7 to Rs. 41-2 per family. The average monthly expenditure per family is Rs. 11-1 i.e. 14 per cent. of the total miscellaneous expenditure. The average monthly expenditure on this item per spending family is Rs. 14-5.

Religious ceremonies. The average monthly expenditure on them is Rs. 2-7 or about 3 per cent. Considering only those families who spend on this item, the average expenditure per month comes to Rs. 3-11

T idet requisites and other necessaries. —The average expenditure on toilet requisites is Rs. 1-1 or 1-3 per cent. As between the lowest and highest income groups the monthly expenditure varies from Ro. 0-7 to Rs. 3-6. Other necessaries, such as, washing soap, sooth brush, tooth powder or paste account for expenditure ranging from Ro. 0-14 to Rs. 2-10. The average monthly expenditure on them is Rs. 1-7 per family or Re. 0-5 per consumption anit.

Newspaper and entrainments. The monthly expenditure on newspaper varies from Re. 0-4 to Rs. 2-12 per family while that on entertainments from Re. 0-8 to Rs. 1-11. The average monthly expenditure on both is Rs. 1-11 per family or Re. 0-6 per consumption unit.

Club subscription.—The monthly expenditure on this item ranges from Re. 0-2 to Rs. 1-8 per family. The average monthly expenditure per family is Re. 0-8.

Posta je. - The monthly expenditure on postage varies from Re. 0-6 to Rs. 1-11 per family. The average

monthly expenditure per family is Re. 0-12.

Medical charges. The monthly expenditure on this item varies from Rs. 2-9 to Rs. 15-11 per family. The average monthly expenditure is Rs. 5-9 or Rs. 1-3 per consumption unit and accounts for about 7 per cent. of the total miscellaneous expenditure.

Holiday expenses and travelling he and from place of work.—The average monthly expenditure on holiday expenses is Rs. 1-11 per family. The monthly expenditure varies from Re. 0-11 to Rs. 3-9. The expenditure on travelling to and from place of work ranges from Re. 0-8 to Rs. 5-9 per family per month. The average monthly expenditure is Rs. 1-14 per family or about 2-4 per cent.

Maintenance of own conveyance. The average monthly expenditure is only Re. 0-14 per family. The

monthly expenditure ranges from Re. 0-4 in the lowest income group to Rs. 2-4 in the highest.

Taxes. Monthly tax deductions vary from Re. 0-10 in the third income group to Rs. 11-13, in the

highest. The first two income groups pay no tax. The average monthly tax is Rs. 2-2 per family

Provident fund and insurance.—The average monthly payment (or rather savings) to Provident Fund amounts to Rs. 8-4 per family or 10·4 per cent. The average payment towards insurance premium is Rs. 6-2 per family or 7·8 per cent. The Provident Fund contribution increases continuously from Rs. 2-9 in the lowest income group to Rs. 21-8 in the highest income group. Insurance premia increase steadily from Rs. 1-8 in the lowest to Rs. 8-0 in the highest but on income group while it exhibits a steep rise to Rs. 31-9 in the highest income level.

Remittances. The average monthly remittances per family come to Rs. 3-4 or about 4 per cent. 28 per cent. of the families reported expenditure on remittances. The monthly remittances per remitting family

is Rs. 11-8.

Pansapari. About 79 per cent. of the families reported expenditure on this item. The average monthly expenditure per family comes to Rs. 2-9 for all families and varies from Rs. 1-10 in the lowest to about Rs. 5-0 in the highest income group. Taking only the expending families the average monthly expenditure comes to Rs. 3-4 per family.

Cigarcites and tobacco. About 45 per cent. of the families have shown expenses on cigarettes and 43 per cent. on tobacco. The monthly expenditure on cigarettes per spending family is Rs. 2-2 and on tobacco Rs. 1-1. The average monthly expenditure per family on cigarettes and tobacco is Rs. 1-10 or about 2

per cent. for all families and varies between Re. 0-14 and Rs. 3-8.

Debt disbursement. —About 53 per cent. of the families have shown payments on account of debt. The average monthly payment per family towards debt disbursements is Rs. 10-8 only, which is about 6 per cent. of the average monthly income of the family. Taking only the indebted families the average monthly payment towards debt disbursements is Rs. 20-0 only which is about 12 per cent. of the average monthly income. It is seen from the table (11) at page 260 that the percentages of indebted families decrease from 50.0 per cent. in the lowest income group to 45.5 per cent. in the next income group but rise steadily to about 82 per cent. in income group Rs. 200—250. The percentage then goes down to 33.3 per cent. in the income group Rs. 250—300 only to fall to 30.0 per cent. in the highest income group Rs. 200—250 and the lowest in the income group Rs. 250—300 (Table 11, page 260).

BIHAR AND	DRISSA	

#### BIHAR AND ORISSA.

"Bihar and Orissa" constitute about 8 per cent. of the total sample selected. Altogether, 396 person were asked to submit budgets from this area and they submitted 501 effective budgets comprising both all fours and non-fours. A summary table showing the average monthly expenditure based on these budget is annexed to the Report (vide table 19, pages 289-292). The Report is, however, based on the analysis of 340 all-four budgets.

In order to test the adequacy of the sample studied, the dispersion in the expenditure data has been worked out and is given below:—

		:	When the w	hole swaple	e is taken.	When the sample is divided at random into two equal parts.						
	,	:	:			٠	irst part.			Second part		
			м :	s	v	М,	$s_{i}$	V <sub>1</sub>	M <sub>2</sub>	8,	V <sub>2</sub>

#### DISTRIBUTION OF BUDGETS BY INCOME AND EXPENDITURE CLASSES.

The percentage of families by expenditure classes is given below:

Below Rs.	Rs. 100 to 125	R + 127 to	Ra. 150 to 175	Rz. 175 to 200	Rs. 260 to 225	Rs. 225 to 250	Rs. 250 to 275	Ks. 275 to,	Rs. 350 & above.
4.8	10.6	11.8	7.0	7.0	h+2	5.0	4.7	8-2	81+.

About 27 per cent. of the families spend less than Rs. 150 per month, 14 per cent. each betwee Rs. 150 and Rs. 200 and between Rs. 200 and 250, 13 per cent. between Rs. 250 and 300 and 32 per cent between Rs. 300 and above. The quartile values of the expenditure are:—

First quartile = Rs. 145 · 3.

Median = Rs. 227 · 5.

Third quartile = Rs. 350 · 6.

This means that 50 per cent. of the families spend in round numbers Rs. 227 or less and the lowe 25 per cent. of the families an expenditure of Rs. 145 or less. The upper 25 per cent. spend Rs. 350 or more. The centra 50 per cent. spend between Rs. 145 and Rs. 350.

The quartile values of the income are :-

First quartile = Rs. 98·0.

Median = Rs. 173·2.

Third quartile = Rs. 246·9.

Percentage distribution of families by income groups is shown below:—-

<b>Below</b> Rs. 100	1:s, 100 to 125	R 4, 125 to 150	Its. 150 to 175	Rs 1 <b>75</b> to 290	Rs. 200 to 225	Rs. 226 to 250	Rs. 250 to 275	R ., 275 to 300	Rs. 500 & above.
		! <del></del>				<del></del>			
26.0	11:0	3.5	7.0	4.7	8.2	i3·0	5.9	5-9	11 8

About 43 per cent. of the families earn less than Rs. 150, 12 per cent. between Rs. 150 and 200 21 per cent. between Rs. 200 and 250, 12 per cent. between Rs. 250 and 300 and about 12 per cent. ear Rs. 300 and above.

It is found that 28 per cent. of the families lie in the same expenditure and income groups 67 per cent. in expenditure groups above and 5 per cent. in expenditure groups below the corresponding income groups (vide table 1, page 280).

# Composition of family.

It will be seen from table 2 at page 280 that out of 85 families 60 per cent, are natural families at 40 per cent, joint families. The average number of persons living in the family is 7.5; 2.0 being males 2.4 females, 1.7 boys and 1.4 girls (Table 3, page 280). The average number of persons living away from family is 1.13; 4 being males, 4 females and 38 boys and girls. The size of the family inclusive 6 dependants living away from family is 8.6. The number of persons per family increases almost continuously trens 3.8 in the lowest income group to 8.6 in the income group Rs. 200—250.

Average number of earners per family is 1·1 including the head of the family. Average number of non-earners including those living away from family is 7·5 i.e., about 13 per cent. of the family members are samers and 87 per cent. non-earners of whom about 38 per cent. are boys and girls and about 33 sper cent. are women. The number of earners varies from 1·0 per family in the lowest income group to 1·4 in the highest. There are no female earners. The number of dependents per carner increases from 5·8 persons in the lowest income groups. The earner of an average family has to maintain 6·5 persons or 5·0 equivalent adults. The dependants per carner in the average family vary from 4·4 consumption units in the lowest income group to 5·7 in the income group Rs. 200 -250. The carner in the highest income group has to maintain 4·5 consumption units. Between the first two income groups, there is no change in the number of earners while the proportionate excess of expenditure over income declines from the lowest to the next higher income group. In the third income group the proportionate excess of expenditure over income group the proportionate excess of expenditure over income group the proportionate excess of expenditure over income group the proportionate excess of expenditure over income group the proportionate excess of expenditure over income group the proportionate excess of expenditure over income group the proportionate excess of expenditure over income group the proportionate excess of expenditure over income diminishes with the increase in the number of earners. (Table 10, page 283).

# MODAL SIZE OF FAMILY.

About 18.8 per cent, of the families consist of 5 to 6 consumption units. They constitute the modal group, the modal value being 5.50 c.u.s. It is followed by the median value of 5.97 c.u.'s (Table 7, page 282).

# MONTHLY INCOME AND EXPENDITURE.

The average income of the head of the family from pay and allowances is Rs. 165-12 per month and from other sources is Rs. 25-13 per month. The total income of the family averages Rs. 191-9 per month. The greatest single source is the earning of the head of the family accounting for 87 per cent. The contribution of the other members of the family towards earnings is very small being only about Rs. 6-10 or 3 per cent. Income from other sources is also small, being only 10 per cent, of which the income from the land alone accounts for about 5 per cent. In all income groups, psy and allowances of the head of the family account for more than 71 per cent, of the family income.

The monthly income per family varies from Rs. 82-9 to Rs. 431-11 while the monthly expenditure per family shows a variation from Rs. 134-5 to Rs. 464-6. The monthly income per capita in the various income groups varies from Rs. 14-4 to Rs. 52-10 while the monthly expenditure per capita varies from Rs. 23-3 to Rs. 56-10. The average monthly income per c.u. is Rs. 33-1 and the average monthly expenditure per c. u. is Rs. 41-2. Among the income groups the deficits vary from Rs. 11-12 per c.u. in the lowest group to Rs. 1-13 in the income group Rs. 250-300. In the highest group

deficit per c.u. is Rs. 5-3.

Expenditure on "miscellaneous" group is the highest being 40 per cent. of the total family expenditure and next comes food group with 39 per cent. As between the lowest and the highest income groups the expenditure on food falls from 45 per cent. to 30 per cent. and that on fuel and lighting from 5 per cent. to 3 per cent. Expenditure on clothing is more or less creatic and varies between 7 per cent. and 10 per cent. Expenditure on housing, remains more or less steady at 6 per cent.; on the other hand, percentage expenditure on 'miscellaneous' increases with income. Expenditure on 'familiare and household requisites' rises from 1 per cent. to 3 per cent. and then gradually falls to 1.55 per cent. in the highest income levels.

# SURPLUS AND DEFICIT BUDGETS.

Budgets have been classified into surplus and deficit ones and it will be seen that 87 per cent. budgets show deficits and only about 13 per cent. show surplus.

	Incom	e groups				Number of budgets (1)	Surplus budgets (2)	Deficit budgets (3)	Percentage of 2 to 1	Percentage of 3 to 1

#### NON-REGULAR EXPENDITURE.

Only three families out of 85 reported non-regular expenditure and these families happened to fall in the income group Rs. 100—150 and Rs. 150—200. Two families in the income group Rs. 100—150 are reported to have spent Rs. 460 for medical treatment and Rs. 100 for a religious ceremony. In the next income group, there was an expenditure of Rs. 304 on account of sacred-thread ceremony.

# Expenditure on food.

# Food expenditure—percentages.

			 		B low Rs. 100	Rs. 100 to 150	Rs. 150 to 200	Rs. 200 to 250	Rs. 250 to 300	R1.300 and above

			Total		100.0	100.0	100.0	100.0	100.0	100.0	 100-0

From the above table it is seen that the proportion of expenditure given to milk and fats is the highest being about 30 per cent. of the total food expenditure. Next important item is cereals' which accounts for about 22 per cent. of the food expenditure. Percentages of expenditure on other items are 16 per cent for fruits and vegetables, 11 per cent. for animal food, 10 per cent, for miscellaneous food articles, 7 per cent for pulses, and 3 per cent. for condiments and spices. As between the lowest and the highest income groups, the expenditure on cereals declines from 24 per cent. to 17 per cent.; on condiments and spices it rises from 2.9 per cent. to 4 per cent, and then declines to 2.6 per cent., that on pulses show initially a fractional rise and then gradually declines from 8 per cent. to 5.6 per cent. The expenditure on milk and fats, on the other hand, increases from 29 per cent. in the lowest to 36 per cent. in the last but highest income group with a set-back in the income group Rs. 150—200 and Rs. 300 and above. On the whole expenditure on milk and fats has been erratic. Expenditure on fruits and vegetables varies from 12.8 per cent. to 19.7 per cent. The expenditure on animal food is steady at 11 per cent in the higher income groups. In the first and second income groups it is 13.1 per cent. and 9.2 per cent. respectively.

The average expenditure per family on food is Rs. 92-9 per month as can be seen from the following table:—

Food expenditure.

					Food	exper	Rs. As.	Rs. As.	Rs. As.	Rs. As.	Rs. As.	Rs. As.	Rs. A

# DIETARY HABITS. (Tables 17 & 18, pages 285-288.)

As regards dictary habits, rice and wheat are almost equally important food for people in this area. The percentages of expenditure on rice from the lowest to the highest income groups are 12.7, 11.5. 10.0, 9.4, 9.6 and 6.2 respectively, while those on wheat, wheat flour and other wheat products together are 10.8, 12.4, 11.6, 9.5, 8.8 and 8.6 respectively. The average consumption of rice is 36 seers per family of 7.5 persons or 5.8 adult make equivalents and that of wheat and wheat products is 37 seers. The percentage expenditure on milk from the lowest to the highest income group is 11.4, 13.4, 12.3, 13.9, 16.2, and 15.0 respectively while that on ghee is 8.2, 8.3, 4.9, 8.2, 9.8, and 9.1 respectively. The average consumption of milk and ghee is 36.4 seers and 2.7 seers respectively per family. The expenditure on fruits varies between 0.8 and 3.2 per cent. and that on vegetables between 11 per cent. and 16 per cent. The average monthly consumption of potato and onion per family is 13 and 4 seers respectively. In the "animal food" group 'fish' is the major item of expenditure. Out of about 11 per cent. spent on animal food, more than 5.7 per cent. is accounted for by fish alone.

Percentage expenditure on tea, sugar, gur and raw sugar is given below :--

				-									
			the	* *			Below Rs. 100	Rs. 100 to 150	Rs. 150 to 200	Rs. 200 to 250	Rs. 250 to 300	Rs. 360 & above	All
Гев	• •		*	•			1 - 4	1.8	2.2	1.6	1.3	3.0	1.9

'ata' o. s mion ugar	•••		 ••	••	. [	0 5	0 9		:	0 12	0 5 0 5	0 7 0 2 0 2
				[otal		12 15	12 1	15 1	9 8	17 0	8 3	12 3

The amount of concession received varies from Rs. 8-3 in the income group Rs. 300 and above to 13. 17-0 in the income group Rs. 250-300. Except in the highest income group, the major portion of the enefit was derived from cereals in each case. In the highest income group, the major portion of the come came from the purchase of ghest. Average concession amounted to Rs. 12-3 per family, of which is. 7-3 was derived from cereals, Rs. 23 from ghee and Rs. 1-5 from pulses. As a result of this rivilege, the average monthly income rose from Rs. 191-9 to Rs. 203-12 and the average nonthly expenditure was enhanced from Rs. 251-2 to Rs. 263-5. The expenditure on food also rose om 44 to 46 per cent.

#### FUEL AND LIGHTING.

Firewood, soft coke and kerosene, match box and electricity together account for a little over 70 per ent. of the total expenditure on "fuel and lighting". Firewood and soft coke together account for more an 54 per cent. of the total expenditure. The average expenditure per family is Rs. 9-2 a month.

#### CLOTHING.

The estimated expenditure and the average actual monthly expenditure on clothing are shown in the ble below for the purpose of comparison.

	Below	Rs. 100	Rs. 100	to 150	Rs. 150	to 200	Rs. 200	to 250	Rs. 250	) to 300	Rs. 300 a	ad above		All

The estimated monthly expenditure on clothing is Rs. 20-12 per family or Rs. 3-10 per consumption it. The estimated monthly expenditure on men's clothing per man is Rs. 4-15, on women's clothing per aman is Rs. 2-13 and children's clothing per child is Rs. 1-6.

#### FURNITURE AND HOUSEHOLD REQUISITES.

The actual expenditure on this group supplied by the families is also shown along side the estimated expenditure for comparison:—

					Below Rs. 100	Rs. 100 to 150	Rs. 150 to 200	Rs. 200 to 250	Rs. 250 to 300	Rs. 300 & above	All
Estimated expenditure	••	••		 •••	Rs. As. 1 10	Rs. As. 2 15	Rs. As. 5 10	Rs. As. 5 10		Rs. As. 7 3	Rs. As.
Actual expenditure	••	••	••	 	2 0	4 0	4 13	7 11	12 10	6 10	5 6

The estimated monthly expenditure is Rs. 4-4 per family or Re. 0-12 per consumption unit while the actual expenditure per consumption unit is Re. 0-15 per month.

# Housing

Sixty seven per cent. of the families pay rents. The remaining families either live in self-owned houses or free houses. Taking into account only those families who pay rents, it is found that 65 per cent. of the families pay rents of less than Rs. 10, 21 per cent. between Rs. 10 and Rs. 20, 14 per cent. pay Rs. 20 and above (Table 12, page 283). 53 families have given particulars regarding the number of rooms occupied, floor space etc. It will be seen from table 13 at page 284 that two-roomed houses are common amongst the first, second and fourth income groups while three-roomed houses are more in use generally in the income groups Rs. 150—200 and Rs. 250—300. On the whole, 6 per cent. of the families containing on an average 7 persons each live in one-roomed houses, 45 per cent. of the families containing on an average 6.7 persons each live in two-roomed houses, 19 per cent. of them with an average size of 8.3 persons in three-roomed, 13 per cent. with an average size of 8.6 persons in four-roomed and 17 per cent. with an average size 7.4 persons each in houses of five or more rooms (ride tables 13 and 14, page 284). The actual picture of overcrowding is presented mere clearly in the table 14 at page 284 giving the distribution of families by number of persons and number of rooms. A better in-sight into the degree of evercrowding is given by the distribution of families by number of persons per room given in the table below:

# Distribution of families by number of persons per room.

Number of persons pe	r room		••	••	• •	••		1-2	2-3	3-4	Total
				<u> </u>	·						
Number of families	••			• •				14	24	15	53
Percentage of families		• •						26	45	29	100

It shows that in a little less than 50 per cent, of the families there delibetween two and three personte a room.

# Distribution of families by number of adult mal equivalents per room.

Number of equivalent a	dult ma	ales per re	om				-	1-2	2.3	3-4	Total
			• • • • •								
Number of families	••	• •		• •	• •			25	22	6	53
Percentage of families		••	• •	••	••	• •		47	42	11	100

The percentage of families with equivalent adult males numbering between 1 and 2 to a room is found to be about 47.

#### "Expenditure on miscellaneous".

The average expenditure under this group is Rs. 96-5 per month or 40 per cent. of the total family expenditure. The monthly expenditure varies from Rs. 43-10 in the lowest income group to Rs. 235-12 in the highest (vide Table 17, pages 285-288).

Services.—The most important item of expenditure amongst services is the wages of the domestic servants, which varies from Rs. 2-13 to Rs. 10-5. The total monthly expenditure on services varies from Rs. 6-6 to Rs. 22-4. The average monthly expenditure per family is Rs. 12-0 or about 13 per cent. of the total expenditure on this group.

Children's education.—The monthly expenditure varies from ks. 6-2 to Rs. 31-15 per family. The average monthly expenditure per family is Rs. 13-9 i.e. about 15 per cent. of the total miscellaneous expenditure. In the lowest income group the expenditure is rather very low. It is due to the fact that this group contains young men who have got very few school-going children and necessarily have hardly any expenditure on this account. The average monthly expenditure on this item per spending familias about Rs. 16-4.

Religious ceremonies.—The average monthly expenditure on them has been Rs. 2-13 or about 3 per cent. Considering only those families who spend on this item, the average expenditure per month comes to Rs. 3-15.

Toilet requisites & other necessaries.—The average expenditure on toilet requisites is Rs. 2-10 or about 3 per cent. As between the lowest and highest income groups the monthly expenditure varies from Rs. 1-12 to Rs. 4-12.

Other necessaries such as, washing soap, tooth brash, tooth powder or paste account for expenditure ranging from Re. 1-0 to Rs. 2-2. The average monthly expenditure on them is Rs. 1-5 per family or Re. 0-3 per consumption unit.

Newspaper & entertainments.—The monthly expenditure on newspaper varies from Re. 0-1 to Rs. 2-15 per family while that on entertainments from Re. 2-2 to Rs. 2-10. The average monthly expenditure on both is Rs. 1-14 per family or Re. 0-5 per consumption unit.

Club subscription.—The monthly expenditure on this item ranges from Re. 0-5 to Rs. 11. The average monthly expenditure per family is Re. 0-7.

Postage.—The monthly expenditure on postage varies from Re. 0-9 to Rs. 1-13 per family. The werage monthly expenditure per family is Re. 0-5 only.

Medical charges.—The monthly expenditure on this item varies from Rs. 4-12 to Rs. 13-7 per family. Average expenditure comes to Rs. 7-10 and accounts for about 8 per cent, of the total miscellaneous expenditure.

Holiday expenses. - The average monthly expenditure is Rs. 2-3 per family or about 2 per sent. The monthly expenditure ranges from Re. 0-14 in the lowest income group to Rs. 6-7 in the highest.

Travelling.—It ranges from Rc. 0-2 to Rs. 2-0 per family per month. The average monthly expenditure is Rs. 1-3 per family or about 1 per cent. only.

Maintenance of own conveyance.—The average menthly expenditure is only Re. 0 10 per family or about 0.7 per cent. The monthly expenditure varies from Re. 0-1 to Rs. 2-10 per family.

Taxes.—The average monthly tax is Rs. 2-3 per family or about 2 per cent. Monthly expenditure varies from Re. 0-1 in the third income group to Rs. 10-15 in the highest.

Provident fund & insurance.—The average monthly payment (or rather savings) on this account mounts to Rs. 20-8 per family or 22 per cent. The amount of Provident Fund contribution increases from Rs. 4-0 in the lowest income group to Rs. 37-2 in the highest. Insurance premia have also an increasing tendency.

Remittances.—The average monthly remittances per family come to Rs. 9-8 or about 10 per cent. 0 per cent. of families reported expenditure on remittances. The monthly remittances per remitting amily are Rs. 23-7.

Pansupari.—About 75 per cent. of the families reported expenditure on this item. The average monhly expenditure comes to Rs. 1-10 for all families and varies from Re. 0-14 to about Rs. 2-12. Taking only the spending families the average monthly expenditure per family comes to Rs. 2-2.

Cigarettes & tobacco.—About 44 per cent. of the families have shown expenses on eigarettes and obacco. The monthly expenditure on eigarettes per spending family is Rs. 2-11 and on tobacco Rs. 1-5. The average monthly expenditure on eigarettes and tobacco is Rs. 1-11 of 2 per cent. for all families and raries between Rs. 1-1 and Rs. 4-14.

Debt disbursement.— About 55 per cent. of the families have shown payments on account of lebt. The average monthly payment per family towards debt disbursement is Rs. 8-5 only which s about 4 per cent. of the average monthly income of the family. Taking only the indebted families the average monthly payment towards debt disbursements is Rs. 15-0 only which is about 8 per cent. of the average monthly income. It is noteworthy that percentage of families in debt has been lowest in the lowest income group. In the next group it rises to 73 per cent, and gradually declines to 4 per cent. in Rs. 200—250 group to rise abruptly to 80 per cent. in the following group. It however comes own to 60 per cent. in the highest group. The ratio of debt disbursements to monthly income is the ighest in the income group Rs. 100—150 and the lowest in the income group Rs. 300 and above (Table 11, age 283).

C. P. & C. I. constitute about 5 per cent. of the total sample selected. In all, 248 persons were asked to submit budgets from this area and they submitted 455 effective budgets comprising all-fours and non-fours. A summary table showing the average monthly expenditure by items, based on these budgets is annexed to the Report (vide table 19, pages 310-314). The Report is however, based on the analysis of 300 all-four budgets.

In order to test the adequacy of the sample studied, the dispersion in the expenditure data has been

worked out and is given below :-

A STATE OF THE PARTY OF THE PAR			whole samp	ole is con-	When the sample is divided at random into two equal p

### DISTRIBUTION OF BUDGETS BY INCOME AND EXPENDITURE CLASSES.

The percentage distribution of families by expenditure groups is shown below :--

Below Rs.	Rs. 100 to 125	Rs. 125 to 156	Rs. 150 to 175	Rs. 175 to 200	Rs. 200 to 225	Rs. 225 to 250	Rs. 250 to 275	Rs. 275 to 300	Rs. 300 above
5.3	12.0	13.3	8.7	10.7	9.3	6.7	12.0	4.0	20.0

About 31 per cent. of the families spend less than Rs. 150 per month, about 17 per cent. between Rs. 150 and 200, 16 per cent. between Rs. 200 and 250, 16 per cent. between Rs. 250 and 300 and 20 per cent. Rs. 300 or more. The quartile values of the expenditure are:—

First quartile =Rs. 139.5. Median =Rs. 205.4.

Third quartile =Rs. 272.9.

This means that 50 per cent. of the families spend in round numbers Rs. 205 or less, the upper 25 per cent. of the families have a monthly expenditure of about Rs. 273 or more and the lower 25 per cent. an expenditure of Rs. 139 or less. The central 50 per cent. incur an expenditure of between Rs. 139 and Rs. 273

The quartile values of the income are:

First quartile = Rs. 107 · 2.

Median = Rs. 143 · 4.

Third quartile = Rs. 229 · 8.

The percentage distribution of families by income groups is shown below :-

Below Rs.	Rs. 100 to 125	Rs. 125 to 150	Rs. 150 to 175	Rs. 175 to 200	Ra. 200 to 225	Rs. 225 to 250	Rs. 250 to 275	Rs. 275 to 300	Rs. 300 l above.
20.0	17.3	17.3	12.0	1.3	5-4	9.3	2.7	2.7	12.0

About 55 per cent. of the families earn less than Rs. 150, 13 per cent. between Rs. 150 and Rs. 200, 15 per cent. between Rs. 200 and 250, 5 per cent. between 250 to Rs. 300, and about 12 per cent. Rs. 300. and more

It is found that 32 per cent. of the families lie in the same expenditure and income classes, 64 per cent. in expenditure classes above, and 4 per cent. in expenditure classes below the corresponding income groups. (Table 1, page 302).

# Composition of the family.

It will be seen from table (2) at page 302 that out of 75 families 68 per cent. are natural families and 35

per cent. joint families.

The average number of persons living in the family is 6.5; 1.7 being males and 1.8 being females 1.6 being boys and 1.4 girls. The average number of persons living away from family is 0.4; 0.20 being males and 0.20 females. The size of the family inclusive of dependants living away from family is—6.4 (Table 3, page 302). It will also be seen from table 3 that the number of persons per family increase continuously from 6.8 persons in the second income group to 8.0 in the highest income group. Average strength of family in the first income group is 6.2.

Average number of earners per family is 1·1, including the head of the family. Average number of nen earners including those living a way from namily is 5·8 i.e., about 16 per cent. of the family members are earner

and 84 per cent. non-earners of whom about 44 per cent. are boys and girls and about 30 per cent. are women. (Table 4, page 303). The number of earners varies from 1.0 in the lowest income group to 1.55 in the highest. There is only one female earner in the highest group. The number of dependants per earner is almost constant at 6 in the first four income groups. The pressure of dependants is the maximum (7.2) in the fifth income group and minimum (5.2) in the last. It will be seen from the table that the earner of an average family has to maintain 5—7 persons or 4—5 equivalent adult males. The dependants per earner in the average family vary from 4.5 consumption units in the lowest group to 3.9 in the highest. The proportionate excess of expenditure over income of the family declines as one goes up the income groups, while the number of earners alternately decreases and increases as between the lowest and the highest income groups (Table 10, page 305).

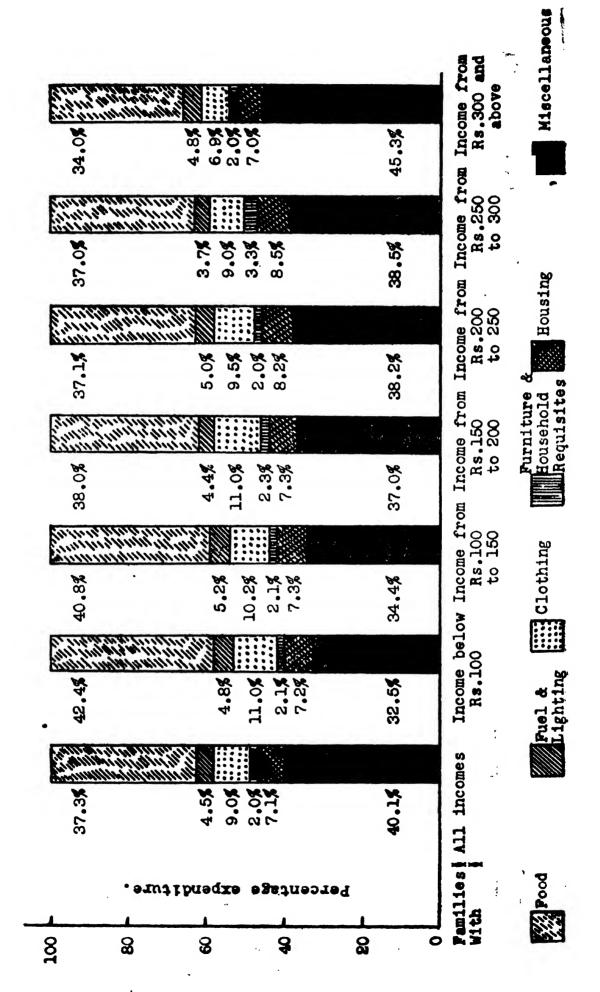

## MODAL SIZE OF FAMILY.

About 26.7 per cent. of the families consist of 6 to 7 persons or 4 to 5 consumption units. They constitute the modal group, the modal value being 4.5 c. u.'s. It is very closely followed by the median value of 4.7 c. u.'s. (Table 7, page 304).

### MONTHLY INCOME AND EXPENDITURE.

The average income of the head of the family from pay and allowances is Rs. 164-1 per month and from other sources is Rs. 18-8 per month. The average carnings of other members of the family work out to Rs. 7-12 per month. The total income of the family aggregates Rs. 190-5 per month. The greatest single source is the earning of the head of the family accounting for 96 per cent. The contribution of the other members of the family towards earnings is very small being only about 4 per cent. As between the income groups, pay and allowances of the head of the family vary between 79 and 96 per cent. of the family income. The monthly income per family varies from Rs. 83-10 to Rs. 508-11, while the monthly expenditure per family shows a variation from Rs. 121-15 to Rs. 457-14. The monthly income per capita in the various income groups varies from Rs. 13-8 to Rs. 63-9 while the monthly expenditure per capita varies from Rs. 19-10 to Rs. 57-4. The average monthly income per c. u. is Rs. 38-1 and the average monthly expenditure per c. u. is Rs. 45-14. Among the income groups the deficit per family per month varies from Rs. 45-14 in the second income group to Rs. 18-6 in the highest but one income group. In the highest income group there is surplus of Rs. 50-13 per family per month (Tables 8 and 9, page 304).

Note :- Figures in brackets show percentages.

Expenditure on food is 37 per cent. cf the total family expenditure and that on miscellaneous items is 40 per cent. As between the lowest and the highest income groups the expenditure on food falls from 42 per cent. to 34 per cent. and that on fuel and lighting remains more or less steady at about 4 per cent. Expenditure on clothing is 11 per cent. in the first group and then declines gradually to 7 per cent. in the highest group. Expenditure on housing also fluctuates between 7 per cent. and 8.5 per cent. Percentage expenditure on miscellaneous group increases with income from 32.5 to 45. Expenditure on furniture and household requisites remains steady at 2 per cent. in all income groups except the fifth in which it is 3.3 per cent.

Surplus and deficit budgets

Budgets have been clssified into surplus and deficit ones and it will be seen that 15 per cent. of the budgets show surplus, the rest show deficit.

### Non-regular expenditure.

Only six families reported expenditure of non-regular nature. One family in the lowest income group had to spend Rs. 600 on the occasion of a thread ceremony. In the next income group a family undertock house-building and spent Rs. 760 for the purpose. In the following group one family had to incur an expenditure of Rs. 200 on marriage. In the income group Rs. 200—250 there was a purchase of a cycle for Rs. 80 in one family, while in another a funeral took place costing Rs. 70 only. One family, in the income group Rs. 250—300, spent Rs. 125 to a religious ceremony, Rs. 47 for medicine and Rs. 51 for travelling.

From the table on the prepage it is seen that the proportion of expenditure given to cereals is about 2: per cent. of the total of food expenditure. Wheat alone accounts for 12 per cent. Milk and fats account for about 37 per cent. of the food expenditure. Percentages of expenditure on other items are 14 per cent for 'fruits and vegetables', 4 per cent. for "animal food," 11 per cent. for miscellaneous food articles 7 per cent. for pulses and 5 per cent. for condiments and spices. As between the lowest and highes income groups the expenditure on cereals varies from 24 per cent. to 18 per cent. and on condiment and spices from 5 per cent. to 3 per cent. Expenditure on pulses varies between 4.7 and 9.0 per cent among the income groups. As compared to other items in the food group, the expenditure on milk and fats, is the highest in all groups varying from 34 per cent. In the first group to 37 per cent. in the last

The table below shows food expenditure by income groups. The average expenditure per family o food is Rs. 85-9 per family.

### Expenditure on food per c. u.

at 1 and 1 - 1 - 1 - 1 - 1 - 1 - 1 - 1 - 1 - 1	Rs. AS.	Rs. AS.	Rs. AS.	Rs. 48.	Rs. AS.	Rs. AS.	Rs. A
Food expenditure (excluding outside mesls)	51 7	69 1	78 10	94 11	108 3	154 1	85 1
Food expenditure per consumption unit	11 8	15 5	15 2	18 2	20 0	25 2	17 :

It may be noted that the food expenditure per c.u. shows little variation between the secon and the third income groups and that the figures for the fourth and the fifth income groups are also no very different and the figure for the sixth income group shows an appreciable increase over the figures i lower income groups. The average monthly expenditure on food per c. u. is Rs. 17-2.

Comparison of food expenditure in income groups 1 and 6 is shown below:—

			,					Average for income group 6 divided by average for income group 1.
Cereals		• •	• •	• •	• •	• •	•••	2.2

DIETARY HABITS.

Wheat is the staple article of food, next being rice. The percentage expenditures on wheat and whe products from the lowest to the highest income groups are 18, 14.0, 11.0, 11.9,8.0 and 10.0 respectively of total food expenditure while those on rice are 10, 9, 10, 11, 10 and 7 respectively. The average consumption of wheat and wheat products is 39½ seers per family of 6.5 persons or 5.0 adult male equivalents and the otrice 23 seers only. The percentage expenditure on milk varies between 12 and 22 while that on given between 9 and 14. The maximum expenditure of 22 per cent. and 14 per cent. on milk and given percentage expenditure of 22 per cent. and 14 per cent. on milk and given group decreases to only 17 per cent. and 8 per cent. respectively of the total food expenditure but it may noted that this class, in comparison with others, spends more on butter and vanaspati than of ghee. The average consumption of milk and ghee is 36.4 and 2.0 seers respectively per family.

C. P. & C. 1.

The percentage expenditure on fruits varies between 1.4 and 4.3, that on vegetables between 7 and 12. It may be noted that the expenditure on fruits increases as we go up the income groups but that on vegetables declines from 12 per cent. in the lowest income group to 7 per cent. in the income group Rs. 250—300, to rise to 10 per cent. in the last. The average monthly consumption of potato and onion per family is 4.6 and 3.6 seers respectively. In the 'animal food' group goat's meat is the major item of expenditure as well as consumption. Out of about 4 per cent. spent on animal food, more than 2 per cent. is accounted for by goat's meat alone. Percentage expenditure on tea, sugar and gur and raw sugar is given below:

							Below Rs.	Rs. 100 to 150	Rs. 150 to 200	Rs. 200 to 250	Rs. 250 to 500	Rs. 300 & above.	All
Tea	• •	•	••	• •	••		2.4	1.8	1 - 2	2.4	1.4	1.6	1.7
Sugar, refined	••	•	••	••	••	••	3-9	3.2	3.7	3.0	4.5	2.1	3.1
Sugar, raw and	gur	••	••	••	••	••	1.8	2.5	1-9	1.7	1.7	2.7	2 0

The monthly consumptions of tea, sugar, gur and raw sugar are 1.2 lbs. and 5.3 seers and 4.8 seers respectively per family.

# ESTIMATE OF MONEY VALUE OF MONTHLY CONCESSION.

The following table gives in details the money value of monthly concessions enjoyed by the Central Government employees in this area :--

		<del></del>	Items				Bolow Rs. 100	Rs. 100 to 150	Rs. 150 to 200	Rs. 200 to 250	Rs. 250 to 300	Rs. 300 & above	Average all group
Dereals	••	••	••	••	••	••	Rs. As. 8 3	Rs. as. 6 6	Rs. as.	Rs. AS. 4 12	Rs. as. 5 11	Rs. 45.

tikat.	••	••	••	••	• •			0 10	}				
					Total		11 3	12 4	11 4	8 5	8 2	3 7	10 2

The amount of concessions declines except for an initial rise in the second income group to Rs. 3-7 in the last. The major portion of benefit in each income group was received from cereals, followed next by pulses. The average monthly benefit comes to Rs. 10-2, of which Rs. 5-15 is accounted for by cereals, Rs. 1-4 by pulses Re. 0-15 by vegetable oils, Re. 0-11 each by ghee and onion respectively. Average family income therefore rises up from Rs. 190-5 to Rs. 200-7 and expenditure from Rs. 229-6 to Rs. 239-8. Expenditure on food articles has thus advanced by Rs. 10-2 to Rs. 95-11 and is 40.0 per cent. of the enhanced expenditure.

# FUEL AND LIGHTING.

Firewood, charcoal, and kerosene, match box and electricity together account for a little over 89 per cent. of the total expenditure on fuel and lighting. Fire wood and charcosl together alone account for more than 66 per cent.

The average expenditure per family is Rs. 10-7 or Rs. 2-1 per consumption unit.

# CLOTHING.

This group includes also shoes and umbrella. The estimated expenditure and the average actual monthly expenditure on clothing on the basis of four quarterly returns are shown in the table below for the purpose of comparison.

				: 	Belo 10		Rs.	_		100	to	]		150	to	_		200 250	to-	1	Rs.	250 300		_ _	Rs.	300 bov		 _		Αì	ı

The estimated monthly expenditure on clothing is Rs. 20-7 per family or Rs. 4-1 per consumption unit. The estimated monthly expenditure on clothing per man is Rs. 4-11, per woman is Rs. 4-7 and per child is Rs. 1-9.

#### FURNITURE AND HOUSEHOLD REQUISITES. .

			مساحاتها والمسا		Below Rs.	Rs. 100 to 150	Rs. 150 to 200	Rs. 200 to 250	Rs. 250 to 300	Rs. 300 & above	AII
Estimated expenditure				••	Rs. as.	Rs. as.	Rs. as. 4 12	Rs. as. 5 0	Rs. as. 9 10	Rs. 48.	Rs. AS. 4 11
Actual expenditure	• •	••	••	••	14	3 7	2 13	4 9	9 0	12 3	4 7

The estimated monthly expenditure is Rs. 4-11 per family or Re. 0-15 per consumption unit, which is slightly higher than the actual expenditure as shown above.

### Housing.

Sixtysix per cent. of the families pay rents. The remaining 34 per cent. either live in self-owned houses or free houses\*. Taking into account only those families who pay rents, it is found that 8 per cent. of the families pay rents below Rs. 5, 38 per cent. between Rs. 5 and Rs. 10, 22 per cent. between Rs. 10 and Rs. 15, 14 per cent. pay rent between Rs. 15 and 20 and 18 per cent. pay Rs. 20 and above. (Table 12, page 305). It is found that the modal rent group is Rs. 5 to 10 in which about 38 per cent. of the families lie. 50 families have given information regarding their residential accommodation. On the whole, 40 per cent. of the families containing on an average 6.3 persons each live in two-roomed houses, 22 per cent. with an average size of 5.4 in three-roomed, 24 per cent. with an average size of 7.5 persons in four-roomed houses and 14 per cent. with an average size of 6.6 persons in houses of five or more rooms (Table 13, page 306).

The actual picture of over-crowding is presented more clearly in the table (14) at page 306 giving the distribution of families by number of persons and number of rooms. 54 per cent. of families are such as have 1 to 2 persons per room, 36 per cent. have 2 to 3 persons per room and 10 per cent. have 3 to 4 persons per room. A better in-sight into the degree of over-crowding is given by the distribution of families by number of persons per room given in the table below:—

Distribution of families by number of persons per room.

Number	of person	s per roor	n	 1—2	23	3-4	Total
Number of families  Percentage of families			••	 27 54	18 36	5 10	50 100

It shows that about 54 per cent. of the families have on an average between one and two persons to a room.

Distribution of families by number of adult male equivalents per room is given below:—

Number of equivale	nt adult r	nales per	room		1 -2	23	Total
Number of families  Percentage of families	· · · · · · · · · · · · · · · · · · ·	••		 	46 92	4 8	50 100

The percentage of families with 1 and 2 equivalent adult males to a room is found to be about 92.

# EXPENDITURE ON 'MISCELLANEOUS'.

The average expenditure under this group is Rs. 91-15 or 40 per cent. The monthly expenditure varies from Rs. 39-9 in the lowest income group to Rs. 207-8 in the highest. (Table 17, pages 307-309).

Services.—The most important item of expenditure amongst services is the wages of domestic servants, which varies from Rs. 1-12 per month to Rs. 19-9 as between the lowest and highest income groups. The total monthly expenditure on services varies from Rs. 6-2 to Rs. 34-7. The average monthly expenditure per family is Rs. 11-11 or 13 per cent. of the total expenditure of this group.

<sup>\* 2</sup> per cent. have mentioned that they are in occupation of self-ewned houses, 4 per cent. have stated that they are in occupation of feethers have given no information regarding the nature of occupancy.

Children's education.—The monthly expenditure varies from Rs. 3-10 to Rs. 28-12 per family. The average monthly expenditure per family is Rs. 12-3 i.e., about 13 per cent. of the total miscellaneous expenditure. In the lowest income group the expenditure is very insignificant. The average monthly expenditure on this item per spending family is about Rs. 15-5.

Religious ceremonies.—The average monthly expenditure is Rs. 2-5 or about 2 per cent.; considering only those families who spend on this item, the average expenditure per month comes to Rs. 3-2.

Toilet requisites and other necessaries.—The average expenditure on toilet requisites is Rs. 1-4 or 1 per cent. As between the lowest and highest income groups the monthly expenditure varies from Re. 0-11 to Rs. 4-12. Other necessaries such as washing soap, tooth brush, tooth pewder or paste account for the expenditure ranging from Rs. 1-3 to Rs. 3-9. The average monthly expenditure on them is Rs. 1-14 per family or Re. 0-6 per consumption unit.

Newspaper and entertainments.—The monthly expenditure on newspaper varies from Re. 0-5 to Rs. 2-11 per family while that on entertainments from Re. 0-6 to Rs. 3-4. The average monthly expenditure on both is Rs. 2-0 per family or Re. 0-6 per consumption unit.

Club subscription.—The monthly expenditure on this item ranges from Re. 0-8 to Rs. 2-1; the average monthly expenditure per family is Re. 0-12.

Postaje.—The monthly expenditure on postage varies from Re. 0-6 to Rs. 1-6 per family. The average monthly is Re. 0-14 only.

Medical charges.—The monthly expenditure on this item varies from Rs. 5-1 to Rs. 8-14 per family; average monthly expenditure is Rs. 6-10 or Rs. 1-5 per consumption unit.

\*Holiday expenses.—The average monthly expenditure is Rs. 1-15 per family or about 2 percent. Monthly expenditure varies from Re. 0-1 to Rs. 1-11.

Travelling.—It ranges from Re. 0-1 to Rs. 1-15 per family per month. The average monthly expenditure is Rs. 1-1 per family or about 1 per cent.

Maintenance of own conveyance.—The average monthly expenditure is only Rs. 2-10 per family or about 2.8 per cent. Monthly expenditure varies from Re. 0-1 to Rs. 2-0 only.

Taxes.—The monthly payment of taxes per family is only Re. 0-1 in the income group Rs. 150—200 while in the highest income group it is Rs. 15-7. The monthly average for all families is Rs. 2-7 or about 3 per cent.

Provident fund and insurance.—The average monthly expenditure (or rather savings) on this account amounts to Rs. 18-8 per family or 20 per cent of the expenditure on miscellaneous. The amount of Provident Fund contribution increases from Rs. 4-14 in the lowest income group to Rs. 28-5 in the highest. The insurance premium increases from Rs. 1-4 in the lowest income group to Rs. 17-15 in the highest.

Remittances.— The average monthly remittance comes to about Rs. 5-4 or 6 per cent. 31 per cent. of the families reported expenditure on remittances. The monthly remittance per remitting family is Rs. 16-13.

Pansupari.—About 73 per cent. of the families reported expenditure on this item. The average monthly expenditure comes to Rs. 1-13 for all families and varies from Rs. 1-2 to about Rs. 2-15. Taking only the expending families the average monthly expenditure comes to Rs. 2-7.

Cigarettes and tobacco. About 50 per cent. of the families have shown expenses on cigarettes and tobacco. The monthly expenditure on cigarettes per spending family is Rs. 1-11 and on tobacco Rs. 1-0. The average monthly expenditure on cigarettes and tobacco is Rs. 1-5 or 1.5 per cent. for all families and varies between Re. 0-7 and Rs. 4-3.

Debt disbursement.—About 63 per cent. of the families have shown payments on account of debt. The average monthly payment per family towards debt disbursements is Rs. 14-0 only, which is about 7.4 per cent. of the average monthly income of the family. Taking only the indebted families the average monthly payment towards debt disbursements per family is Rs. 22-0 only which is about 11.6 per cent. of the average monthly income. It will be seen that percentage of families in debt increases from 60 per cent. in the first group to 72 per cent. in the fourth group. Thereafter it falls to 50 per cent. in the last but one group—to fall further to 44 per cent. in the last group. The ratio of debt disbursements to monthly income is the highest in the third income group and the lowest in the income group Rs. 300 and above (Table 11—page 305).
